THE SUPPLY AND DEMAND IN DEPTH

The Holistic Approach in Reading the Market

By Nazmier Amzar

*This program is dedicated to those who are looking forward
to learning the Supply and Demand and its components
thoroughly.*

*I hope this effort would be a good help to those who are
still looking to learn and understand the concept. All the
best to you.*

Regards,
Nazmier Amzar.

DISCLAIMER

This note is made for educational purpose only. If you lose money while demonstrating the things I've outlined here; therefore, it is under your own risk.

I am not responsible and shall not be liable for such loses if this strategy doesn't suit you at any length.

Regards,
Nazmier Amzar Azman
2020.

PLEASE REMEMBER THIS RULE!

Any trade Setup taken in SND has to be a **complete setup**. We only trade a complete setup where **all clues are in place**. If this rule is void, then misjudgment is definitely apparent.

TRADING IS ABOUT RISK vs REWARD

One thing we have to know for sure, there is no technique or setup that is Holy Grail. That is as ambiguous as it may sound. If you want a NO LOSS trade, the only way is to not trade at all and enjoy PUBG.

THE ONLY WAY TO KEEP ON WINNING

If you want to keep on winning and lose less, practicing and doing back testing is the best thing to do. While we train ourselves by looking at the past price action, we are building the ability to read the market like reading the books.

JARGONS IN SUPPLY AND DEMAND

H – High

L – Low

HH – Higher High

LL – Lower Low

QM – Quasimodo

QML – QM Level/QM Line

Upper – The Upper Part of QM that consists of H & HH

Lower – The Lower Part of QM that consists of L & LL

MPL – Maximum Pain Level

DP – Decision Point

SL – Stop Loss

TP – Target Profit

RBR – Rally Base Rally

RBD – Rally Base Drop

DBR – Drop Base Rally

DBD – Drop Base Drop

FTR – Fail to Return

FTB – First Time Back

Fakeout – Fake Breakout

SR Flip – Support & Resistant Flip

RS Flip – Resistant & Support Flip

SSR – Significant Support & Resistant

SRS – Significant Resistant & Support

KINK – Refers to King Setup

Supply – Refers to the Supply Zone or Sell Zone

Demand – Refers to the Demand Zone or Buy Zone

TF – Time Frame

HTF – Higher Time Frame (D1, W1, MN)

LTF – Lower Time Frame (H4, H1, M30, M15)

STF – Small Time Frame (M5, M1)

CP – Compression

CHAPTER 1

The Trends

THE MAJOR TRENDS

There are basically **TWO** trends that you can see in the market. The first one is the **UPTREND**. The second one is the **DOWNTREND**.

This is **UPTREND**. Some people call it **BULLISH**.
In Supply and Demand Trading, we call it
RALLY.

This is **DOWNTREND**. Some people call it **BEARISH**. In Supply and Demand Trading, we call it **DROP**.

RALLY

The RALLY MOVE

Whenever the market is making its move UP, it is called **RALLY**. At this point, buyers are empowering the market.

DROP

The DROP MOVE

Whenever the market is making its move DOWN, it is called **DROP**. At this point, sellers are empowering the market.

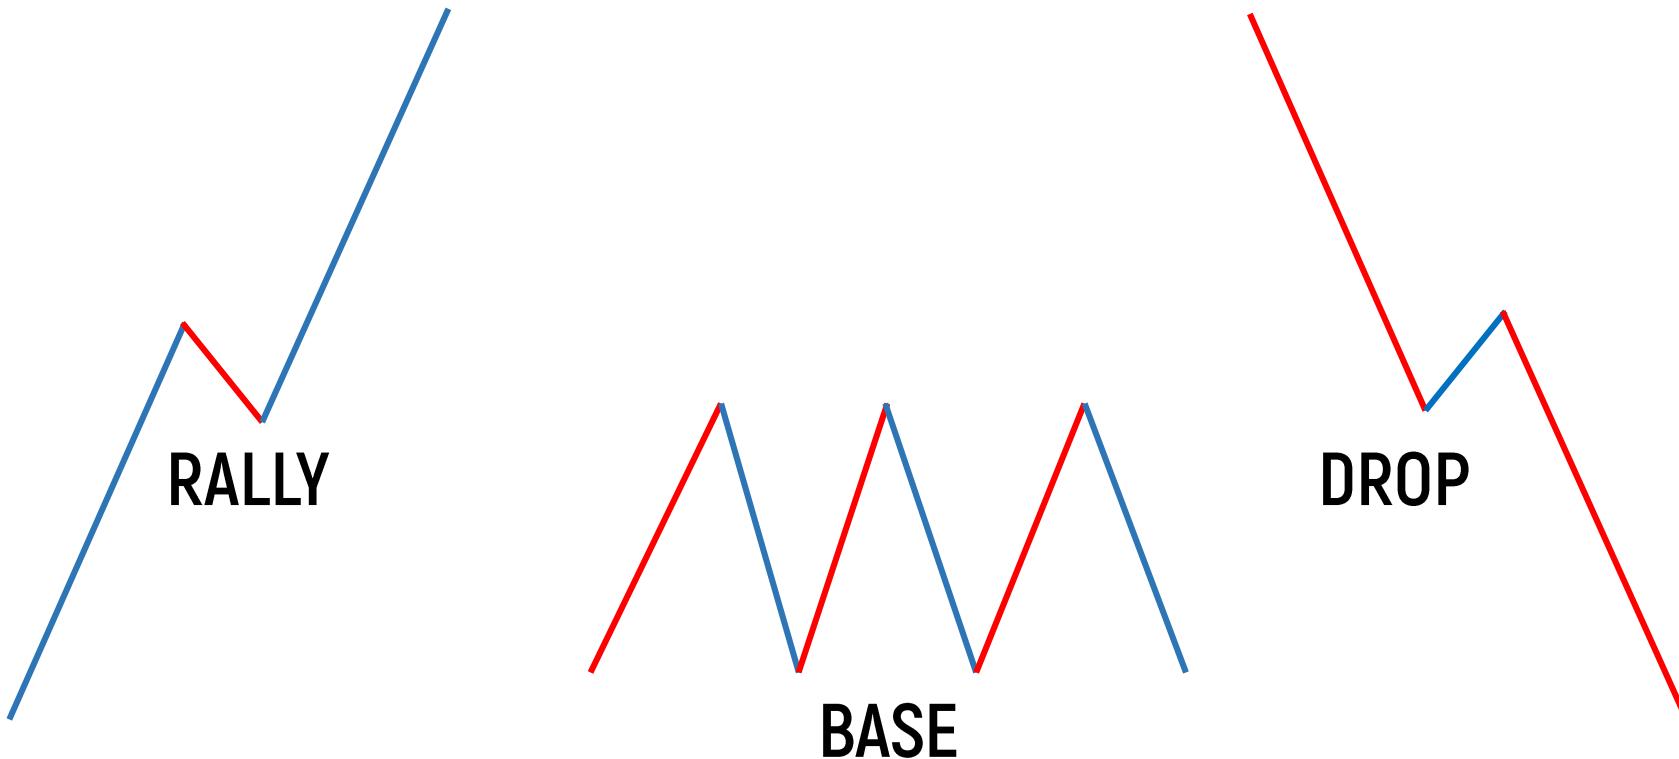

CHAPTER 2

The Price Movement

THE MARKET MOVEMENTS

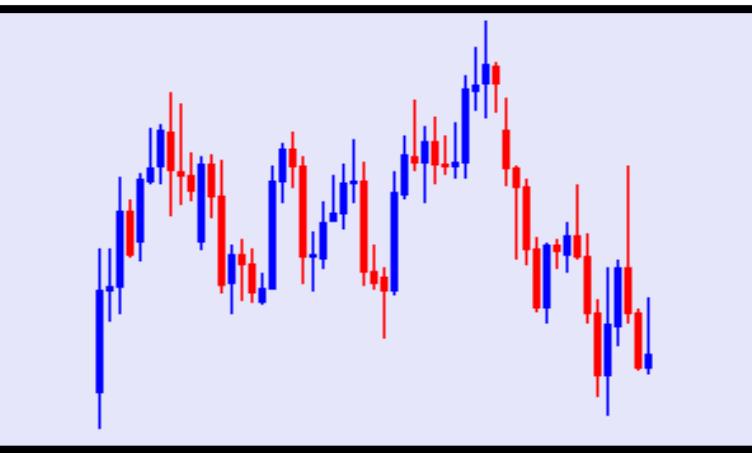

There are basically THREE market moves that create the ups and downs of the market. They are as follows:

Sometimes it is called sideways. But in Supply and Demand, it is called **BASE**.

RALLY

BASE

DROP

So, these are what we got on the chart. The 3 basic moves that you can always find that makes the ups and downs in the market.

The 4 Market Moves

The 3 market movements create 4 market moves that shaped the chart and create patterns of ups and downs we see in the market.

SELL

How Does it Look in the Chart?

These moves are basically candles combination that we can find across the chart at any Time Frame

CHAPTER 3

Introduction to the Zones

What are the Zones?

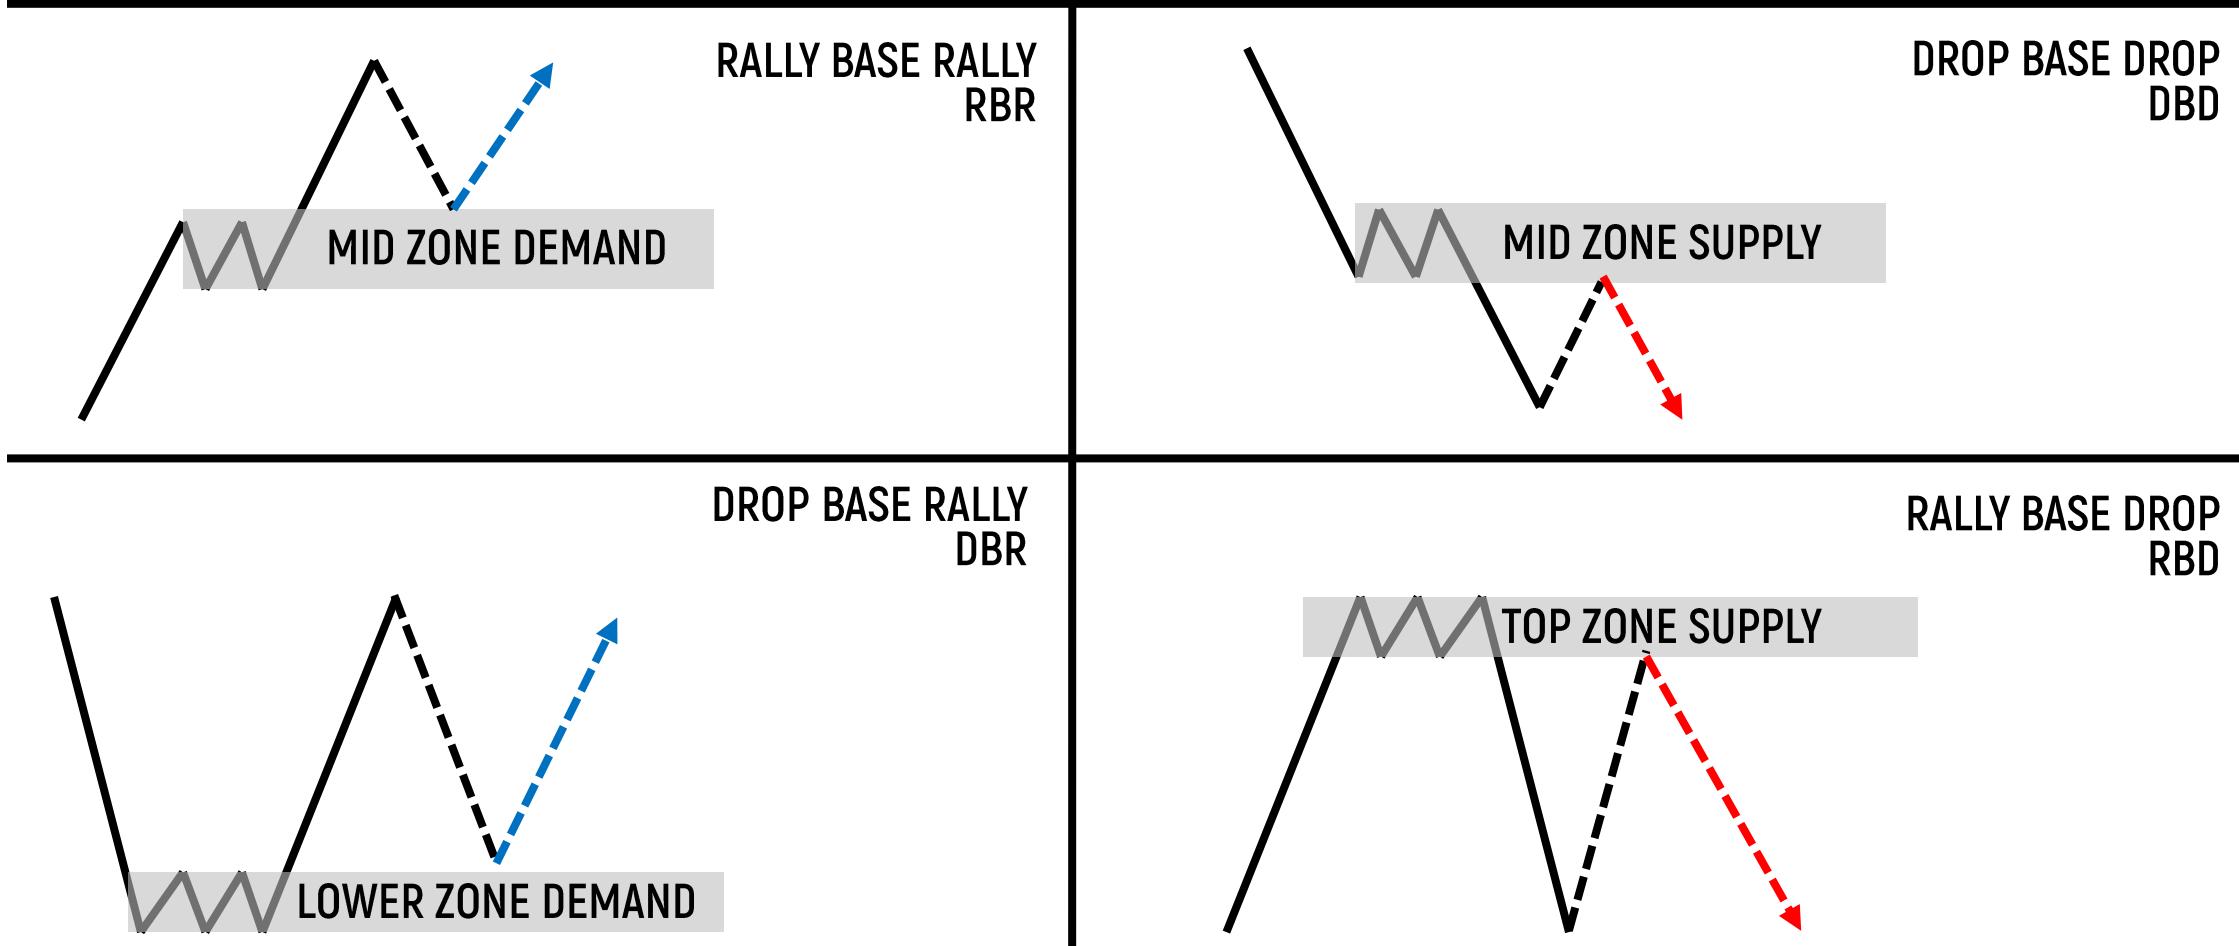

There are 3 Zones that we are going to look for our trade.

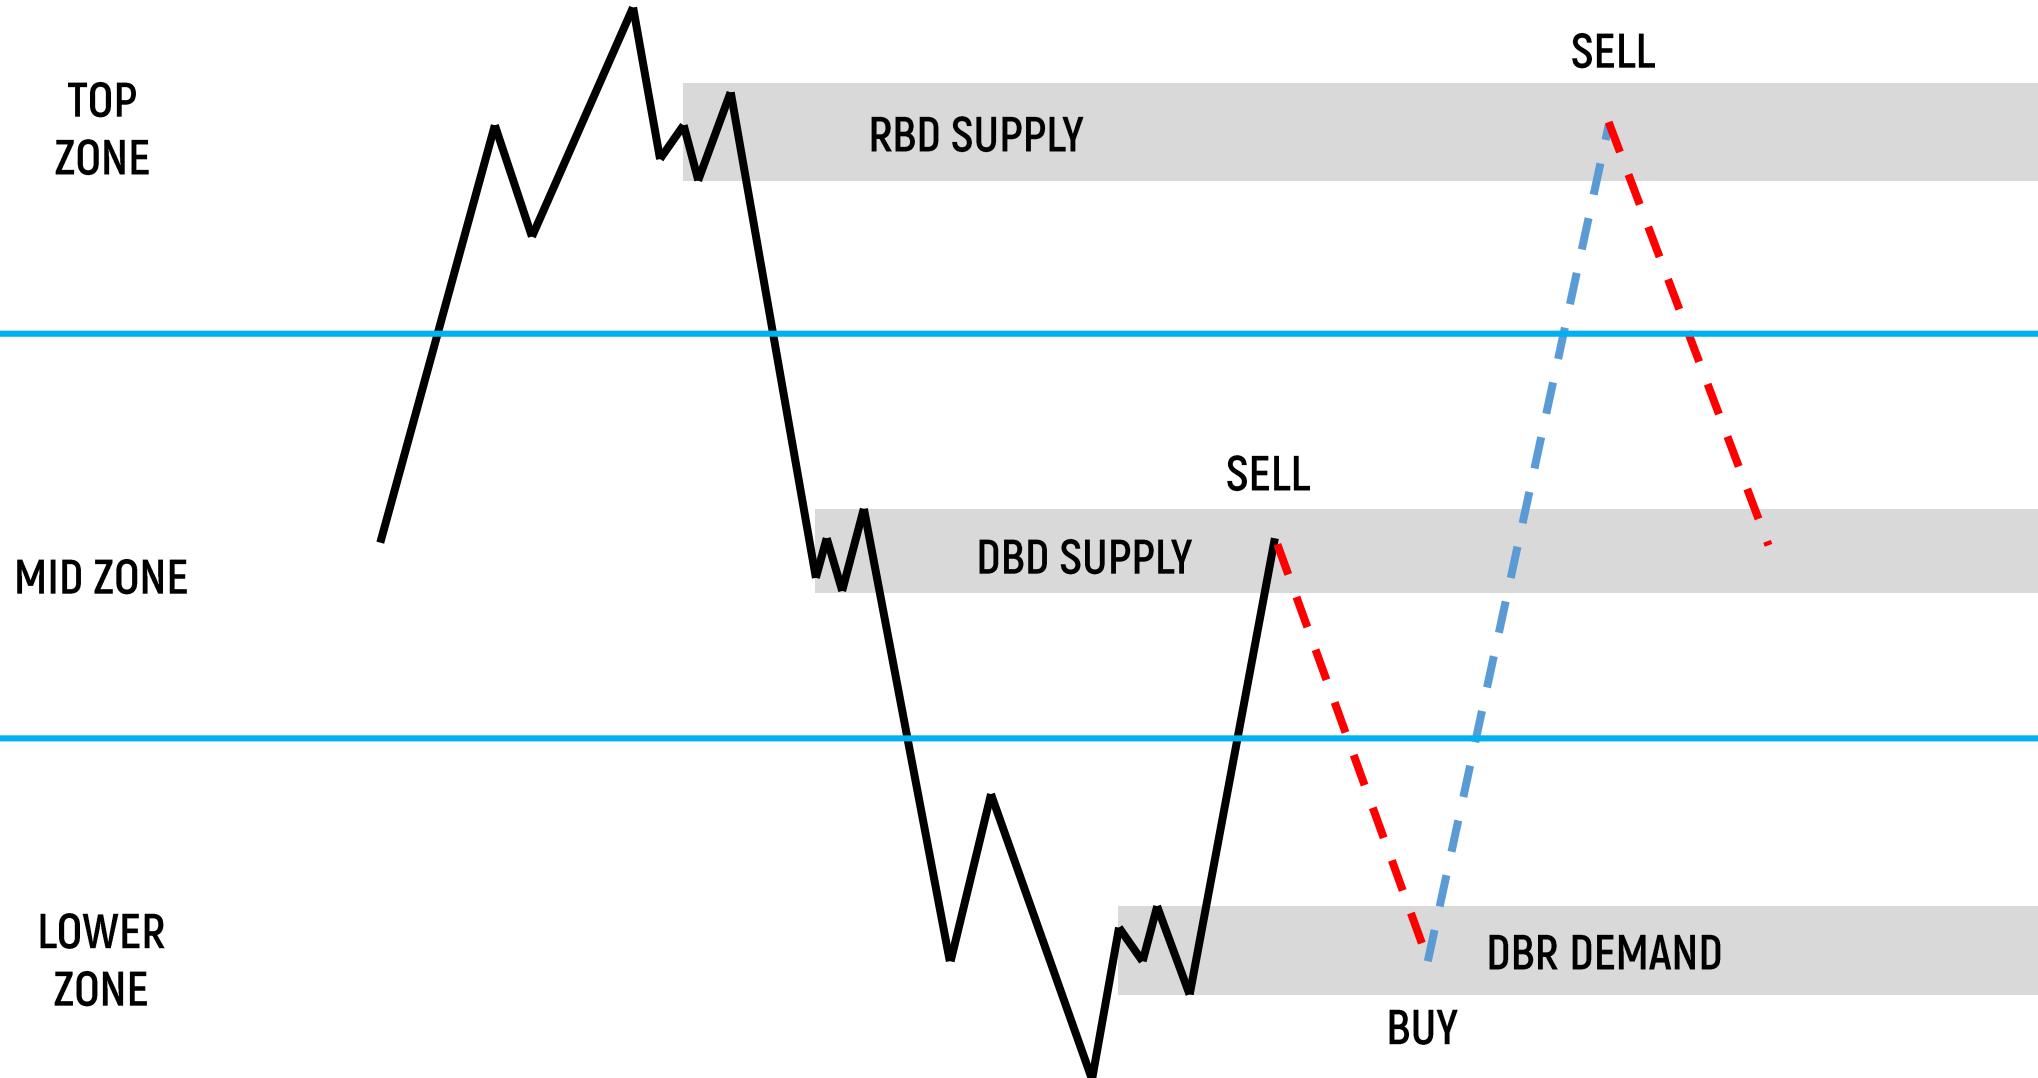

Let's see what the zones are.

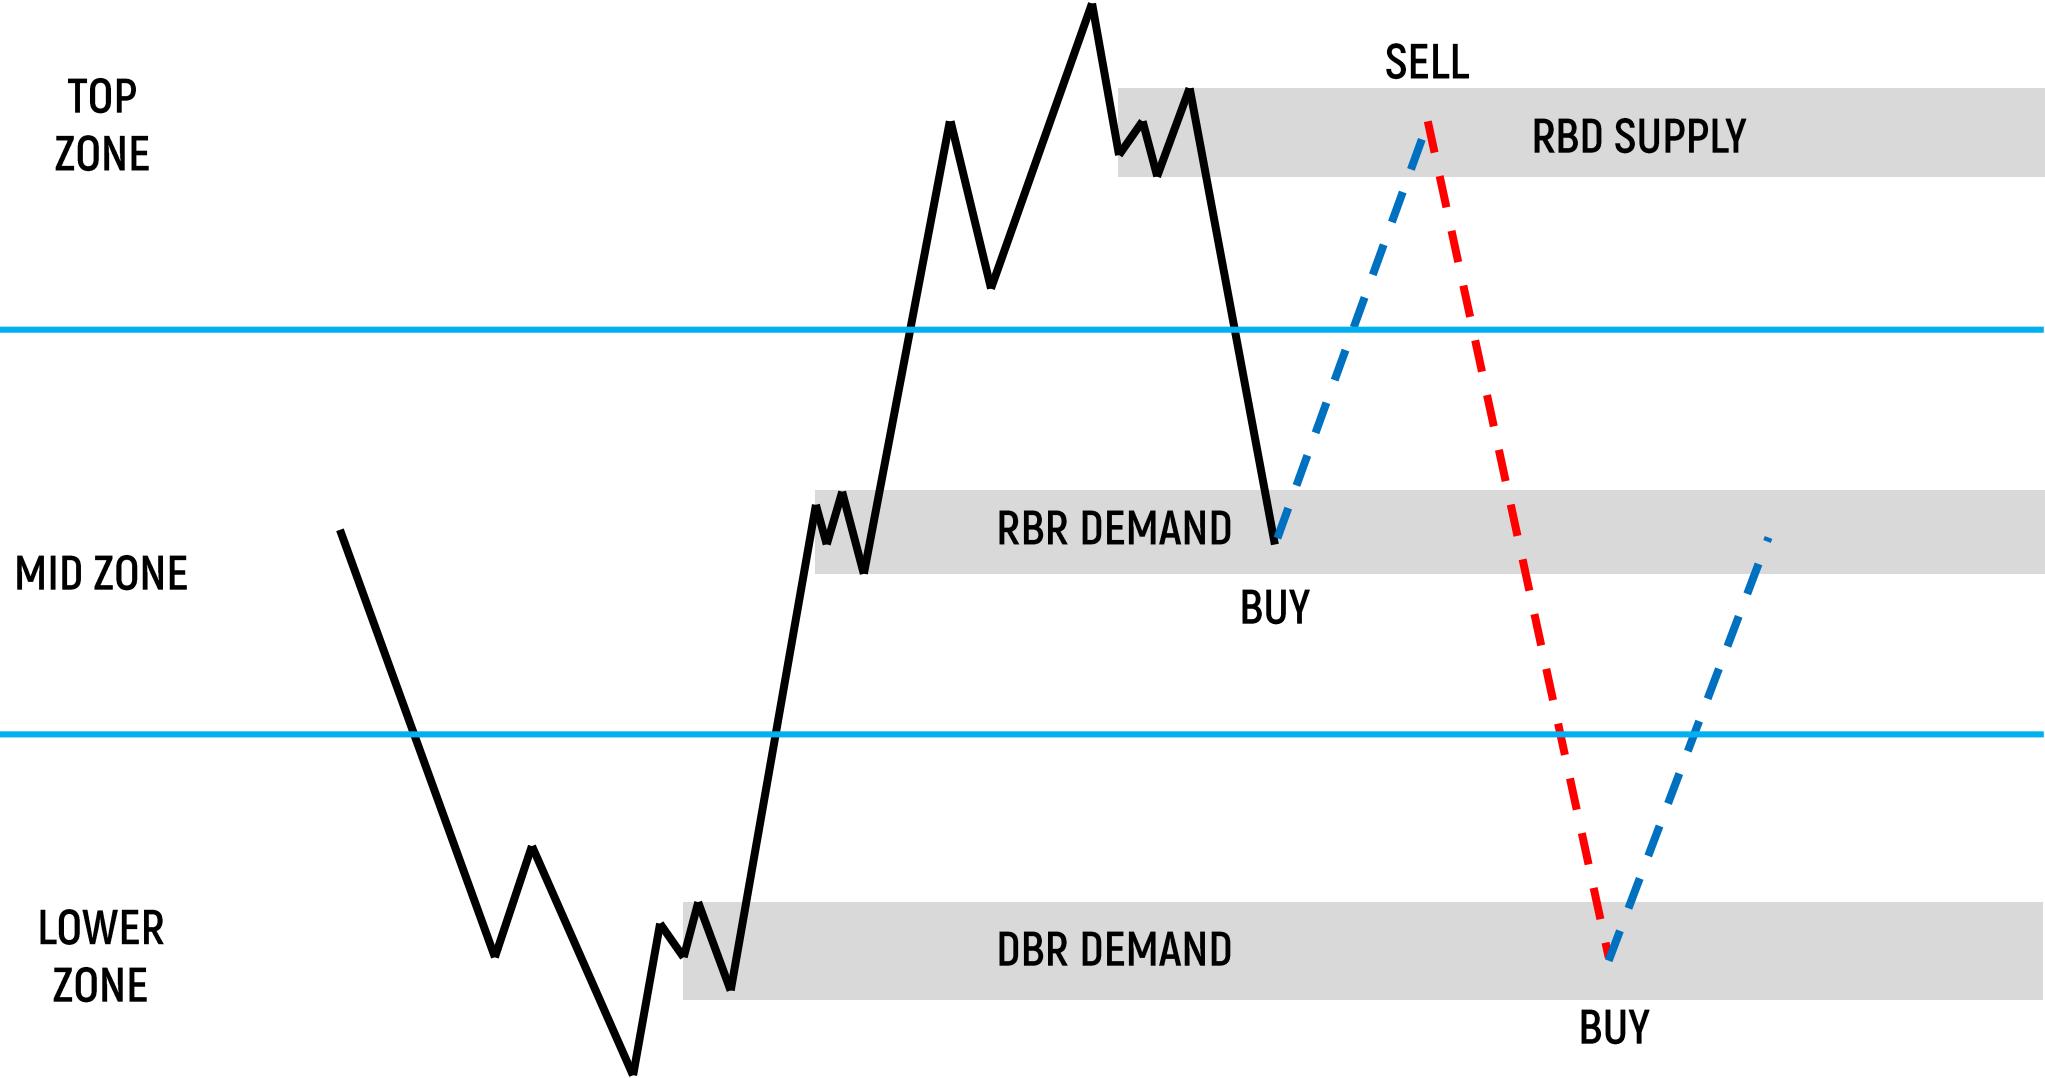

WHERE ARE THE ZONES?

DEMAND ZONE = BUY

SUPPLY ZONE = SELL

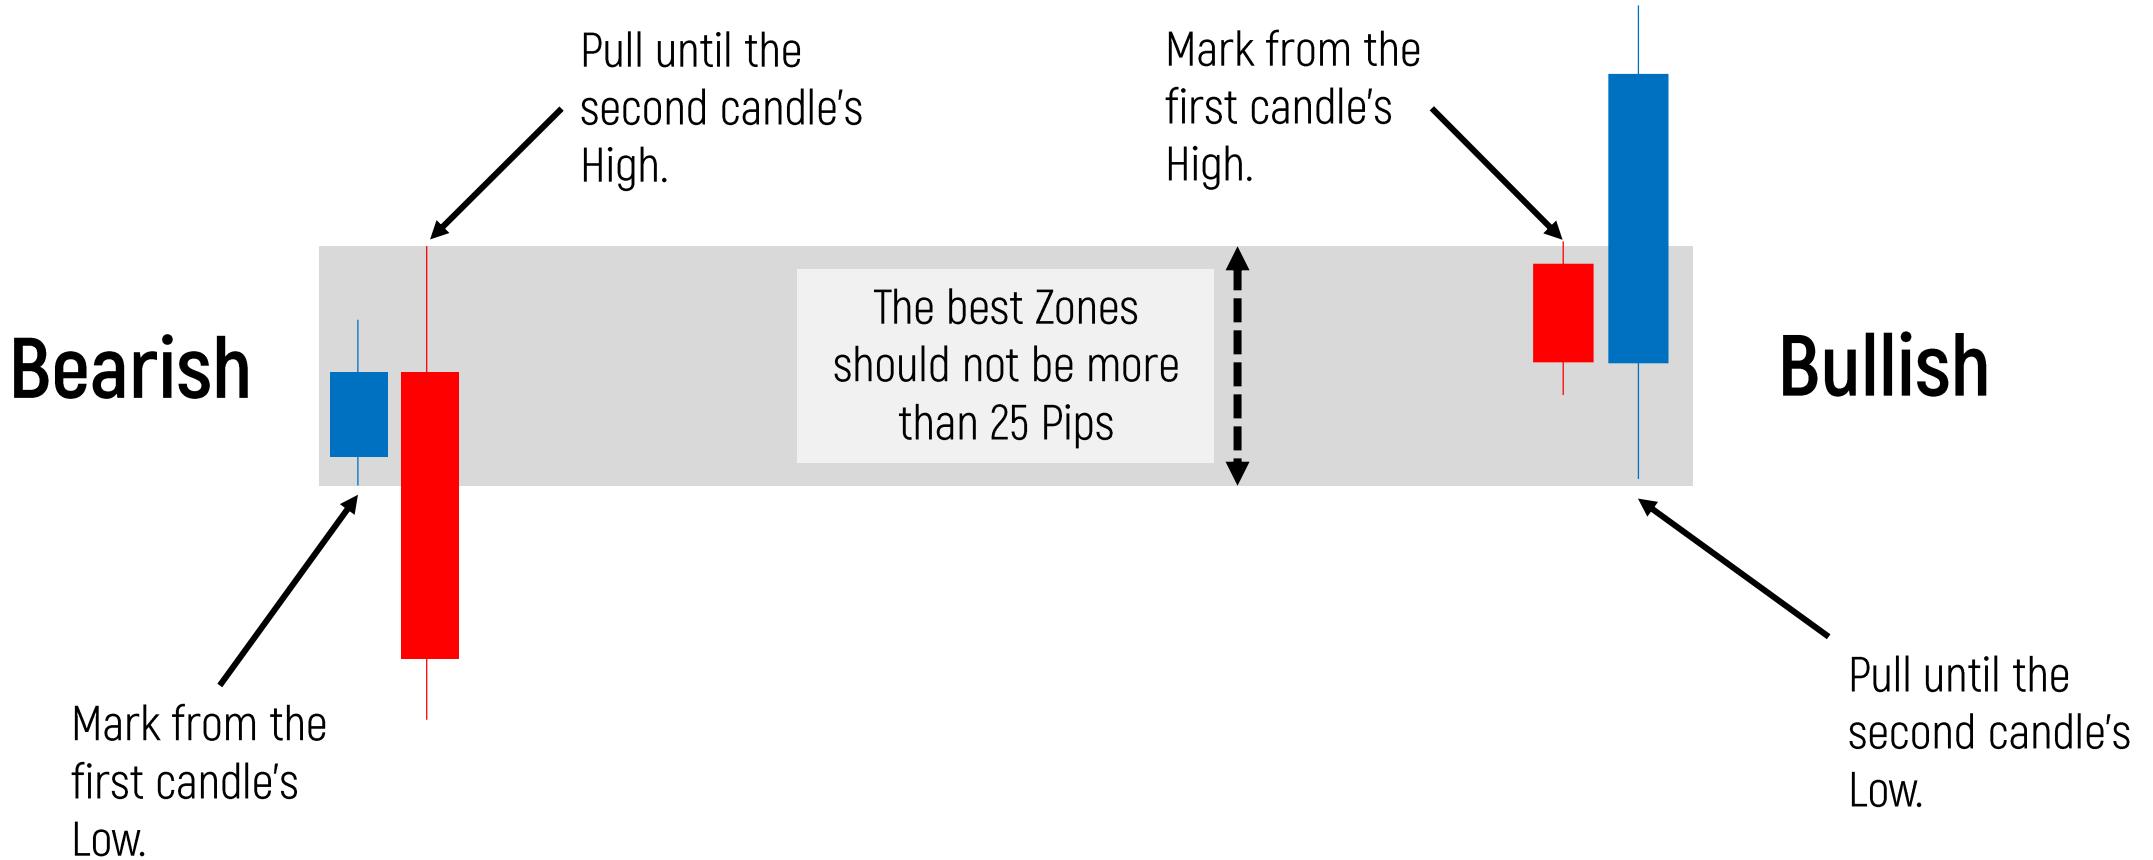

How to Mark the Zone?

This is how we do the marking of the Zone whenever we find one that has a good setup to trade.

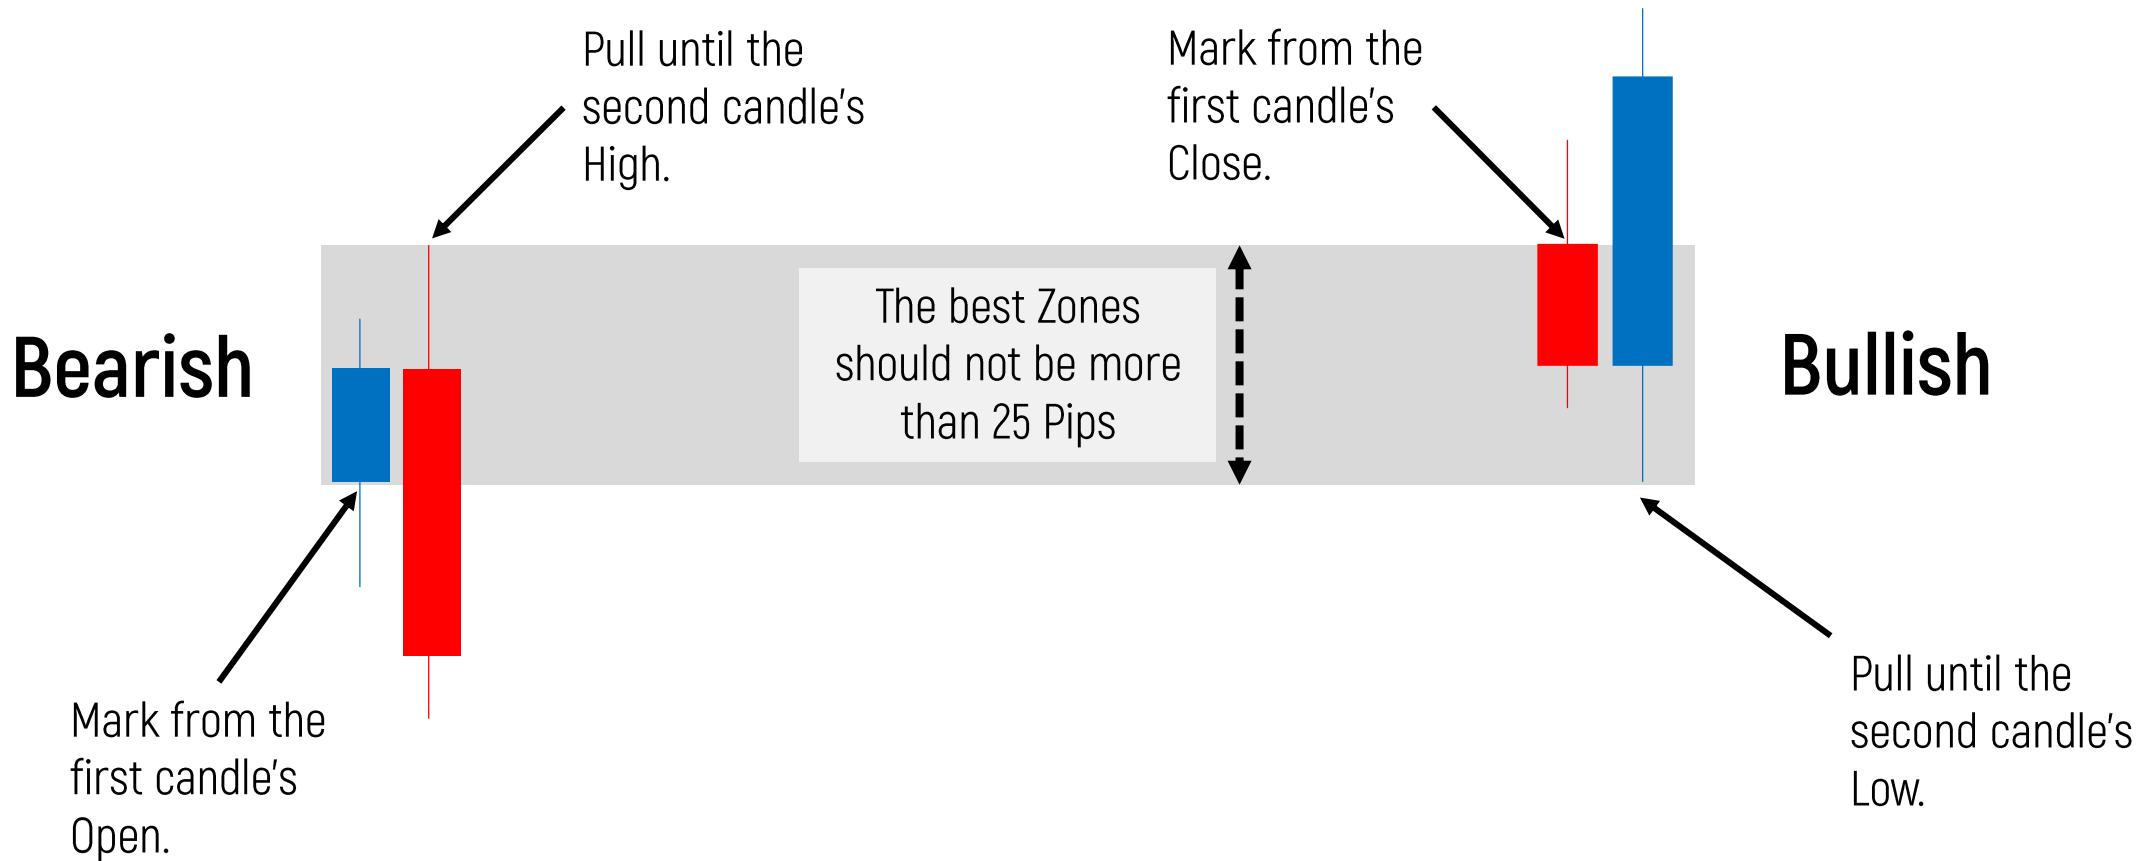

HOW TO MARK THE ZONES?

Standard Marking

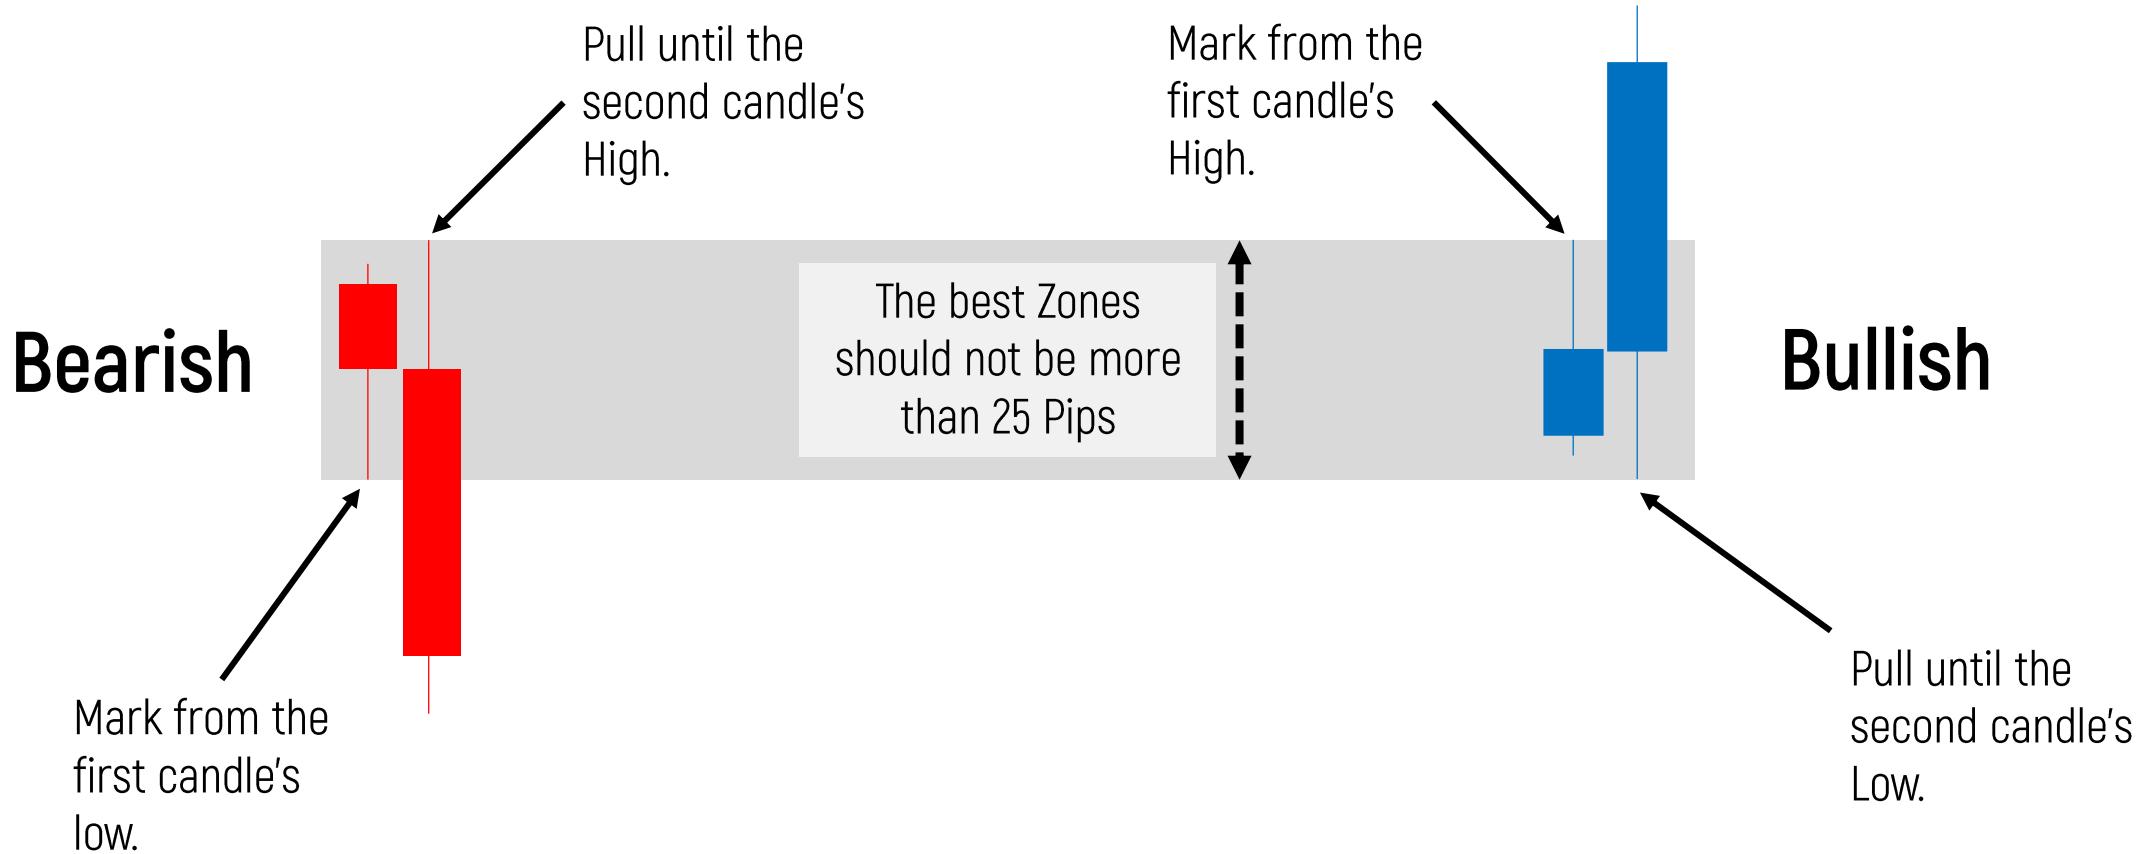

HOW TO MARK THE ZONES?

Long Wick Marking

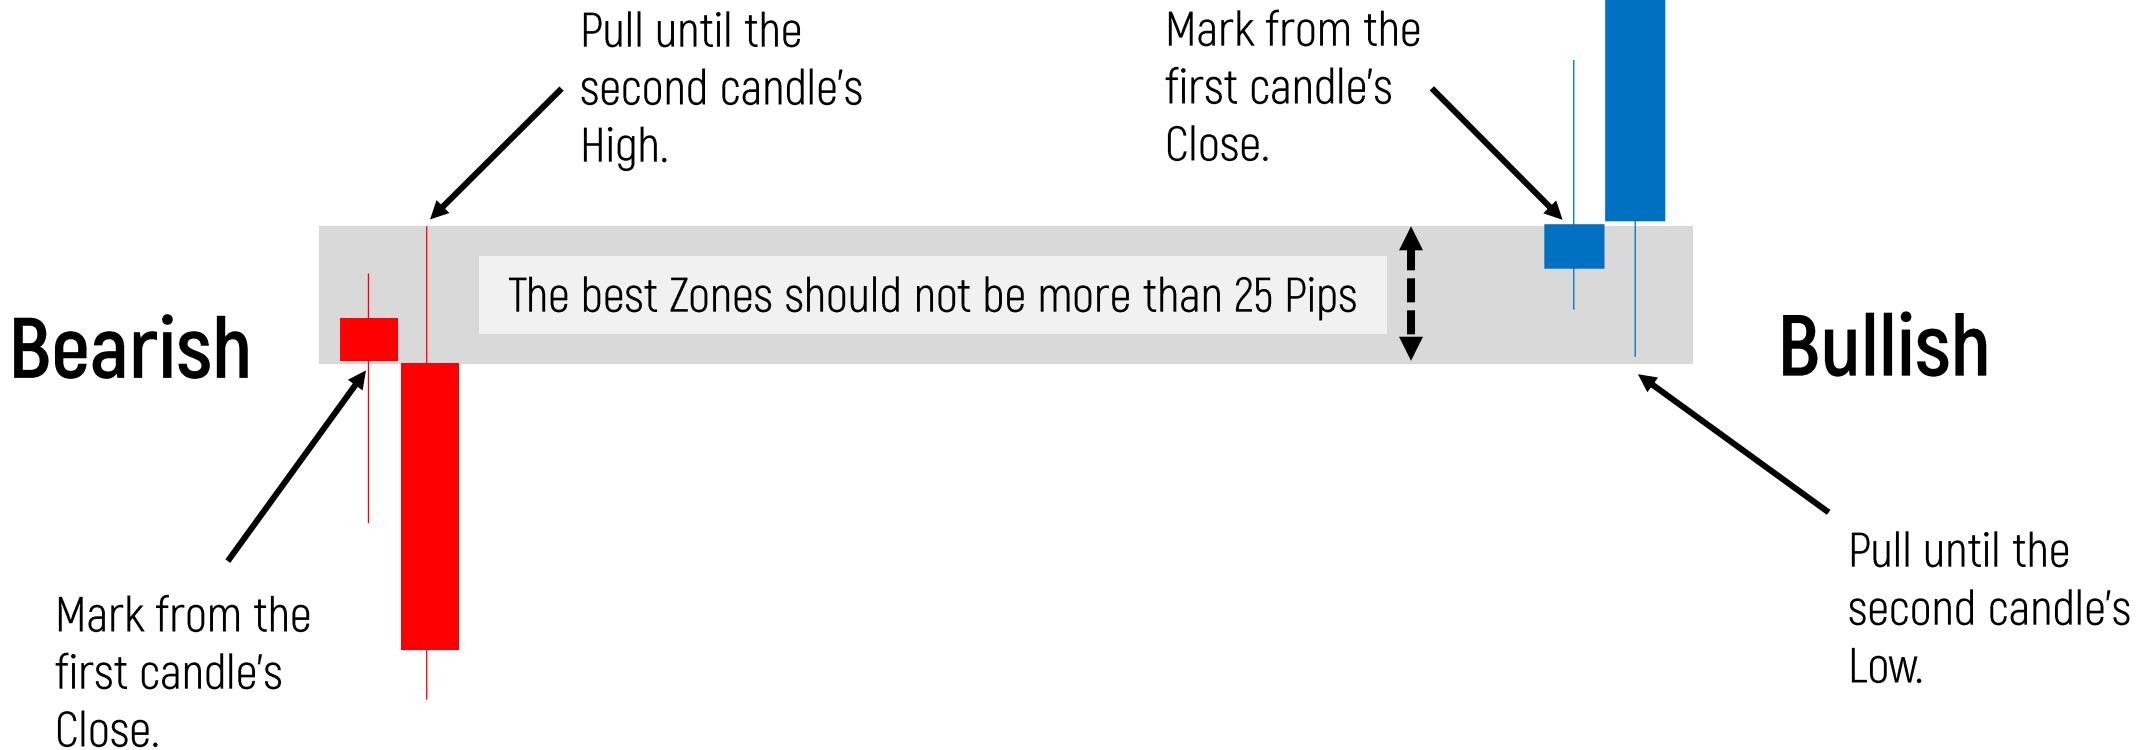

HOW TO MARK THE ZONES?

CHAPTER 4

The Setups

The Setups in This Chapter

In this Chapter, I will be discussing these things:

Quasimodo (QM)

Maximum Pain Level (MPL)

The Engulfings

PLEASE REMEMBER THIS RULE!

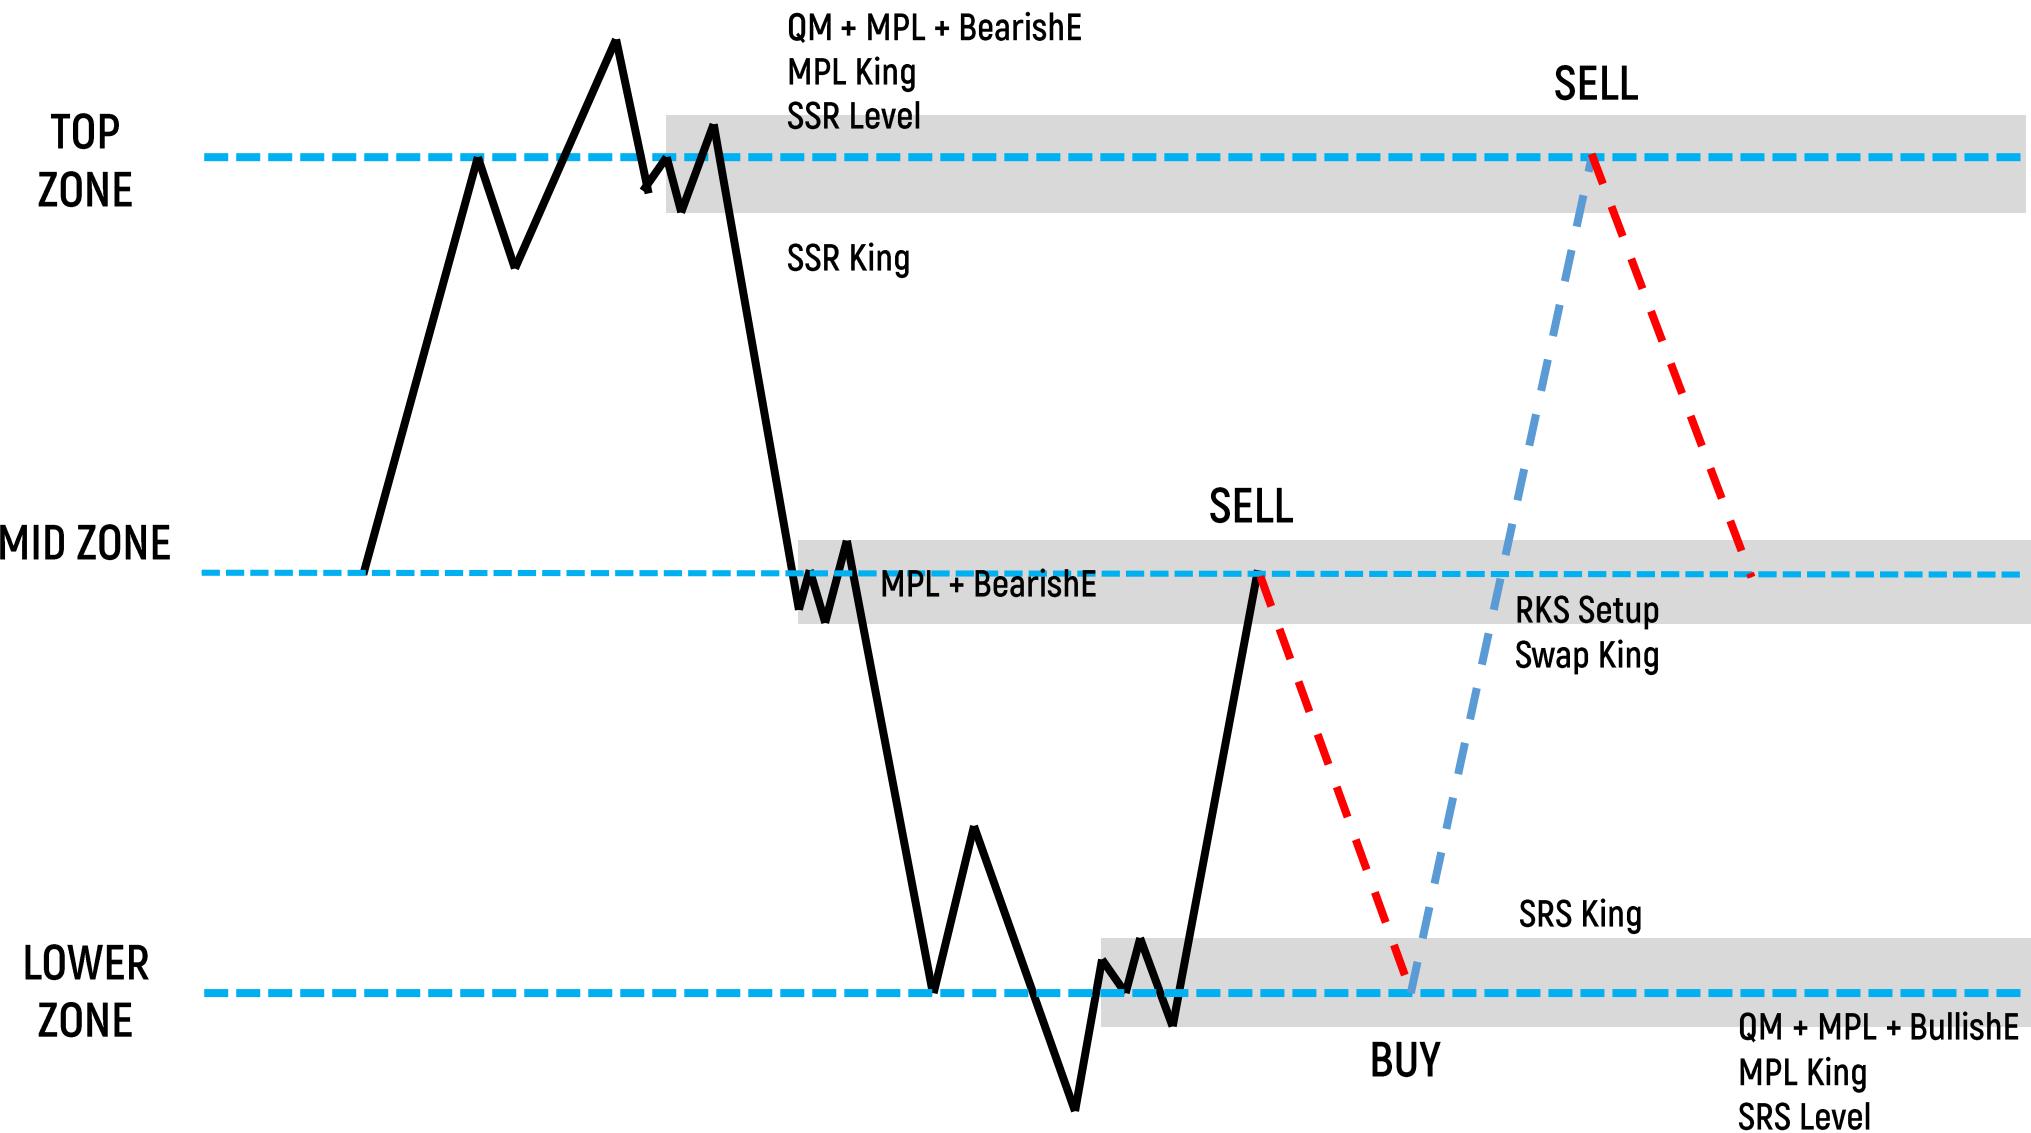

Any trade Setup taken in SND has to be a **complete setup**. We only trade a complete setup where **all clues are in place**. If this rule is void, then misjudgment is definitely apparent.

What Setups to Look for?

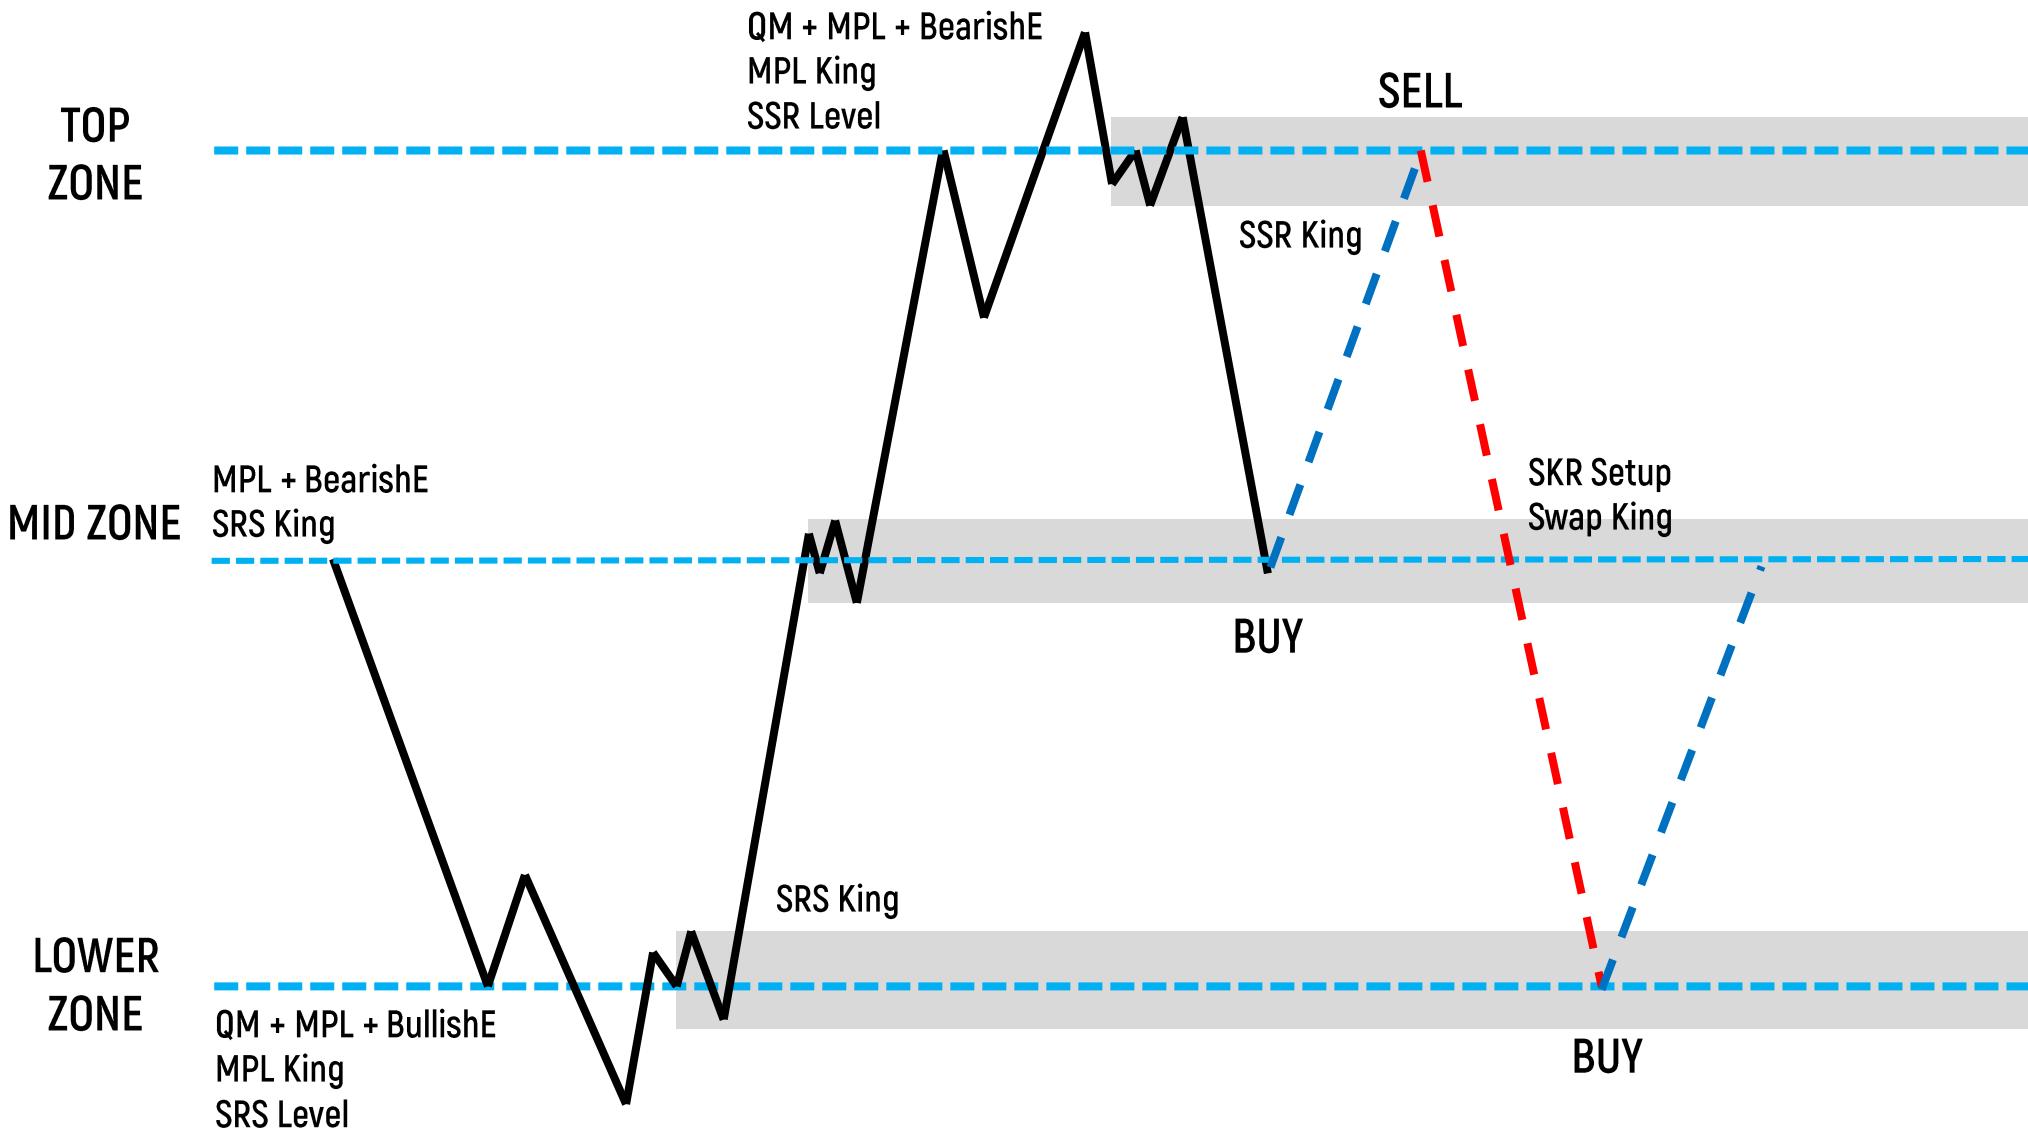

These are the setups that are prominent in every zone.

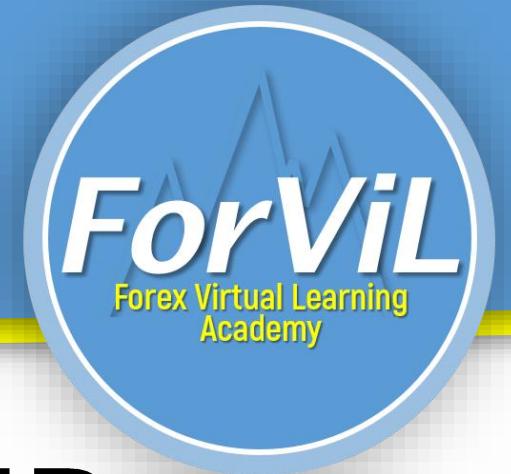

Each and every zone is unique to its setup.

THE SETUPS AT EVERY ZONE

THE SETUPS AT EVERY ZONE

THE TOP ZONE SETUP

Discussing Further on the Top Zone Setup

What is Top Zone Setup?

Top Zone Setup refers to the setups that happen only on Top Zones. The most prominent Setup would be QM + MPL + Bearish Engulfing. In this chapter, I would specialize on discussing the QM + MPL + Bearish Engulfing Setup.

THE QM 101

Understanding the Things Behind QM

Introduction to Quasimodo

The Quasimodo or QM is the first and foremost setup to learn and a must-know for every SND trader. This setup would entail other related setup in Supply and Demand method.

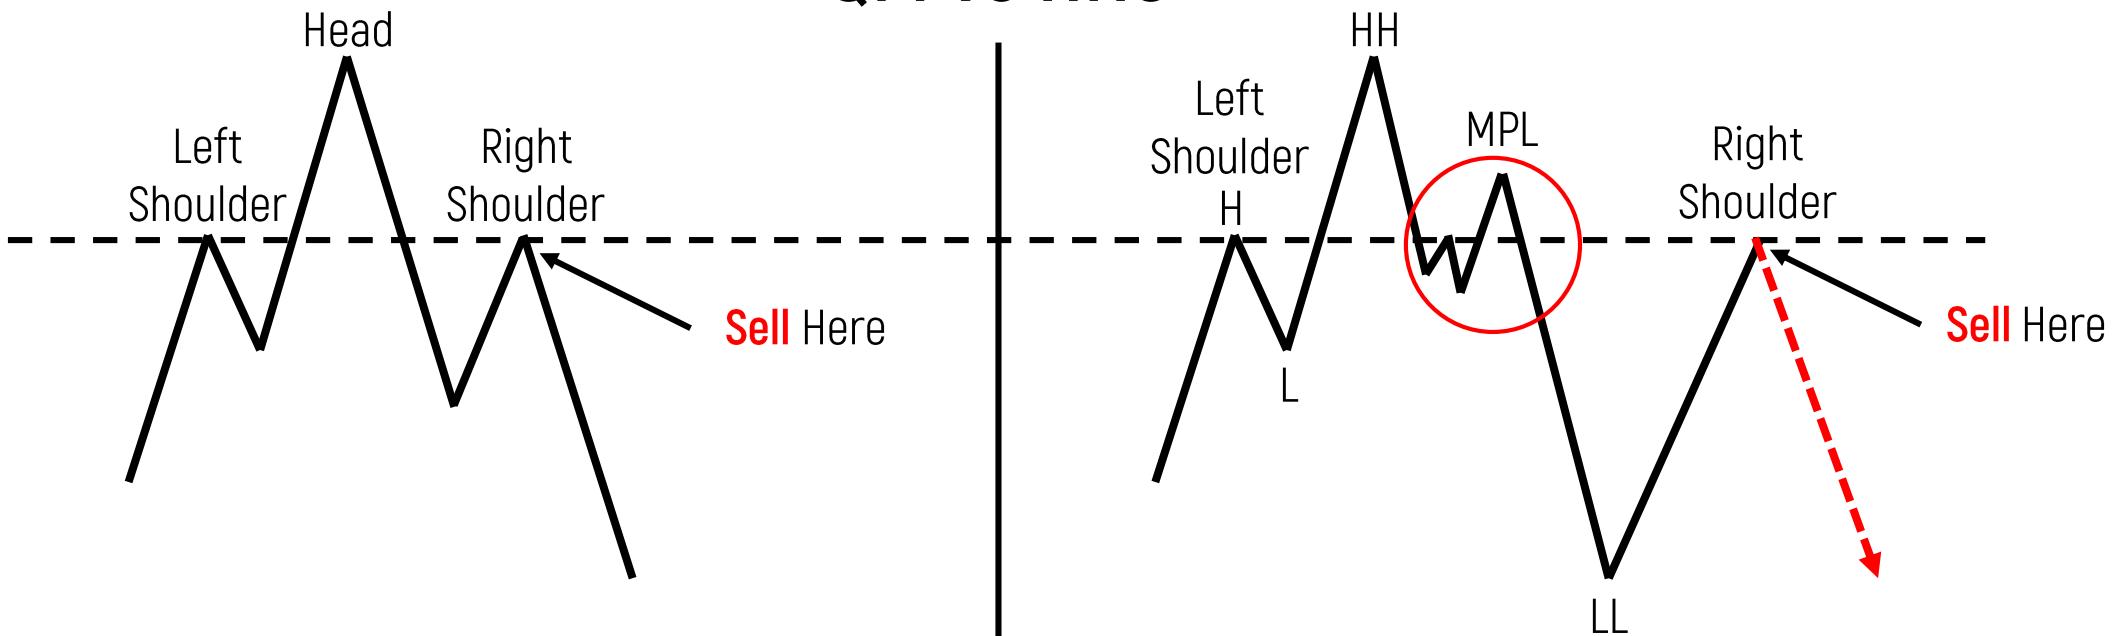

Let's begin!

Is QM Head and Shoulder (HNS)?

The QM has the shape of HNS alike, but it is not HNS to be exact. In fact, it is totally a different setup altogether. Let's see the difference closely.

INTRODUCTION TO QUASIMODO

QM vs HNS

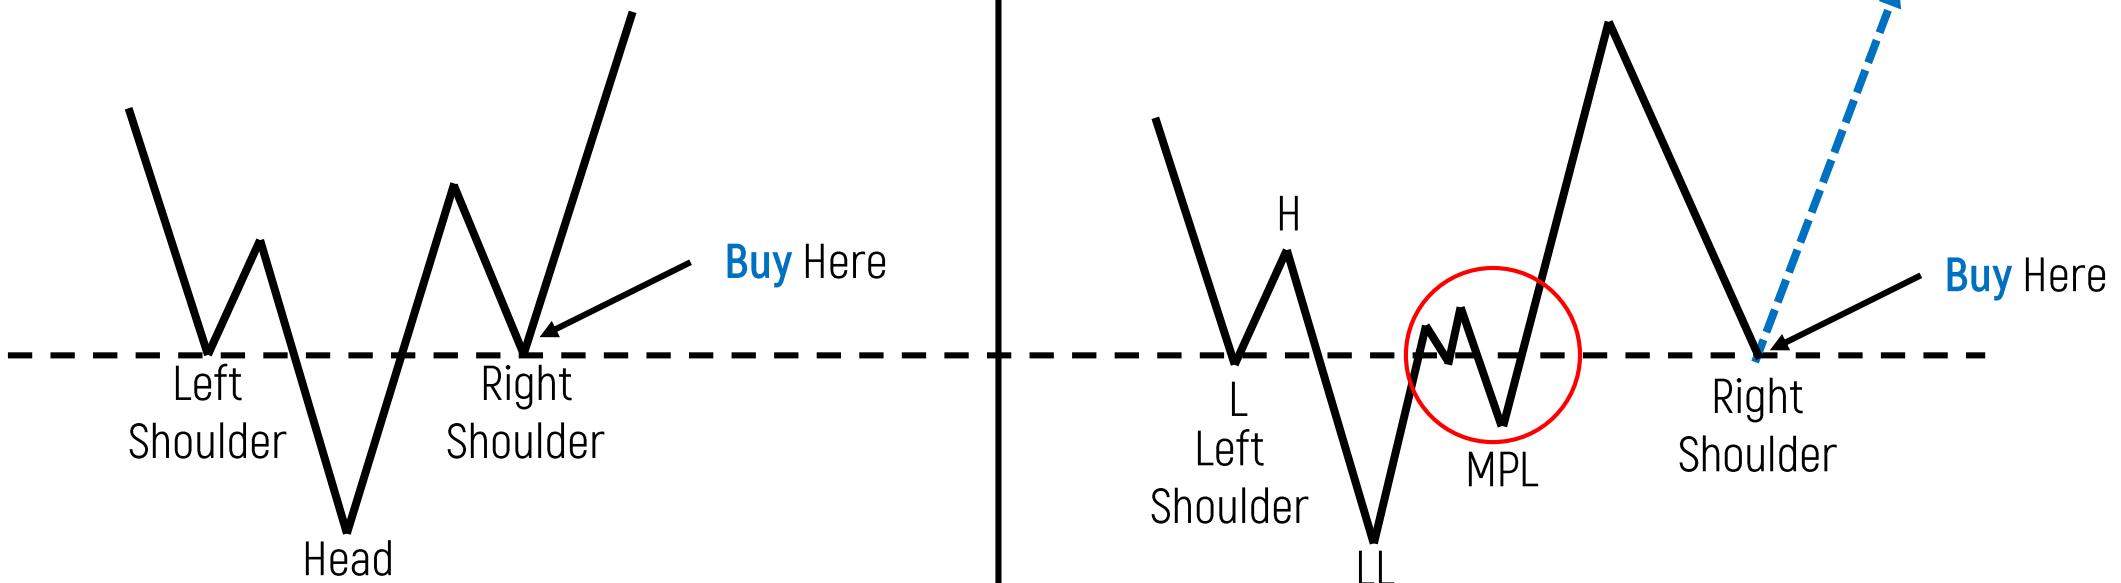

Head and Shoulder in general. It has left shoulder, head and right shoulder. This is more to chart pattern and can appear everywhere in across the chart.

QM on the other hand, is a complex pattern that appear **only during trend reversal**. Notice the formation of High (H), Low (L), Higher High (HH) and Lower Low (LL).

One unique thing that differs QM from HNS is the MPL (in circle). It appears in between the HH and LL. We SELL at the QM line when the price come back.

INTRODUCTION TO QUASIMODO

QM vs HNS

Same goes to the BUY Head and Shoulder. This is how it looks like in general.

QM on the other hand, is a complex pattern that appear **only during trend reversal**. Notice the formation of Low (L), High (H), Lower Low (LL) and Higher High (HH).

This one is the QM for BUY setup. We BUY at the QM line when the price come back.

The QM Anatomy

A complete QM may contain these things:

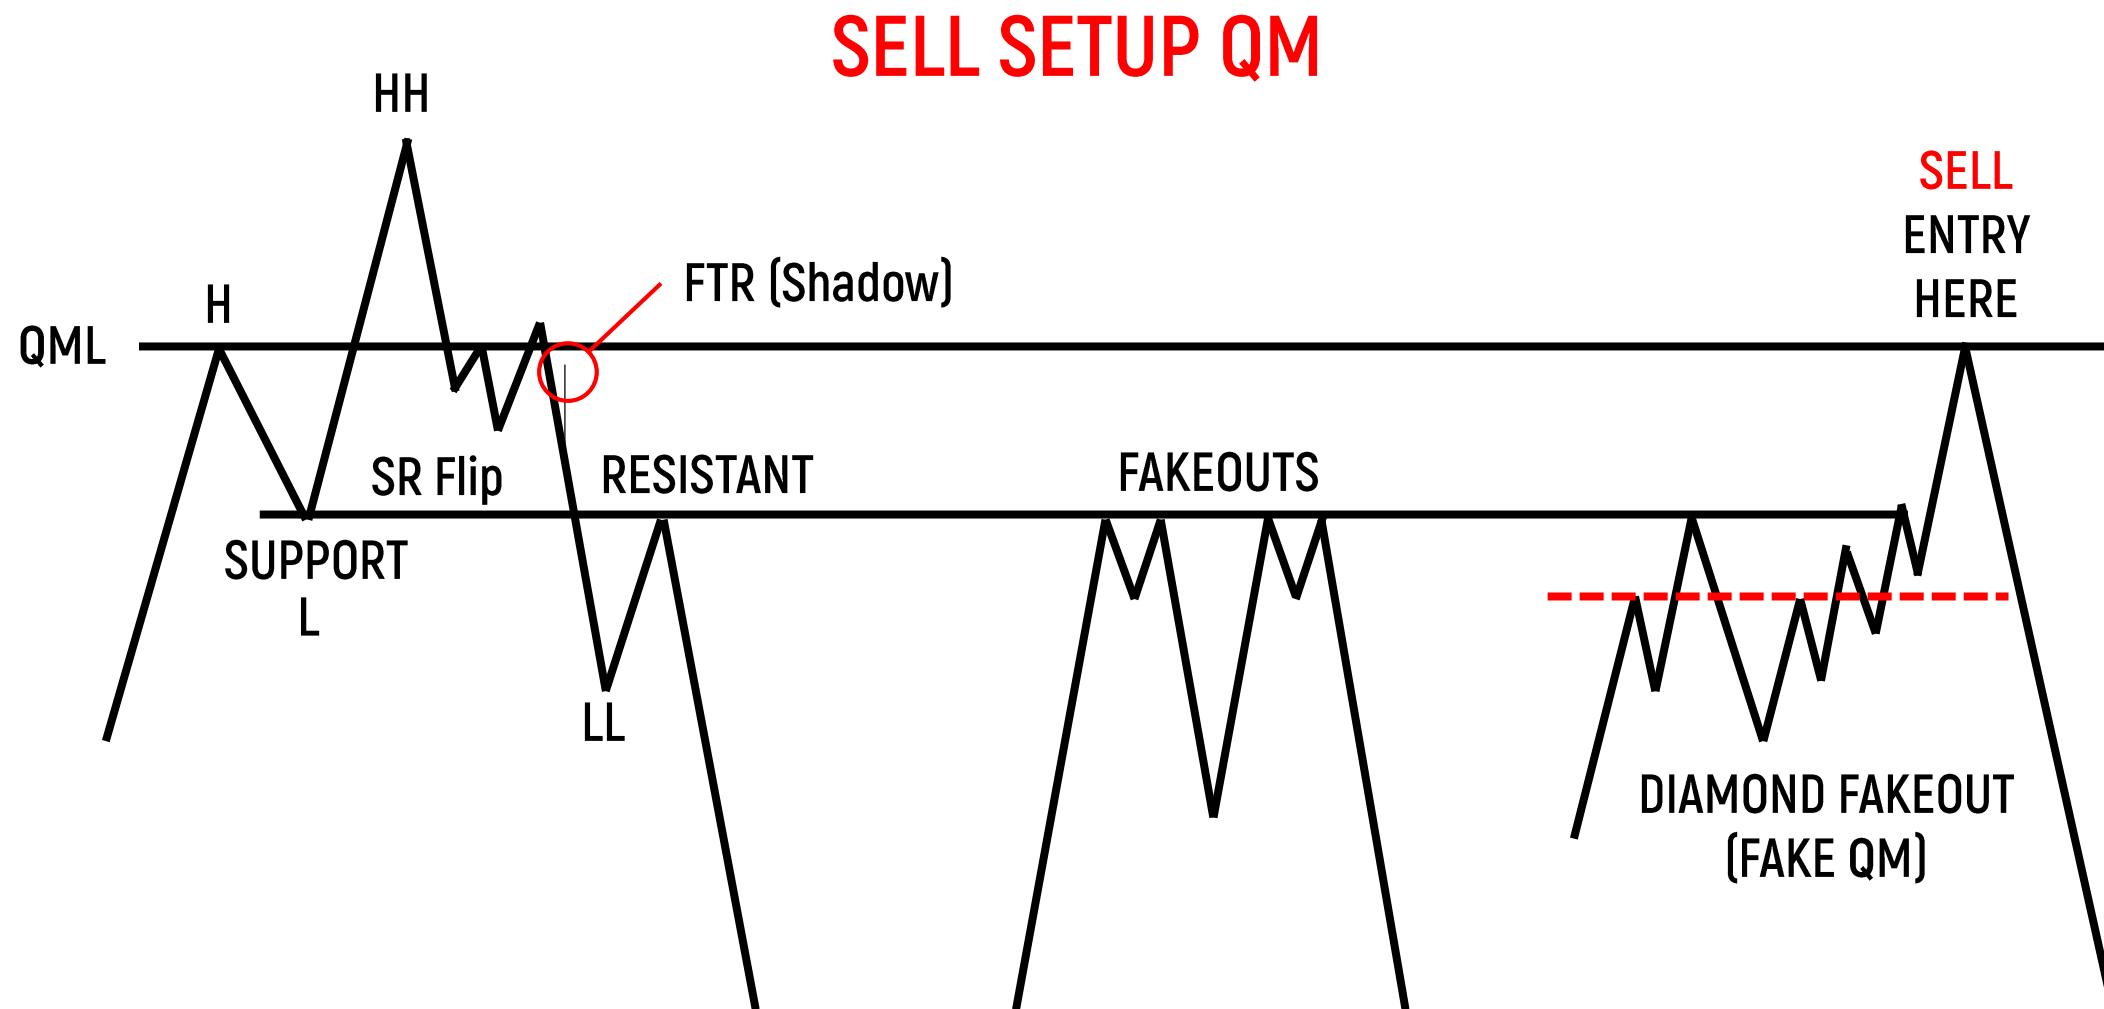

QM (H, L, HH, MPL, LL)

SR Flip

Fail to Return (FTR)

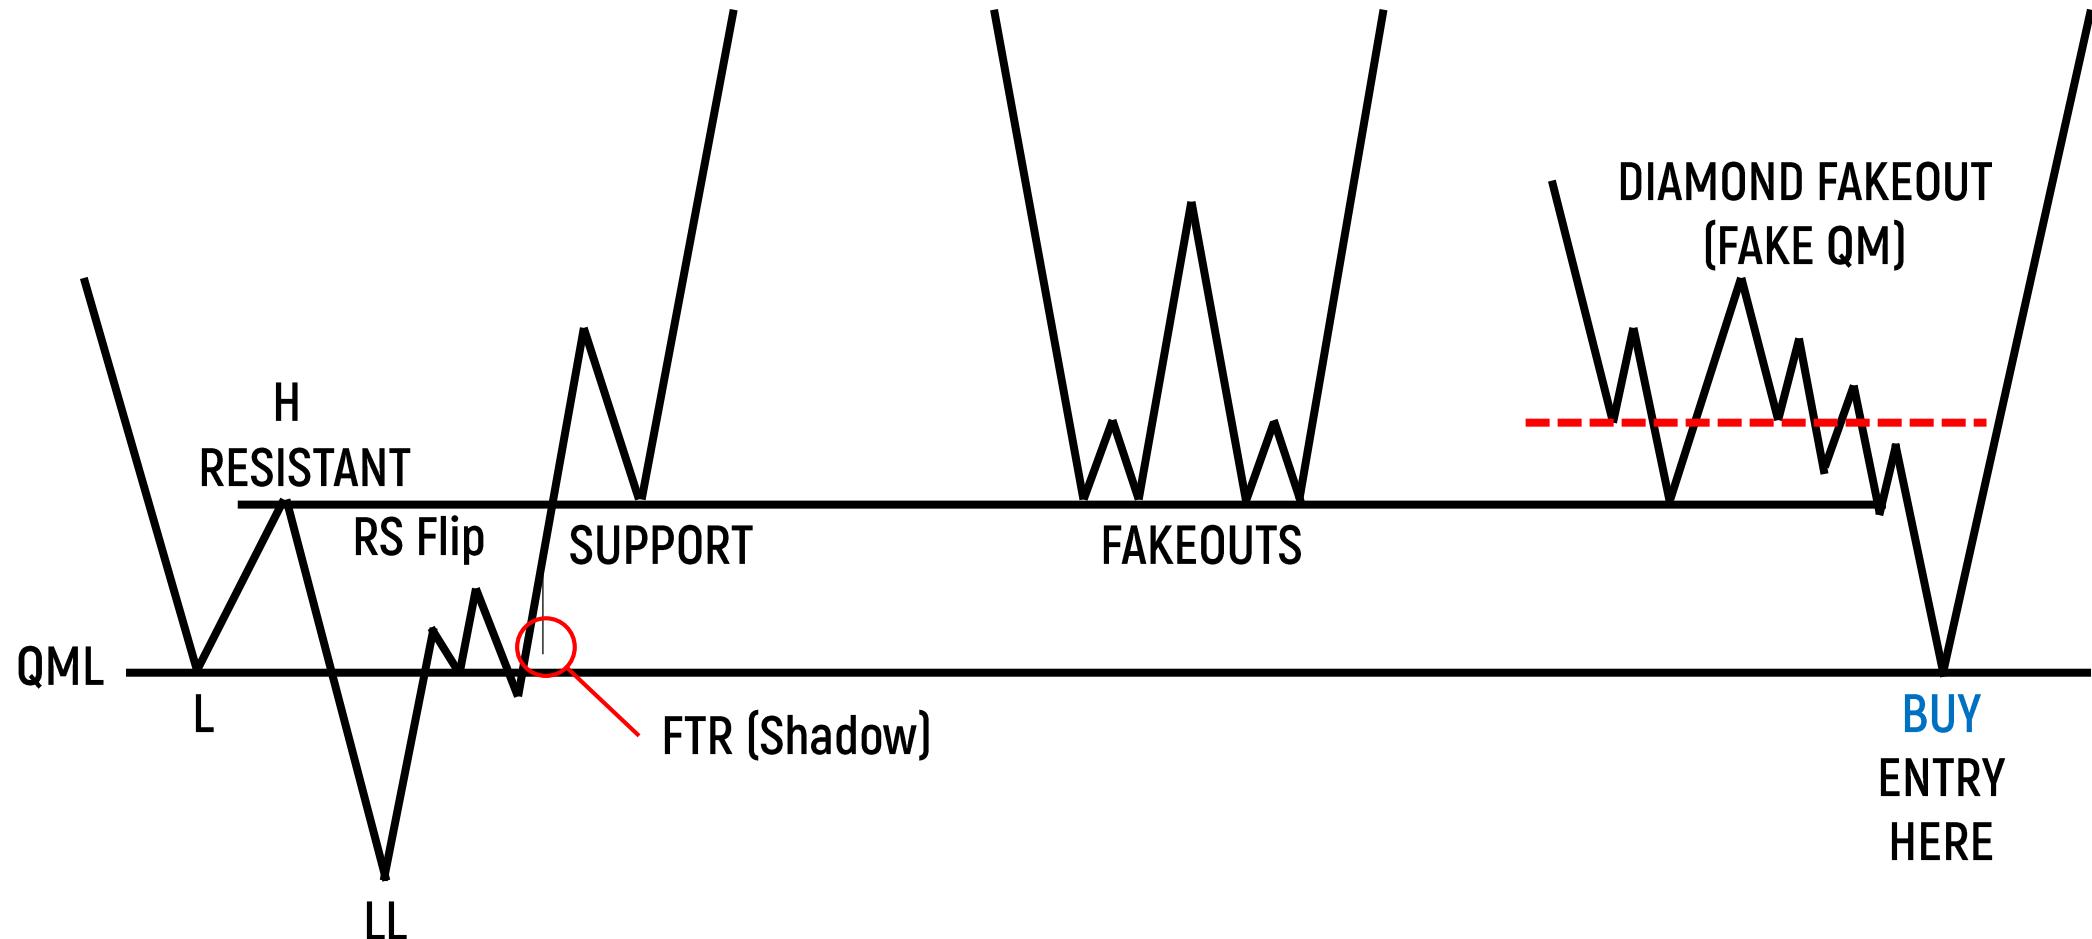

Fakeouts

THE QM ANATOMY

THE QM ANATOMY

BUY SETUP QM

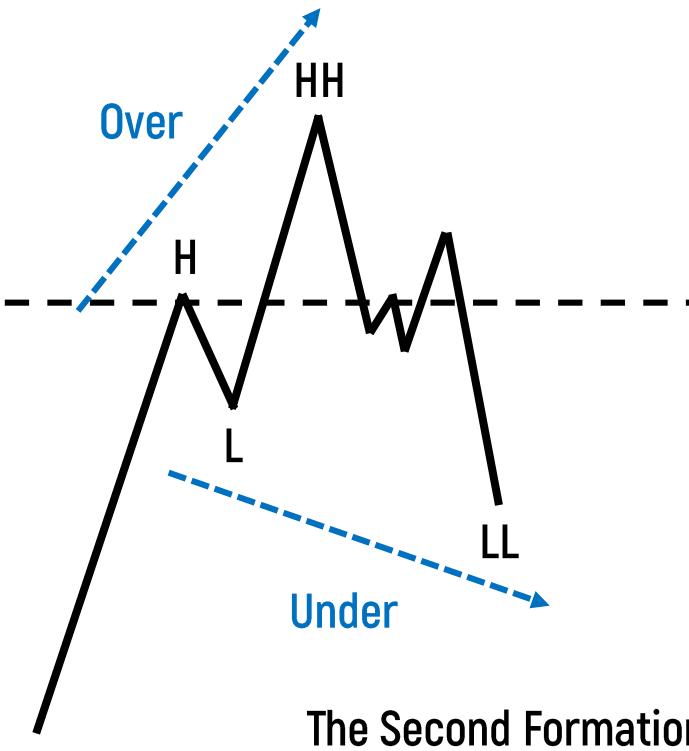

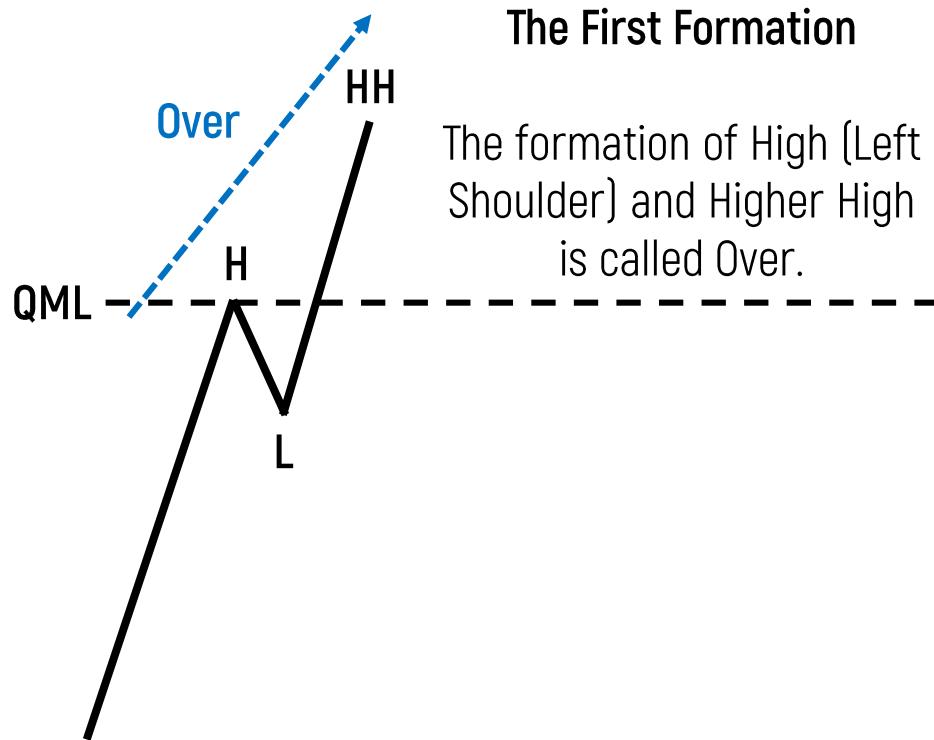

THE QM IN DEPTH

Understanding a Complete QM

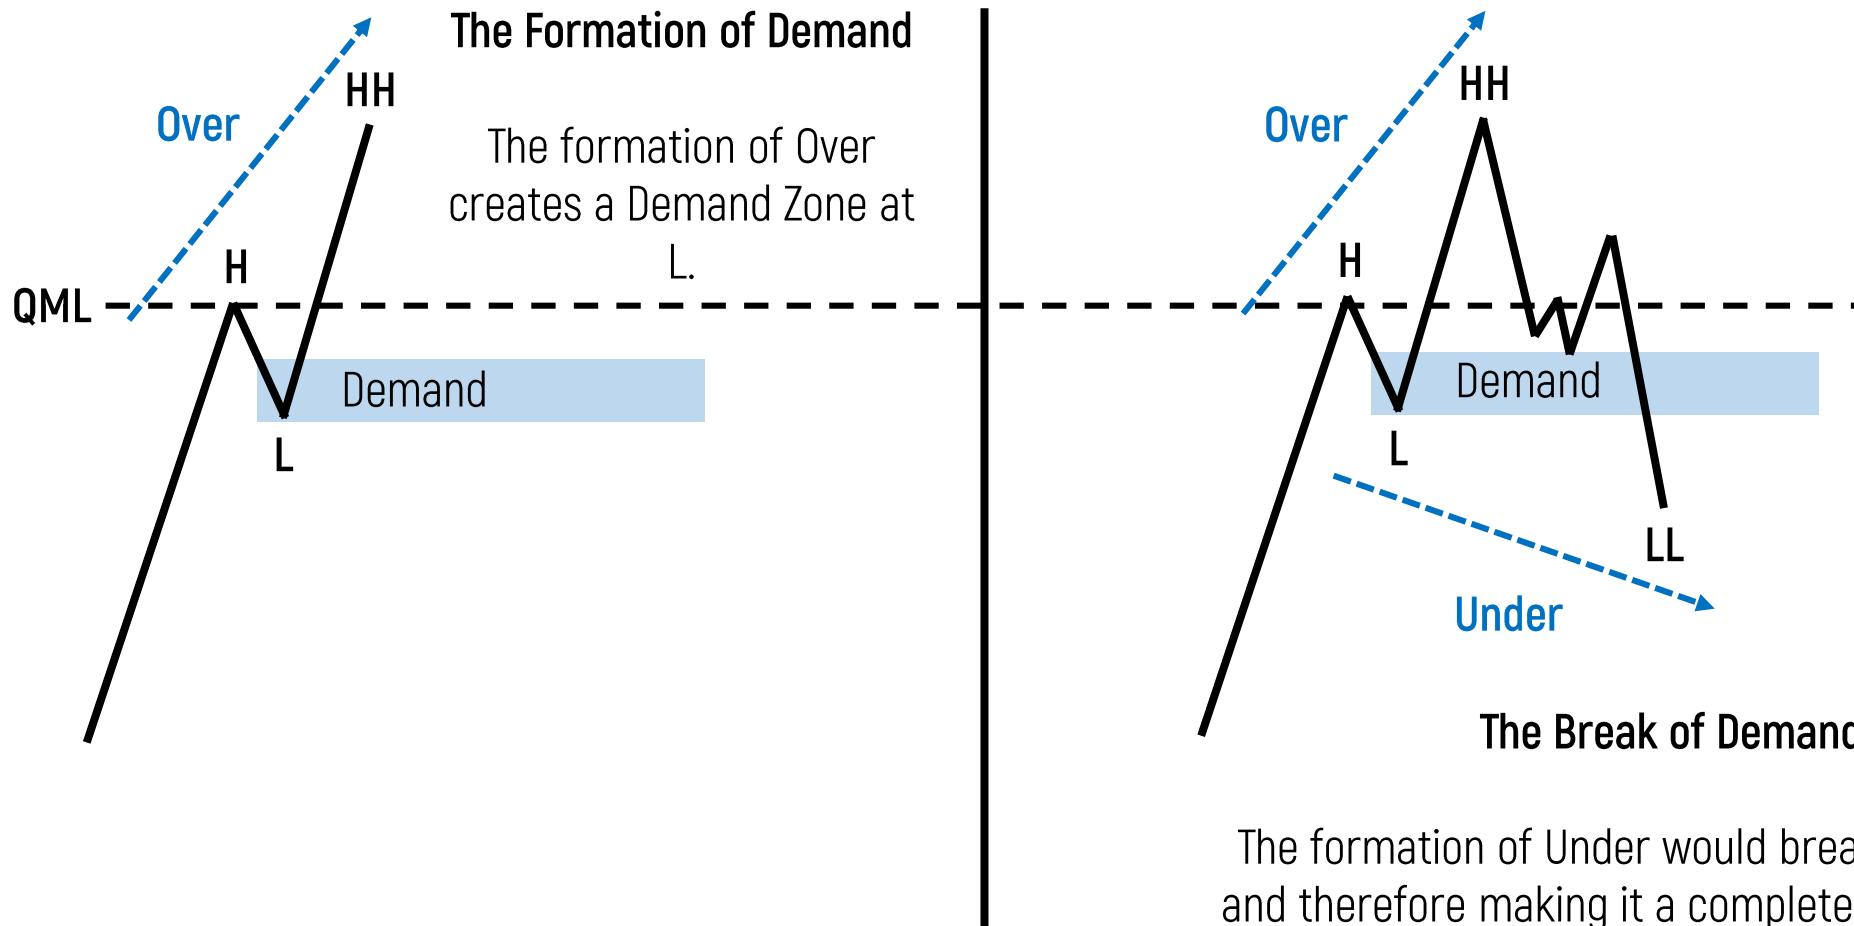

QM: Over and Under

Understand the concept of Over and Under in the QM formation. When there is Over and Under, that means the QM is a complete QM.

THE FORMATION OF QM

DEMAND BREAK/ENGULFED

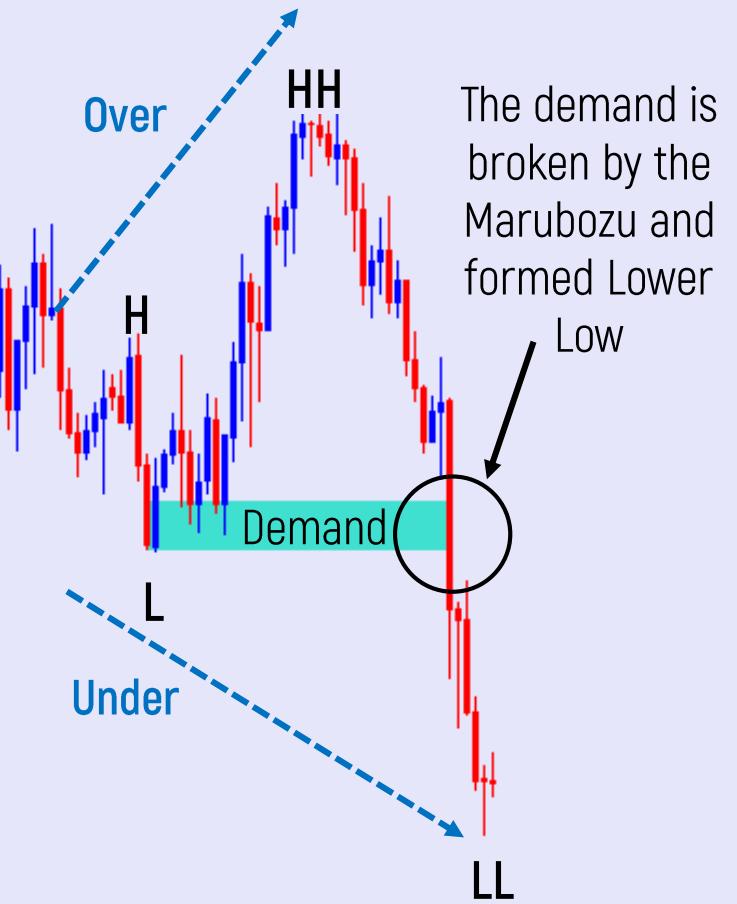

Over and Under in Real Chart

Let's see how the Over and Under is formed in the real chart.

BEFORE:
PRE QM

AFTER:
COMPLETE QM

THE MPL 101

Getting Yourself Clear About Maximum Pain Level
(MPL)

WHAT TO LOOK FOR IN A QM?

Look for the MPL

What's important is to look for MPL because this is where the decision point will always be.

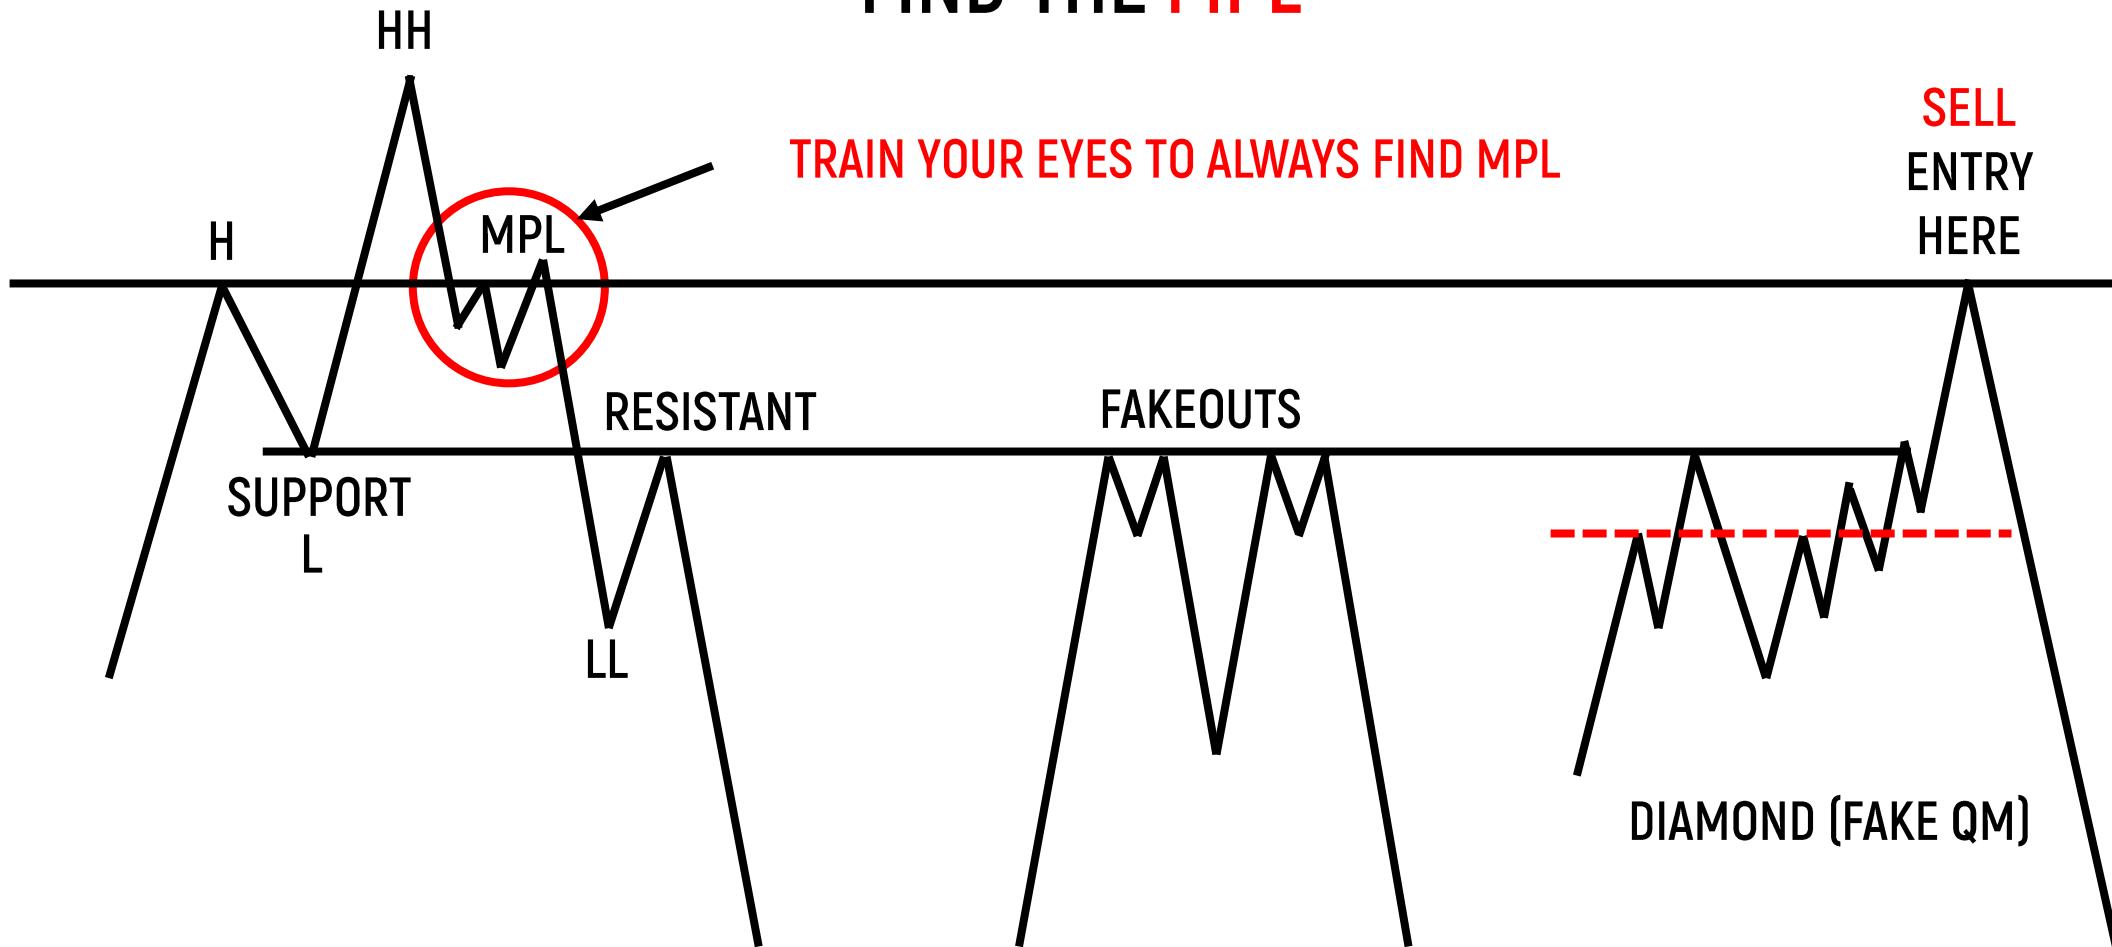

How to recognize MPL?

First, it is at the same line or; if it is not at the same line, it is just nearby around the QML (it could be up or down a little bit).

Secondly, there is a first breakout at the MPL support/resistant. When you find this first breakout, that is the MPL.

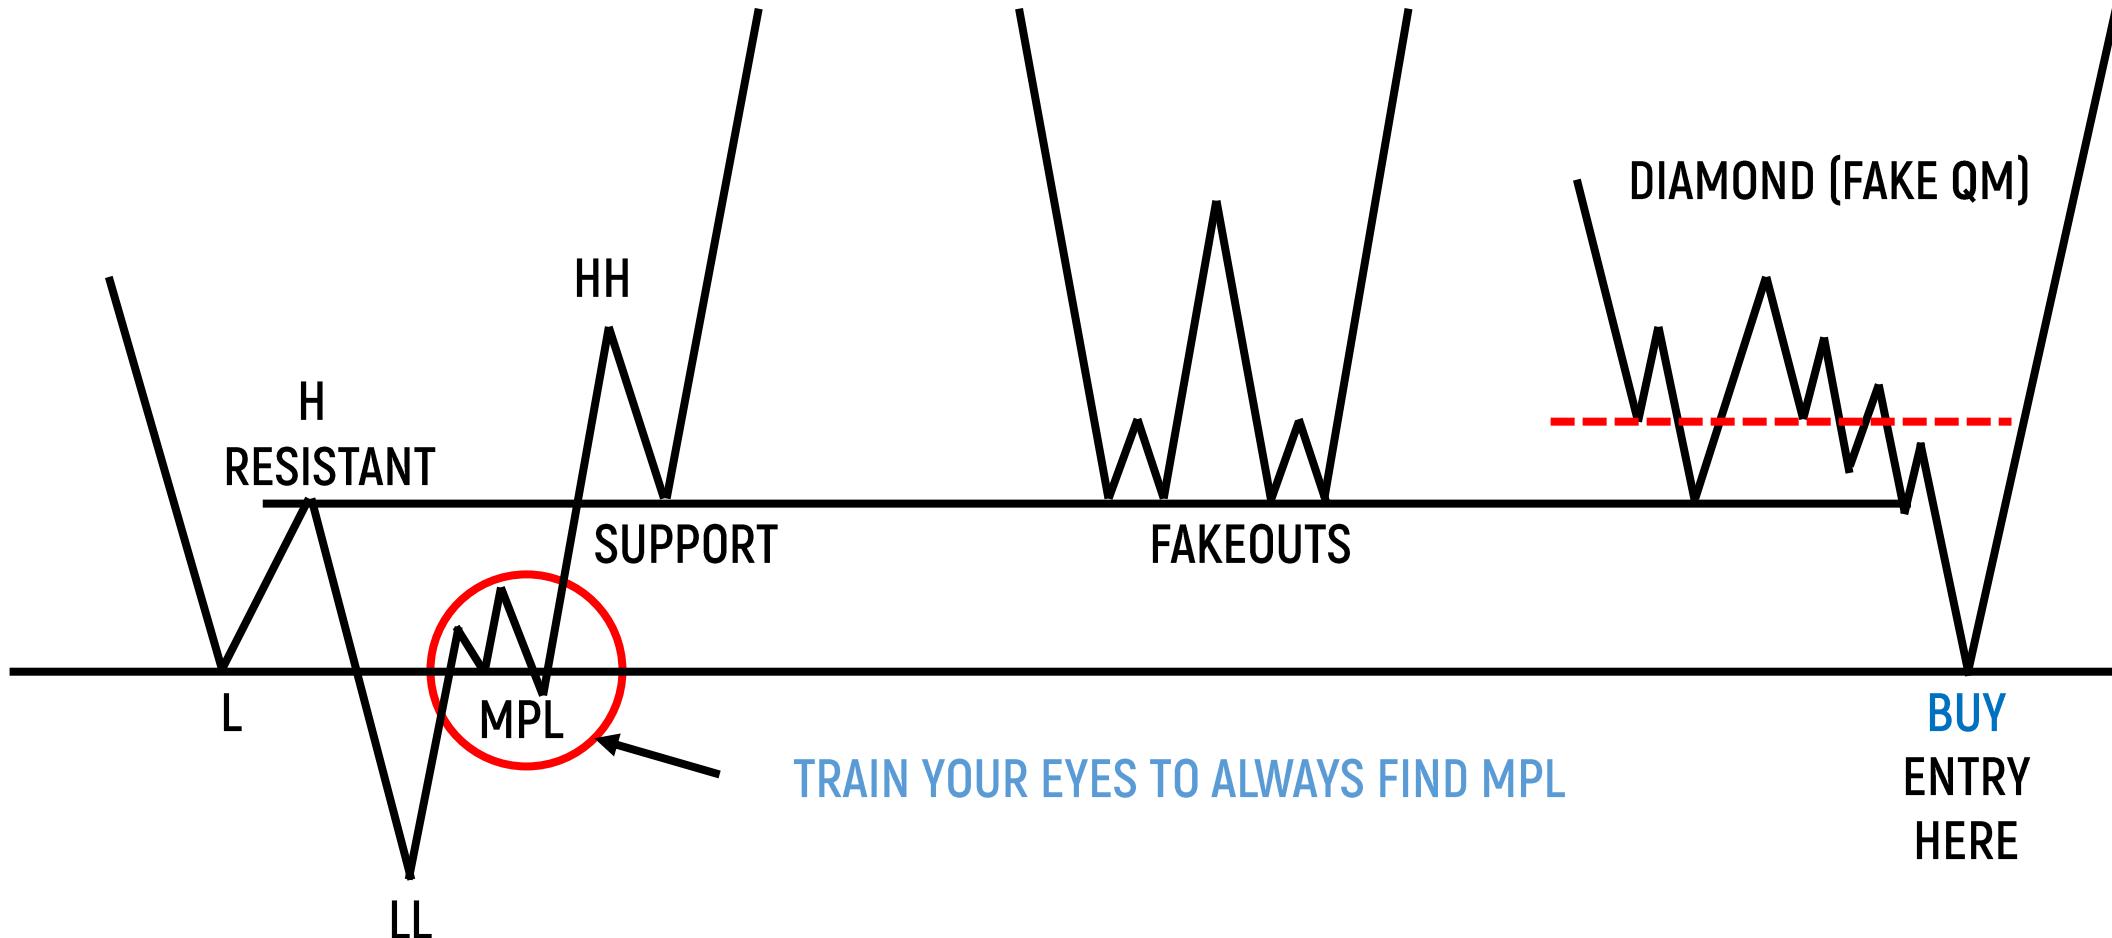

THE MPL 101

FIND THE MPL

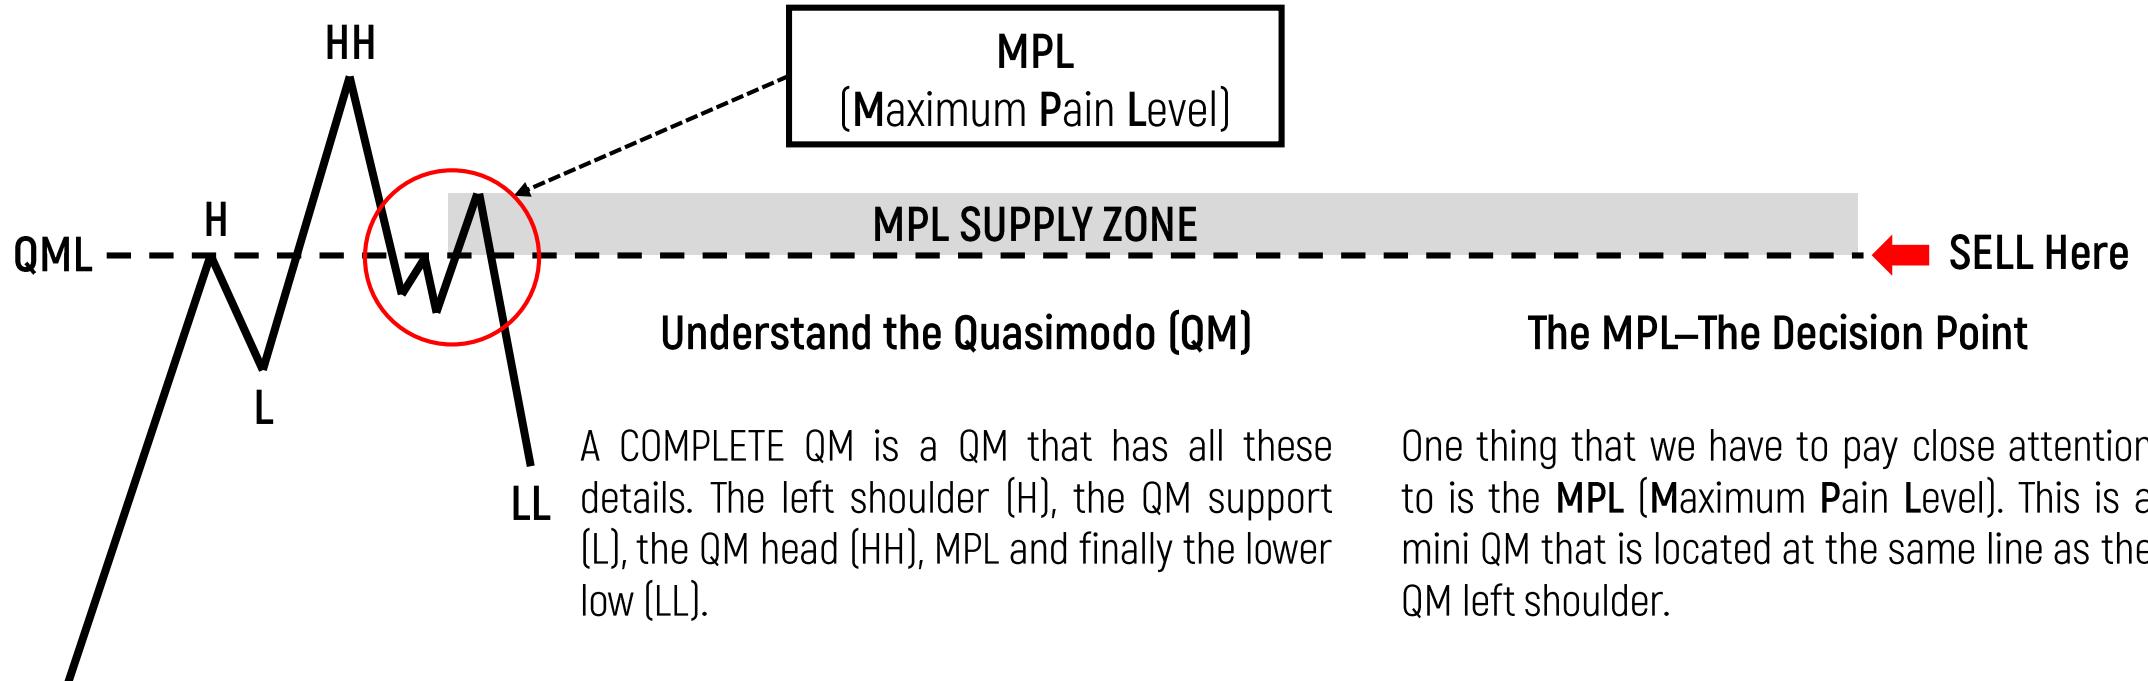

THE MPL 101

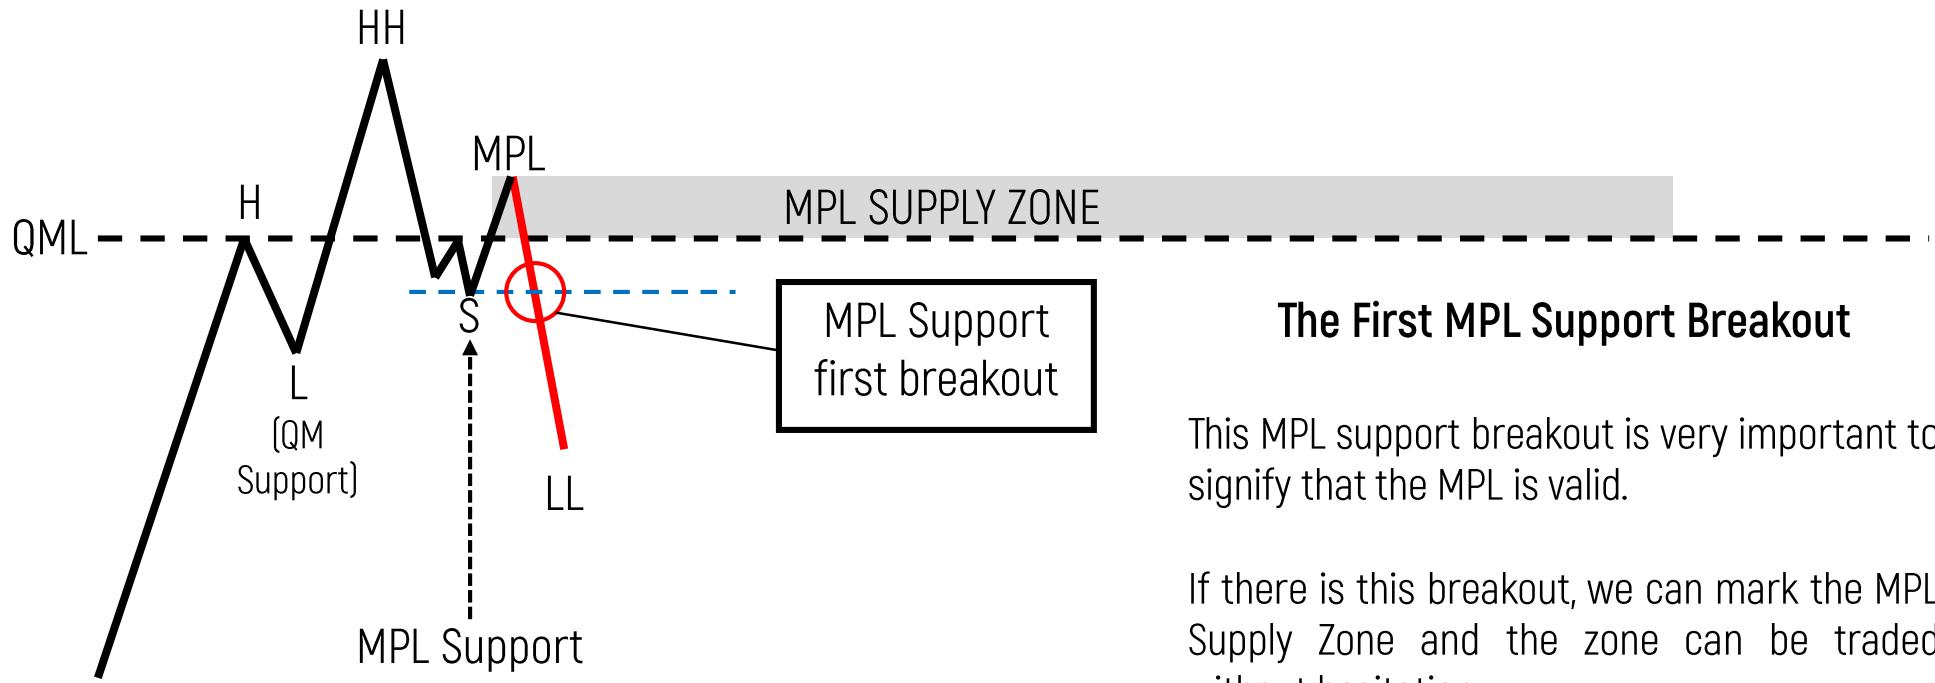

FIND THE **MPL**

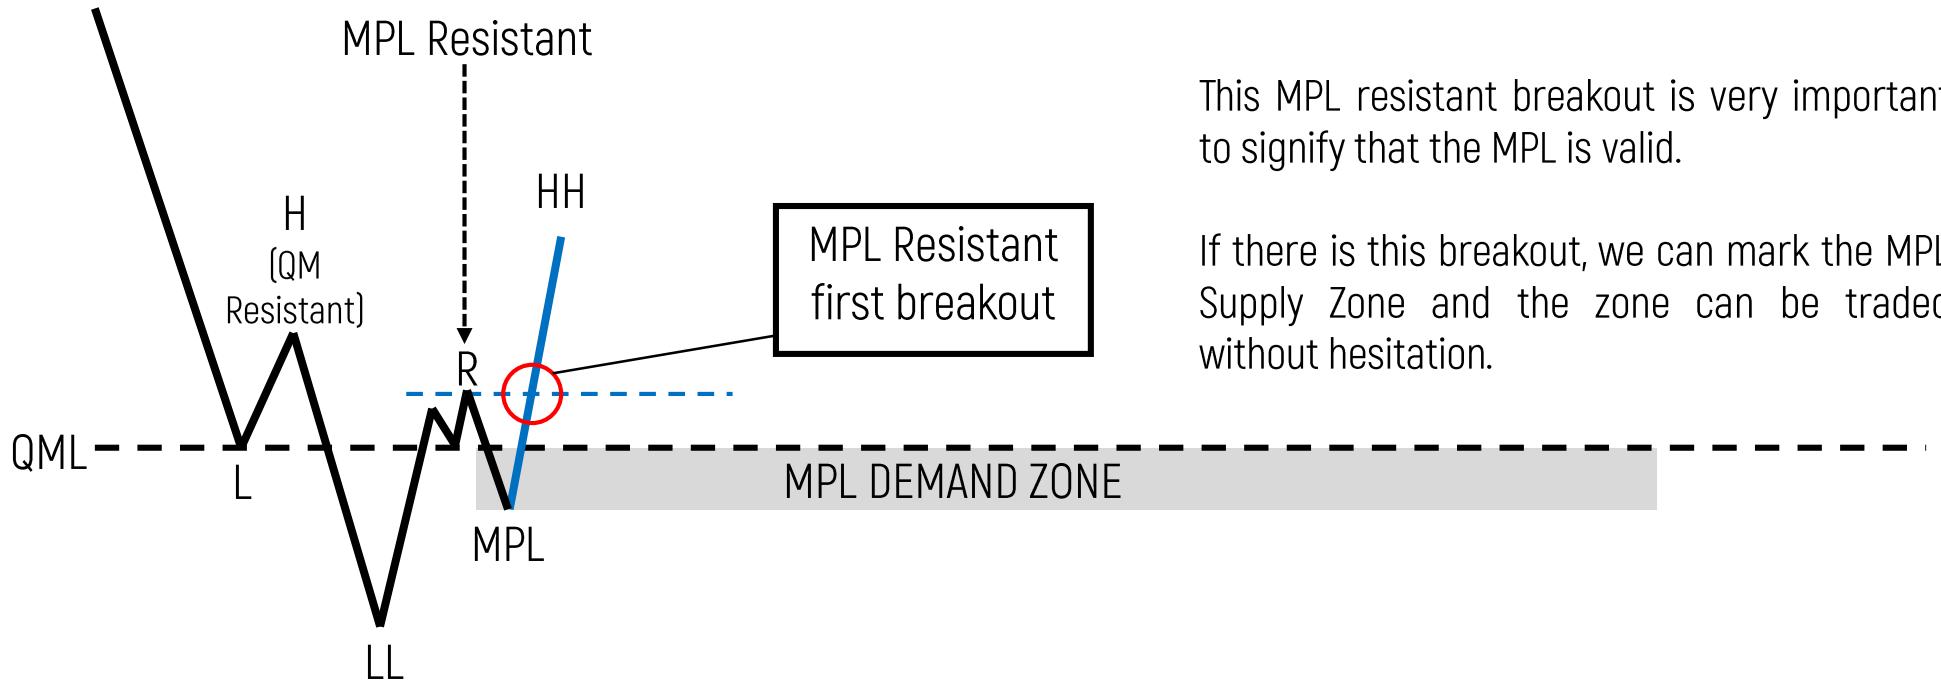

A CLOSER LOOK OF THE MPL

FIND THE FIRST BREAKOUT

FIND THE FIRST BREAKOUT

THE FIRST BREAKOUT IS THE ENGULFING

Look for the Engulfing.

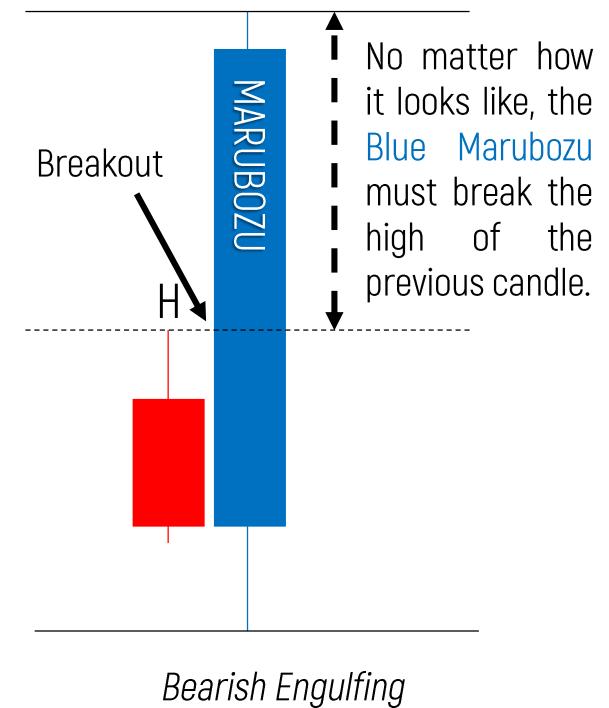

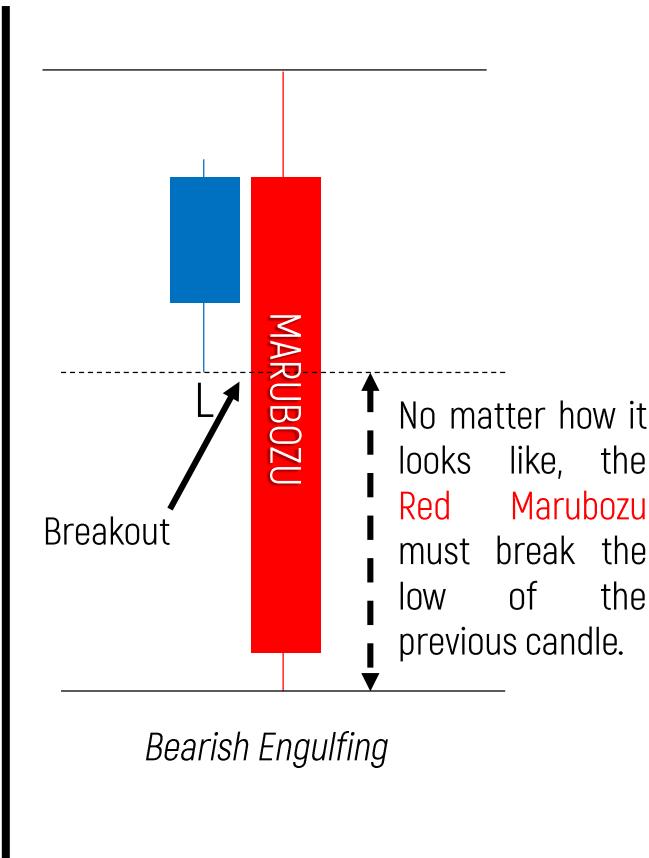

Engulfing is a set of side by side candle that is located exactly at this MPL.

How to recognize Engulfing?

Very easy. The first candle is a small candle and it can be either blue or red. The second candle is the Marubozu Candle. This second candle closes below or above the first candle.

What is Marubozu?

Marubozu is a big long candle. No matter blue or red, if it is a big, long candle then we call it Marubozu.

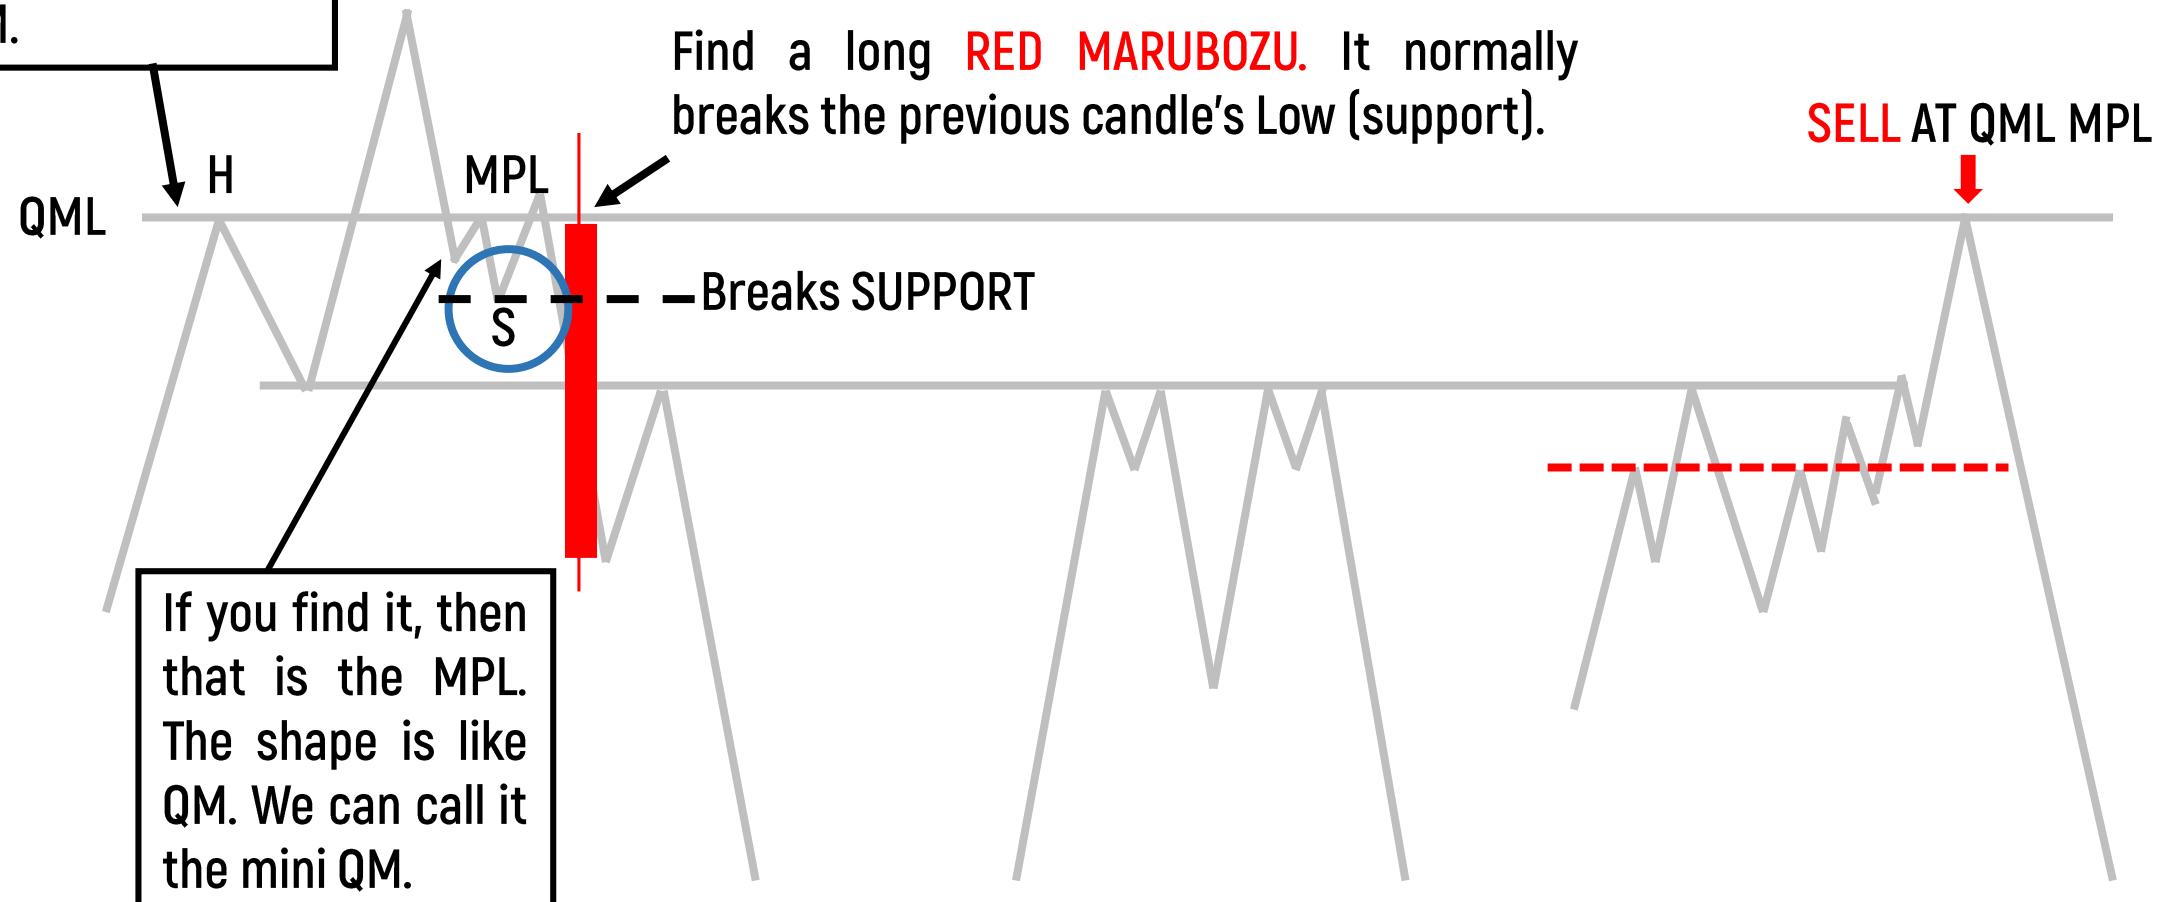

How do You Find the MPL to **SELL?**

Try to trace back on a sudden drop that causes a big move down.
Then look for the Marubozu that breaks the previous candle's Low

Remember, the MPL is also on the same line as the QM.

HOW TO FIND THE MPL?

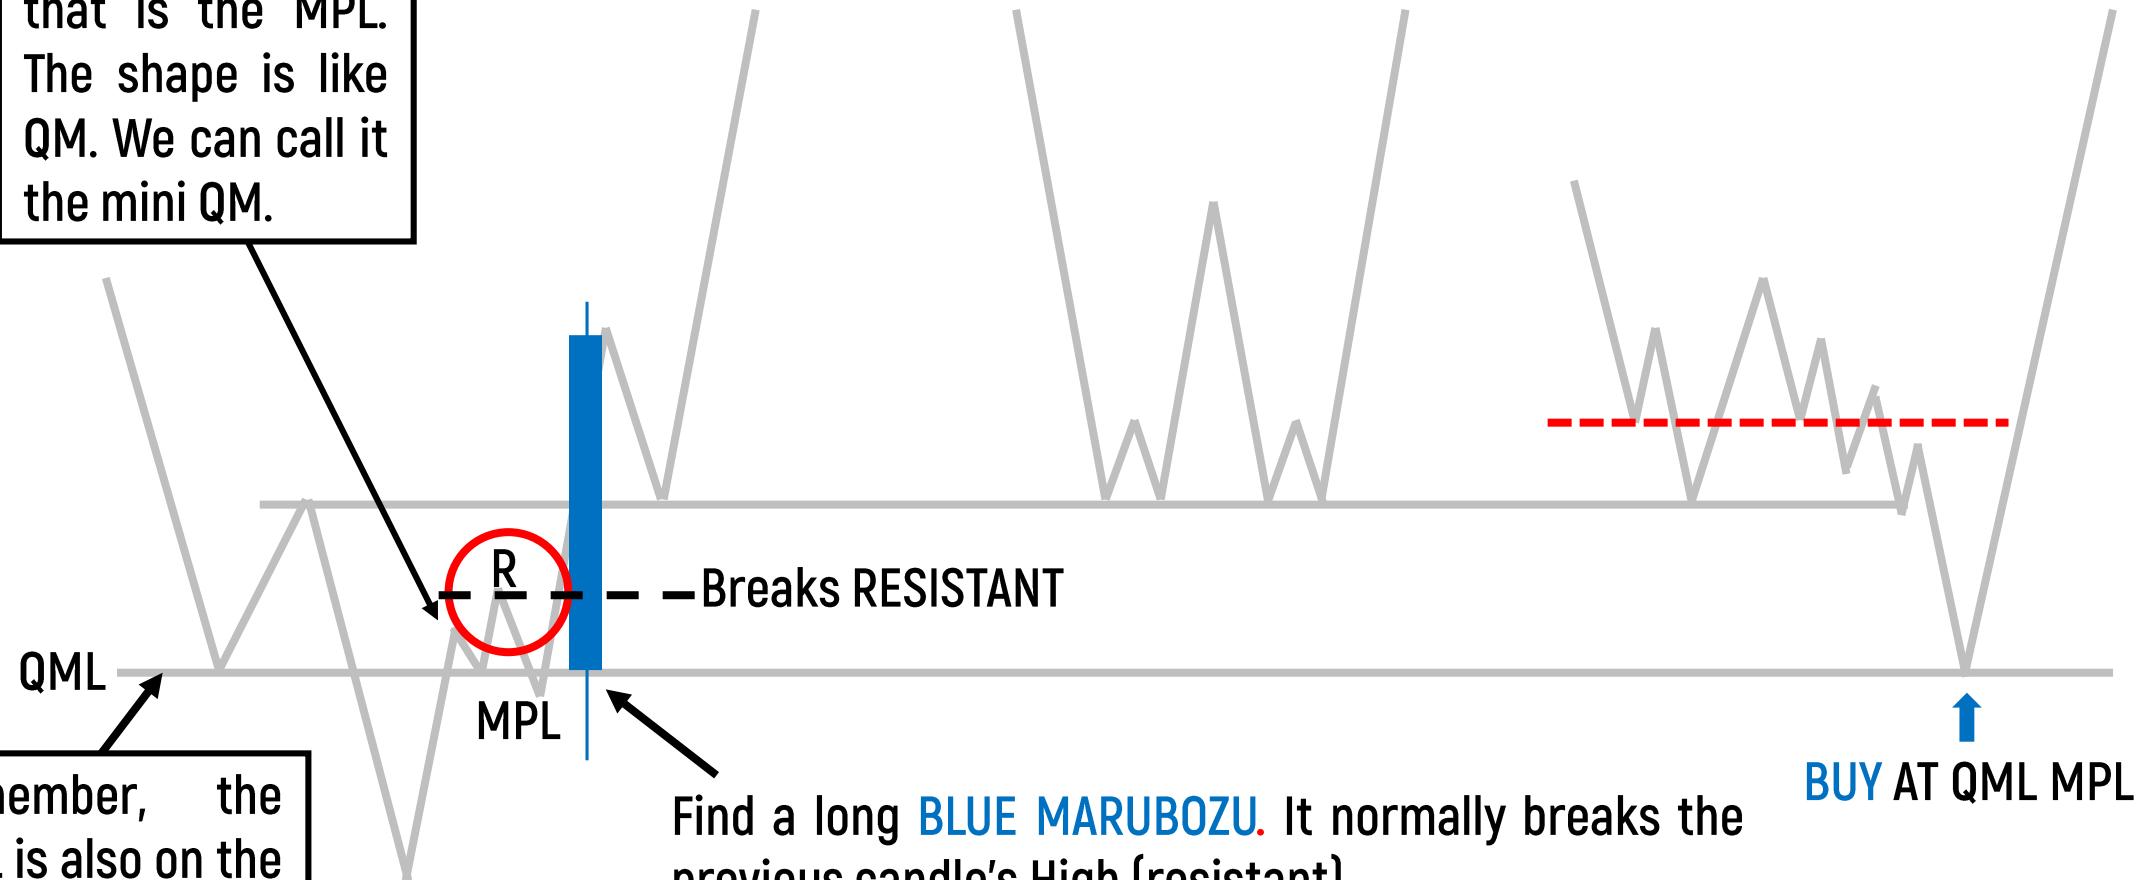

How do You Find the MPL to **BUY**?

Try to trace back on a sudden rally that causes a big move up.
Then look for the Marubozu that breaks the previous candle's High.

HOW TO FIND THE MPL?

If you find it, then that is the MPL. The shape is like QM. We can call it the mini QM.

Remember, the MPL is also on the same line as the QM.

Why bother about MPL?

90% of traders failed in their trade because they do not know about MPL. MPL is the origin of the liquidity where Big Banks and the Market Movers put their hidden order.

Ever wonder why there are sudden move after this MPL? It is because the liquidity is located at this MPL. When the price come back, they are taking the remaining order at this area and make another big move again.

THE ENGULFING 101

Knowing the Varieties of Engulfing

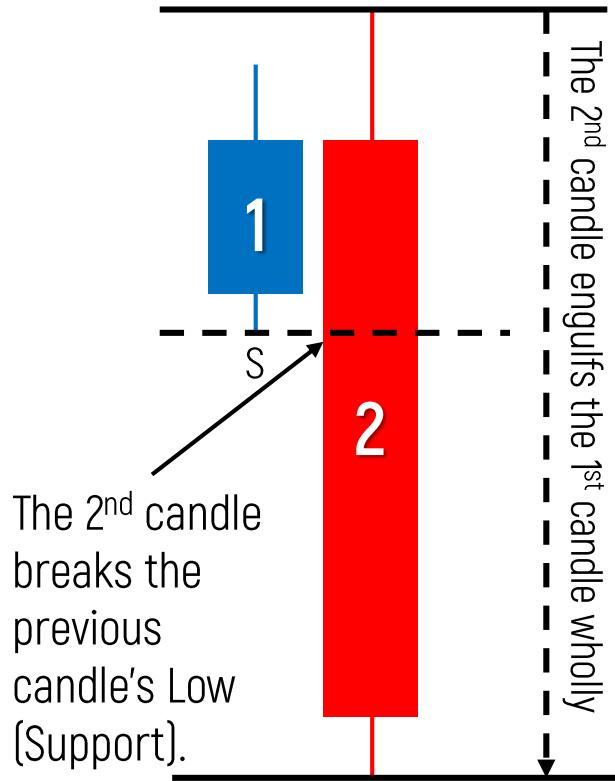

The Engulfing

What is Engulfing?

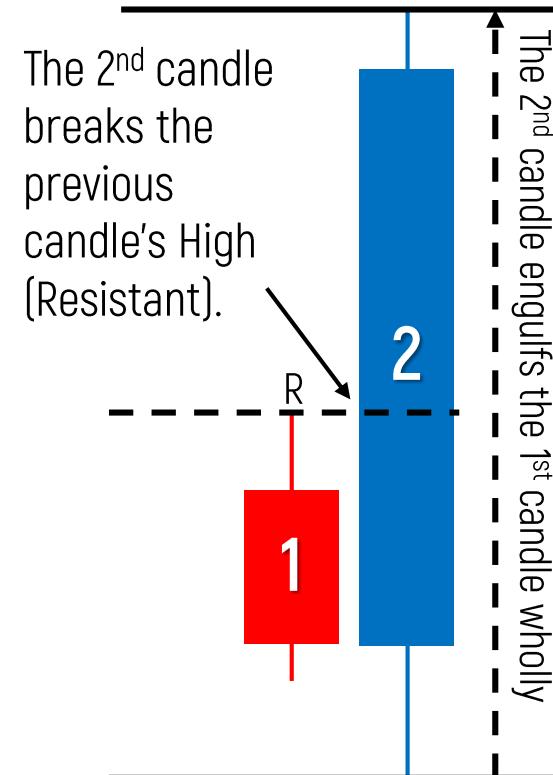

Engulfing is referred to a set of candle side by side. The first candle is the small candle and the second one is the big Marubozu candle that engulfs the first one.

THE ENGULFING SETUP

Bearish Engulfing

Bullish Engulfing

*The BIG candle is called Marubozu/Maru

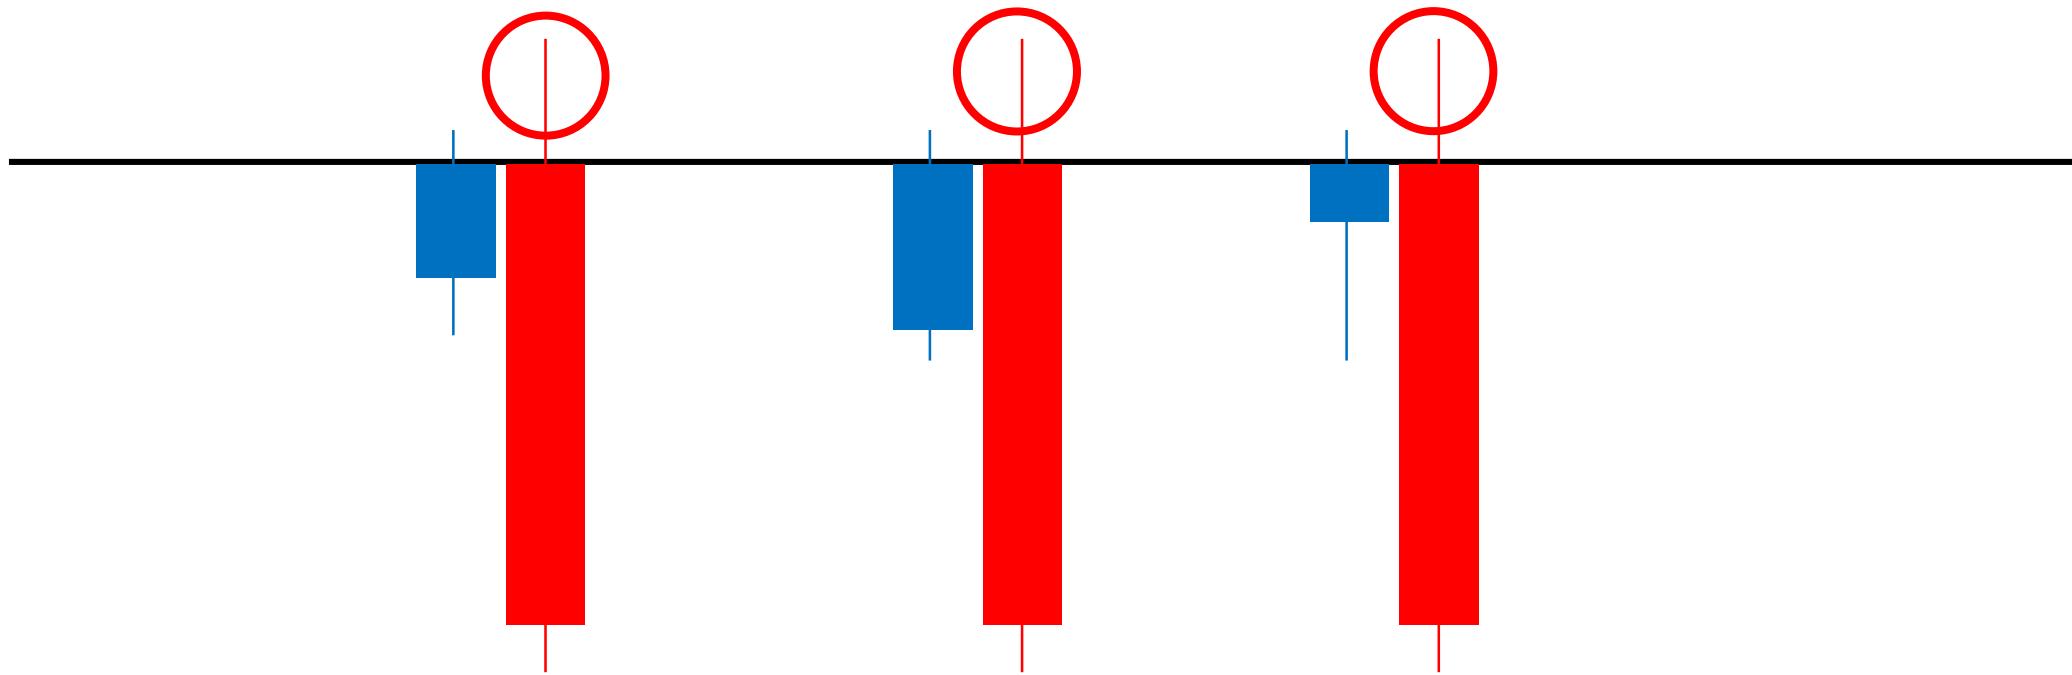

**LOOK FOR THESE ENGULFINGS
AT THE MPL**

SELL SETUP

BEARISH ENGULFING TYPE 1

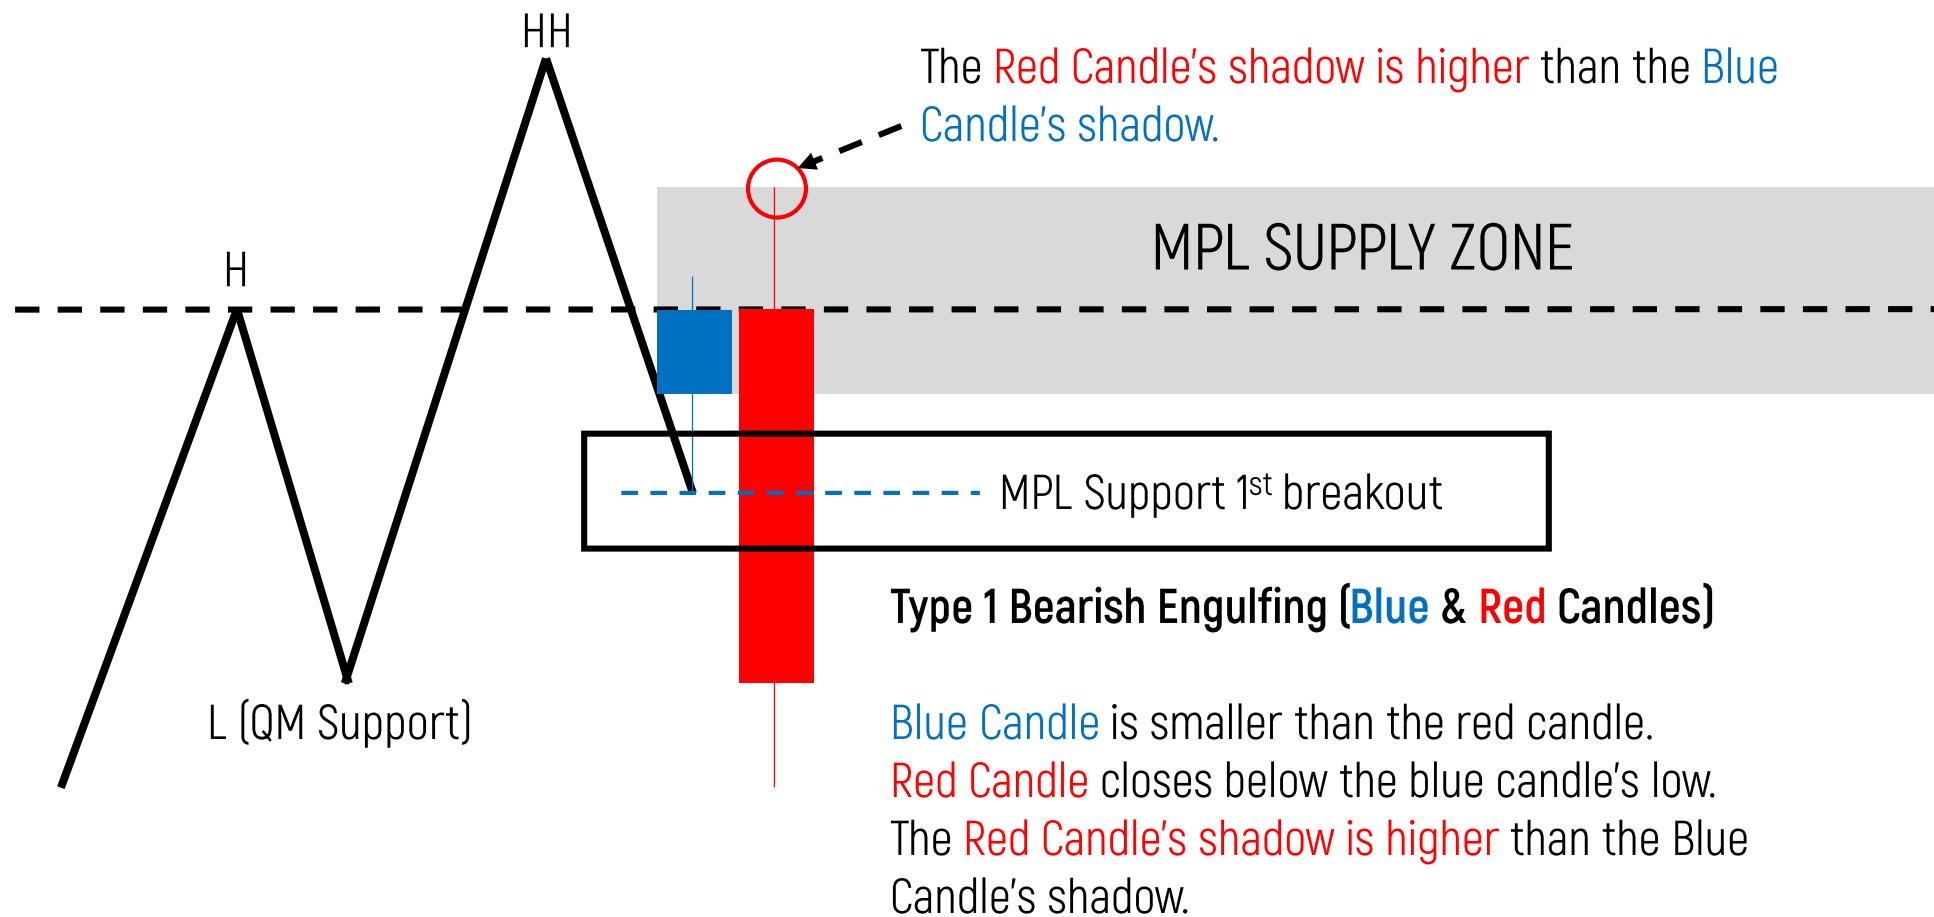

BEARISH ENGULFING TYPE 1

The shadow of the **Red Marubozu** has to be HIGHER than the previous candle

TYPE 1: **BLUE & RED**

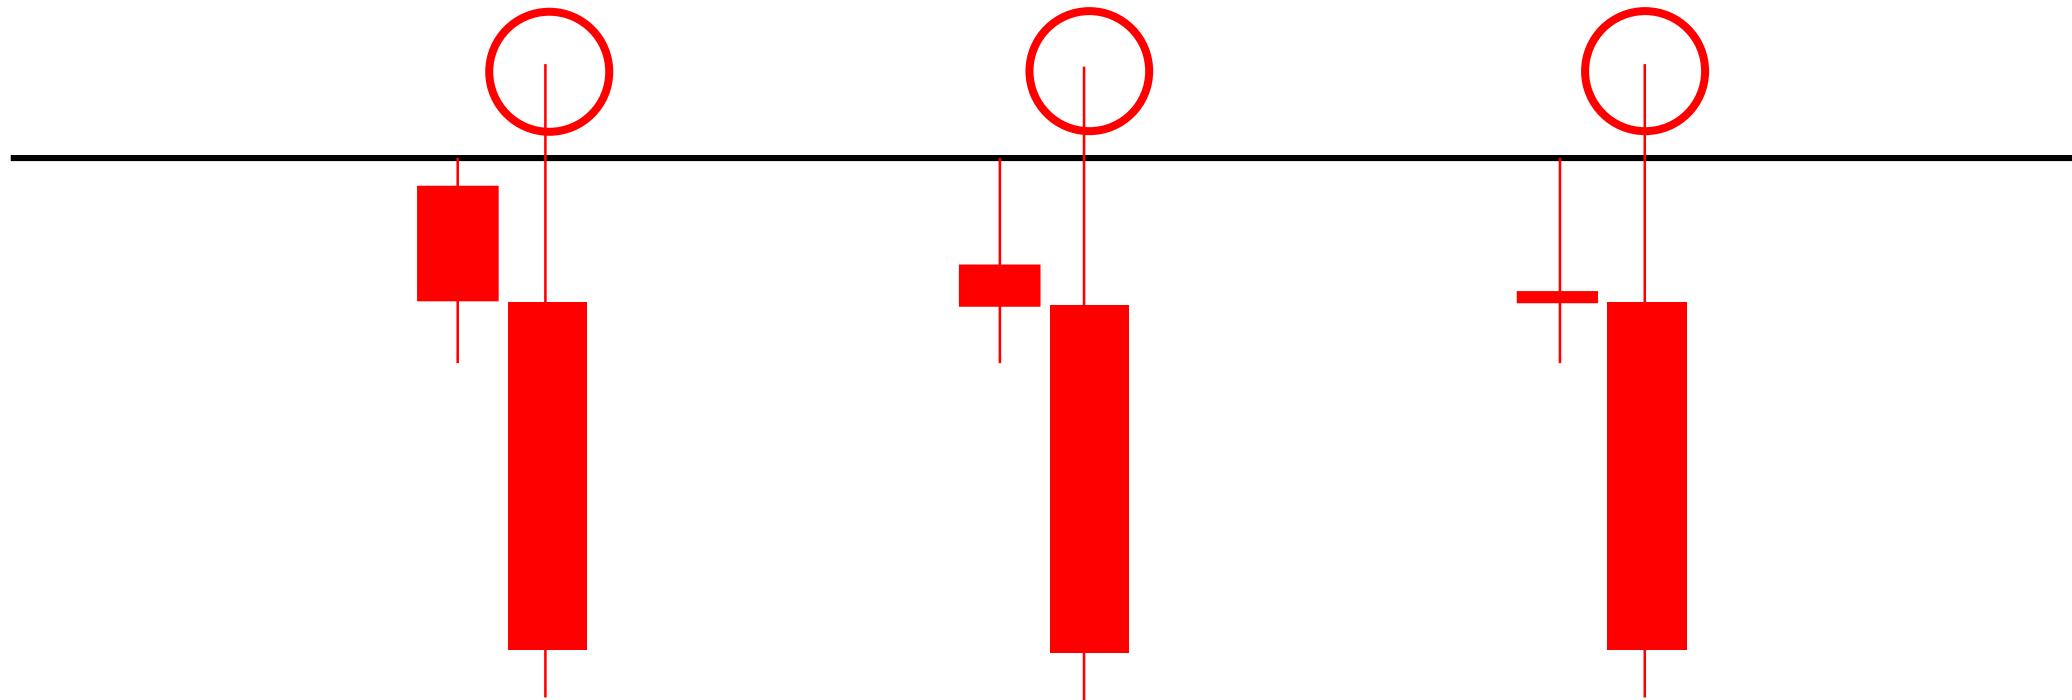

BEARISH ENGULFING TYPE 1

BEARISH ENGULFING TYPE 2

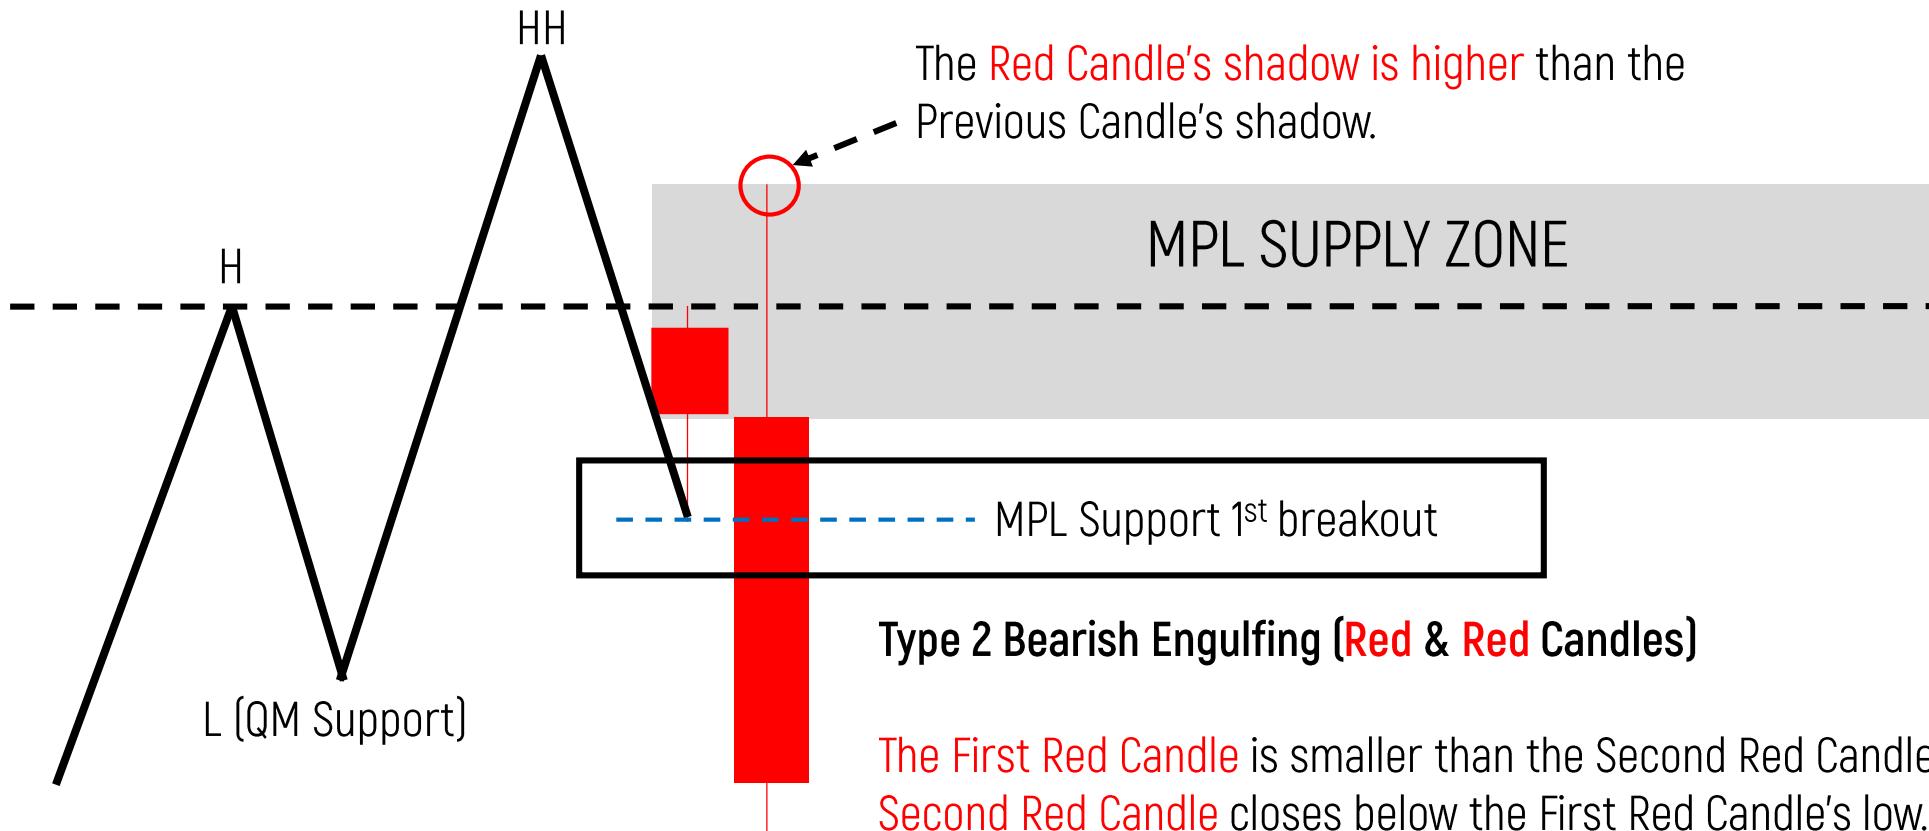

BEARISH ENGULFING TYPE 2

The shadow of the **Red Marubozu** has to be HIGHER than the previous candle

TYPE 2: RED & RED

BEARISH ENGULFING TYPE 2

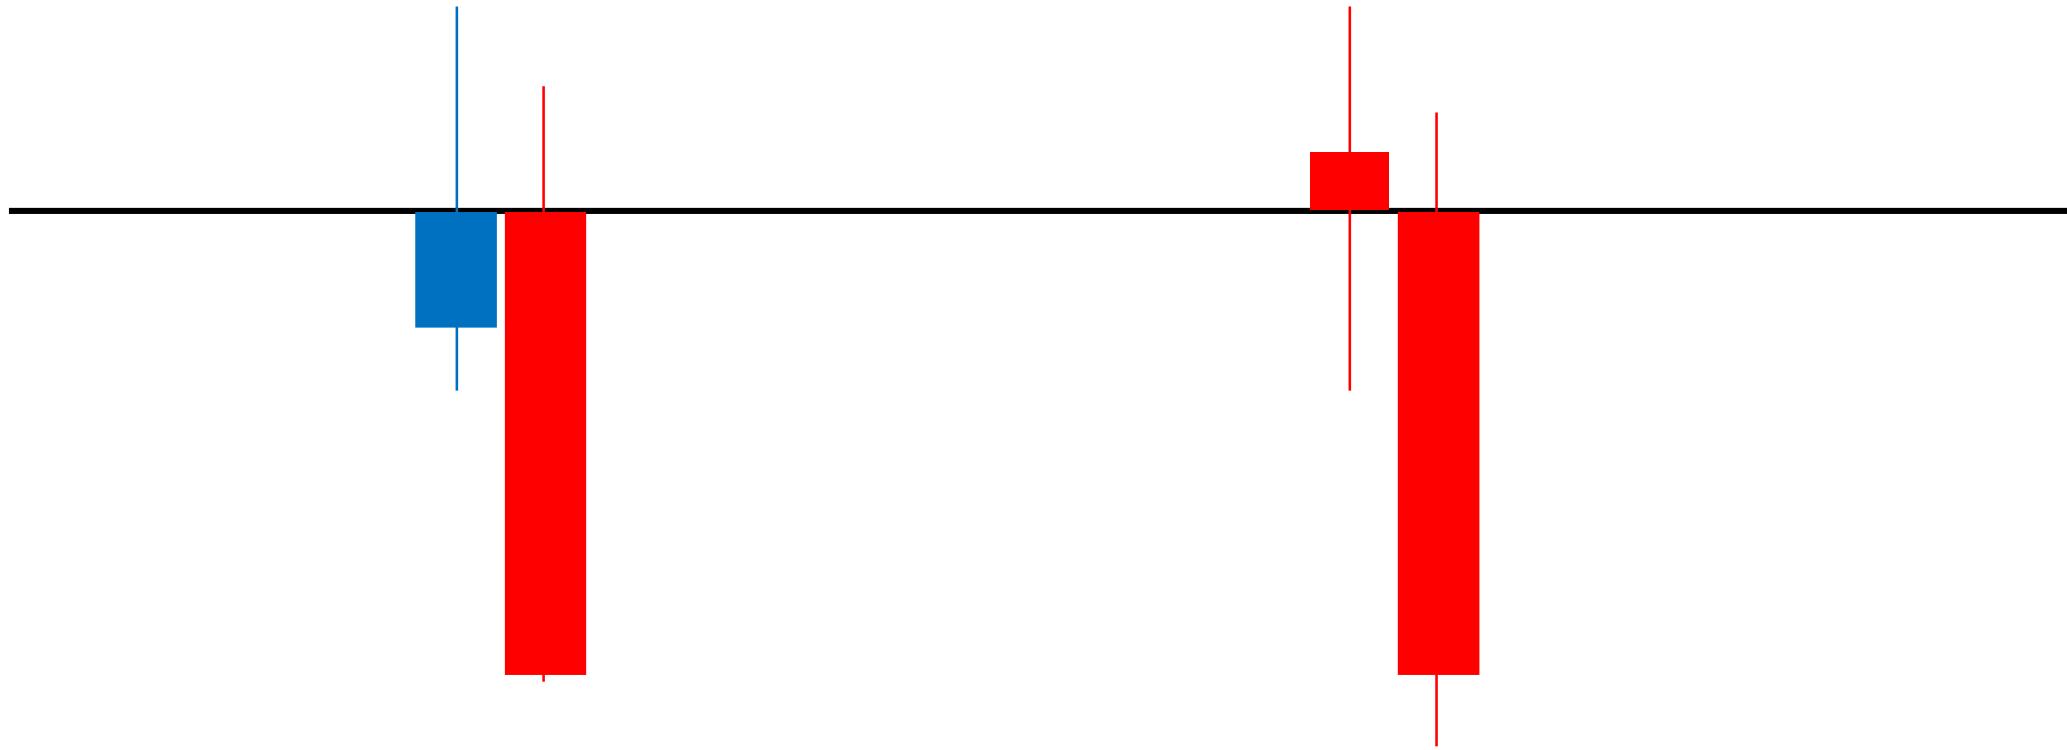

Type 2 Bearish Engulfing (**Red & Red Candles**)

The First Red Candle is smaller than the Second Red Candle.
Second Red Candle closes below the First Red Candle's low.
The Second Red Candle's shadow is higher than the first Red Candle's shadow.

BEARISH ENGULFING TYPE 3

BEARISH ENGULFING TYPE 3

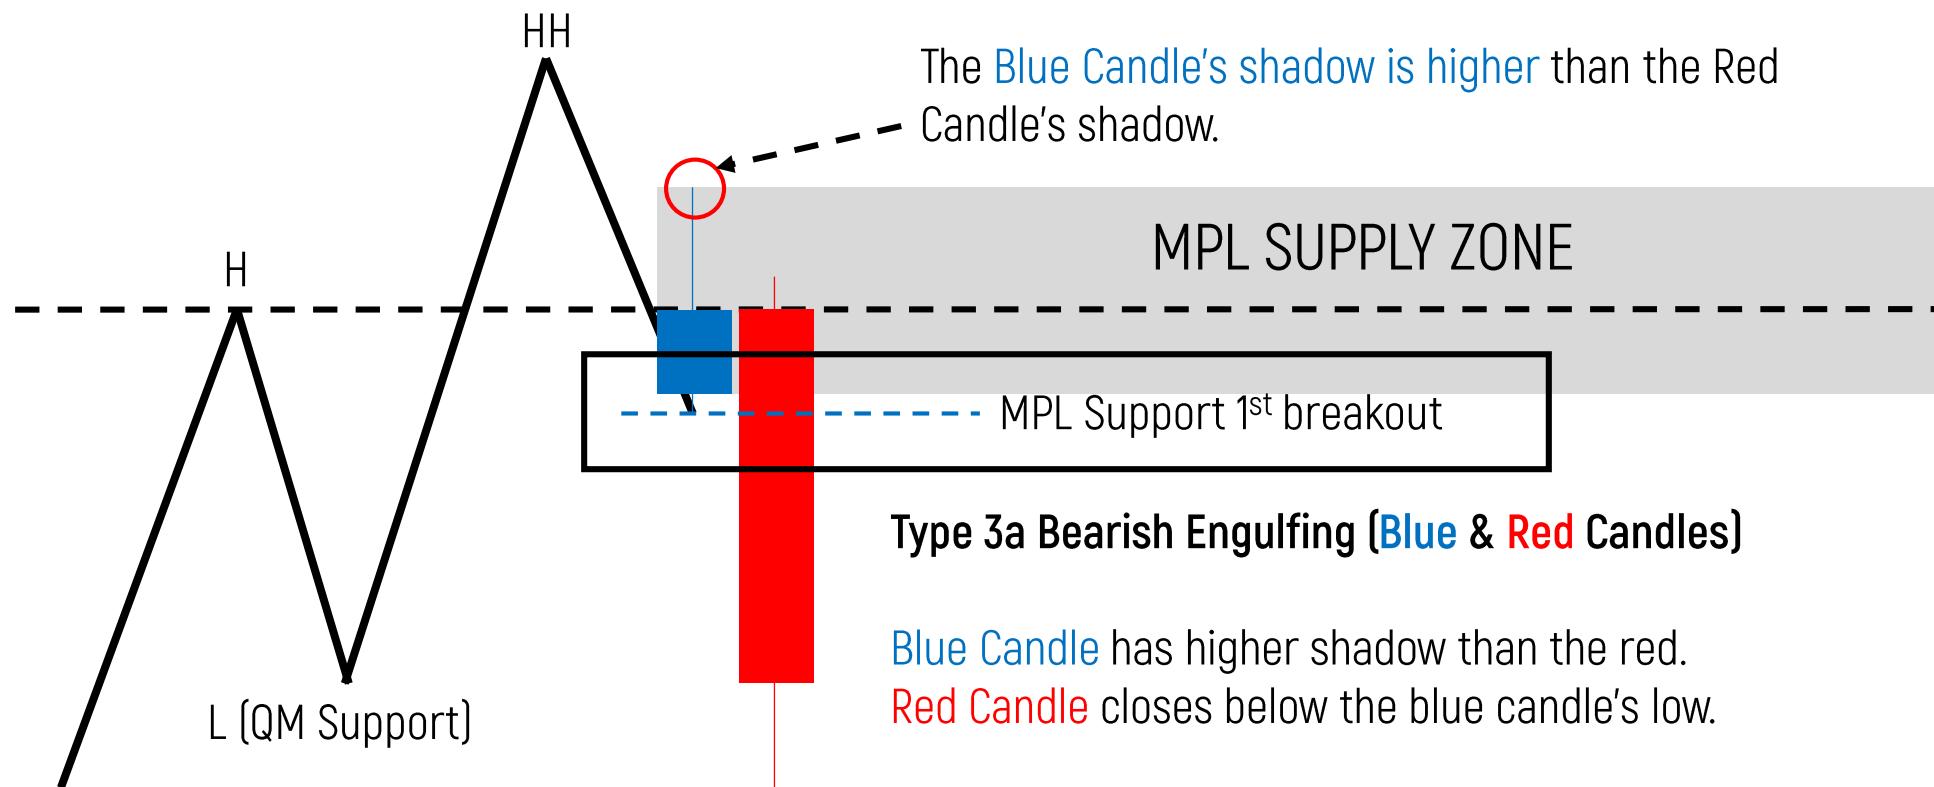

The shadow of the First Candle is HIGHER than the second red candle's

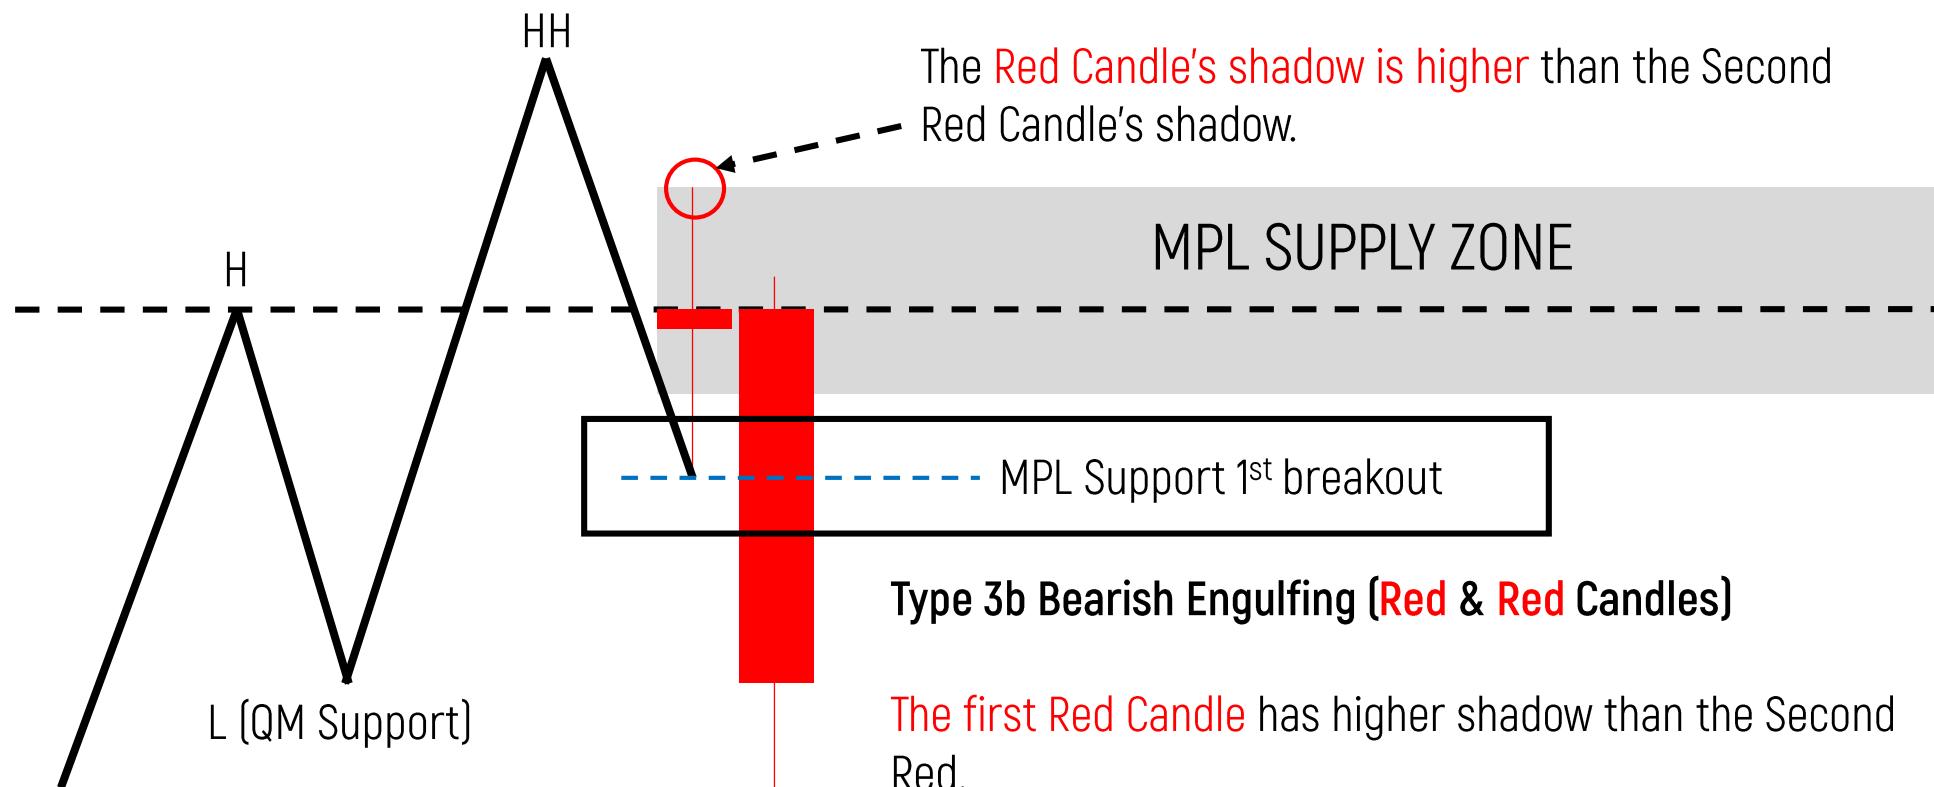

Bearish Engulfing Type 3a

Bearish Engulfing Type 3b

BEARISH ENGULFING TYPE 3a

BEARISH ENGULFING TYPE 3b

THE LOWER ZONE SETUP

Discussing Further on the Lower Zone Setup

What is Lower Zone Setup?

Lower Zone Setup refers to the setups that happen only at Lower Zones. The most prominent Setup would be QM + MPL + Bullish Engulfing. In this section, I would specialize on discussing the QM + MPL + Bullish Engulfing Setup.

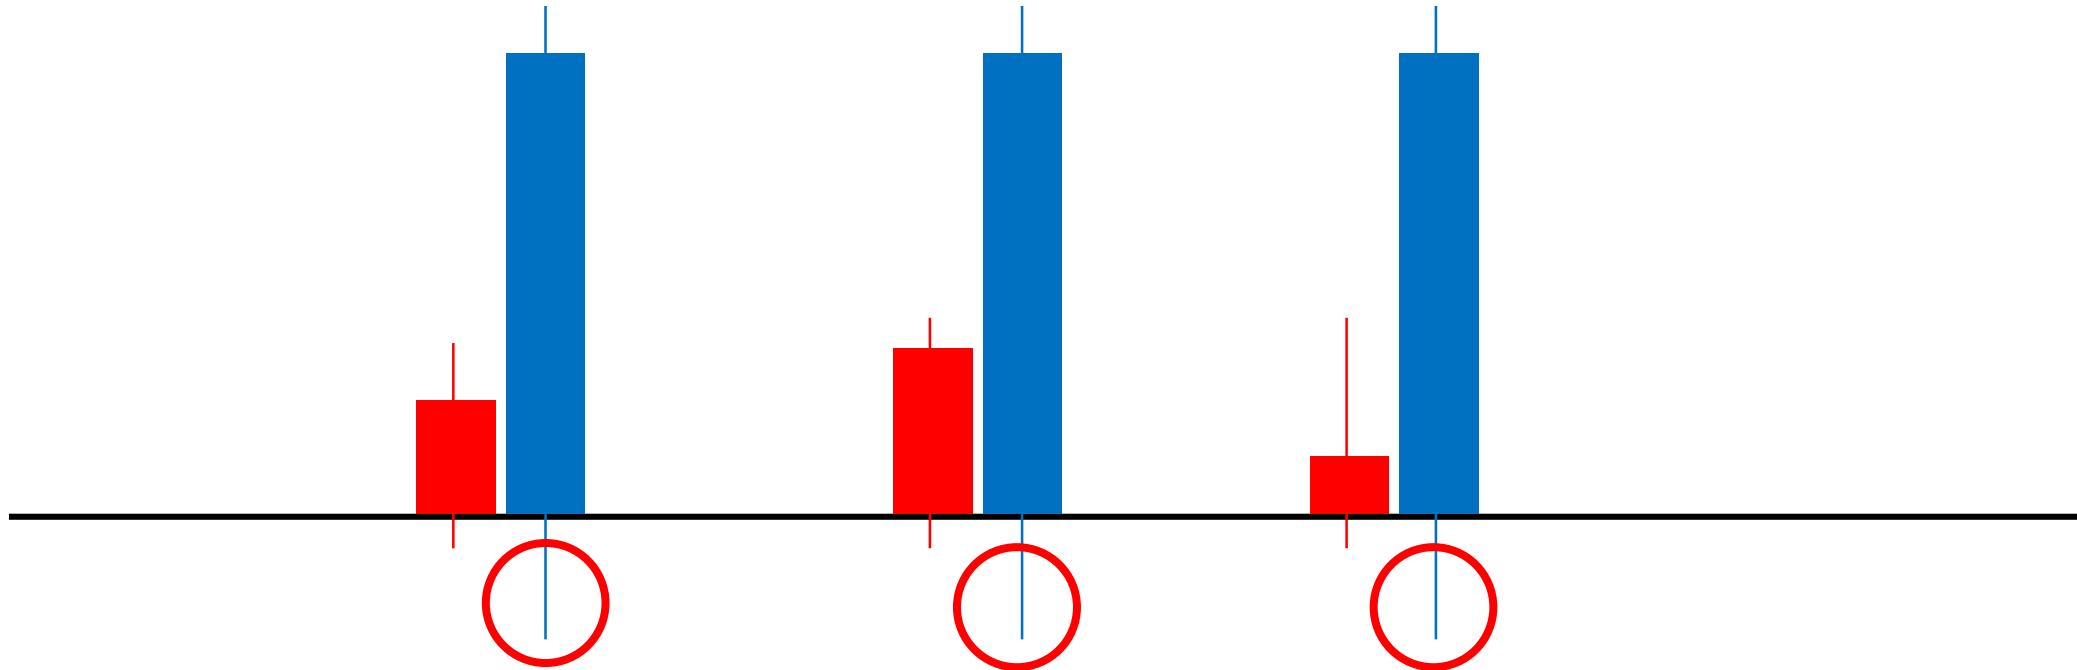

BUY SETUP

BULLISH ENGULFING TYPE 1

BULLISH ENGULFING TYPE 1

FOR BUY SETUP

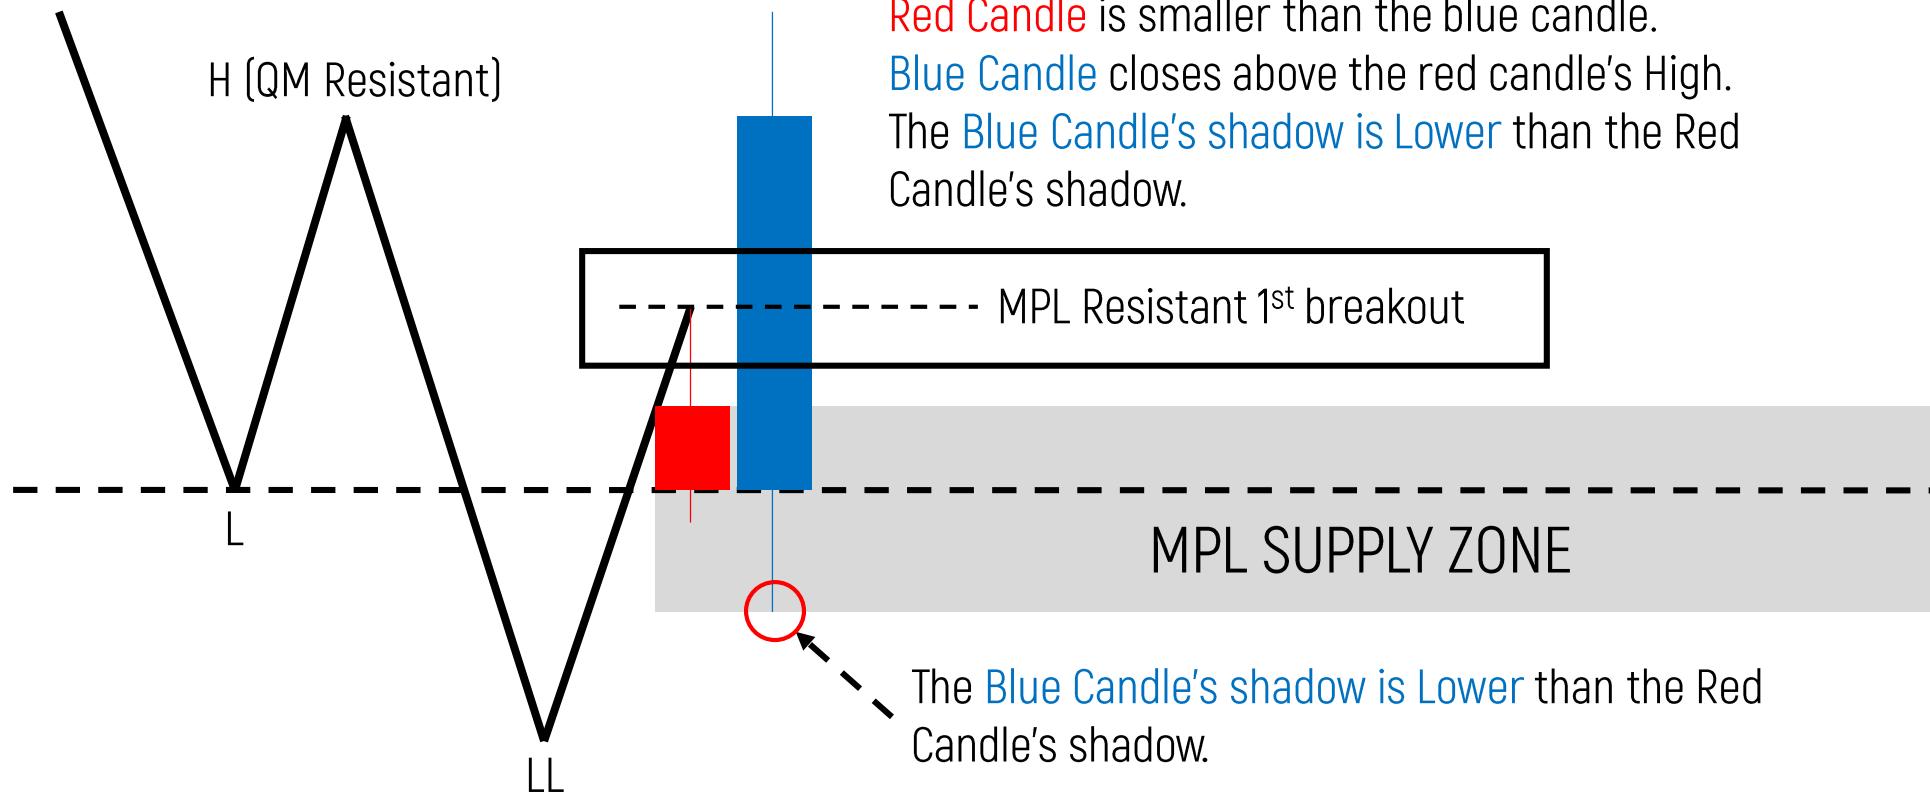

The shadow of Blue Marubozu has to be lower than the red candle's

TYPE 1: RED & BLUE

BULLISH ENGULFING TYPE 1

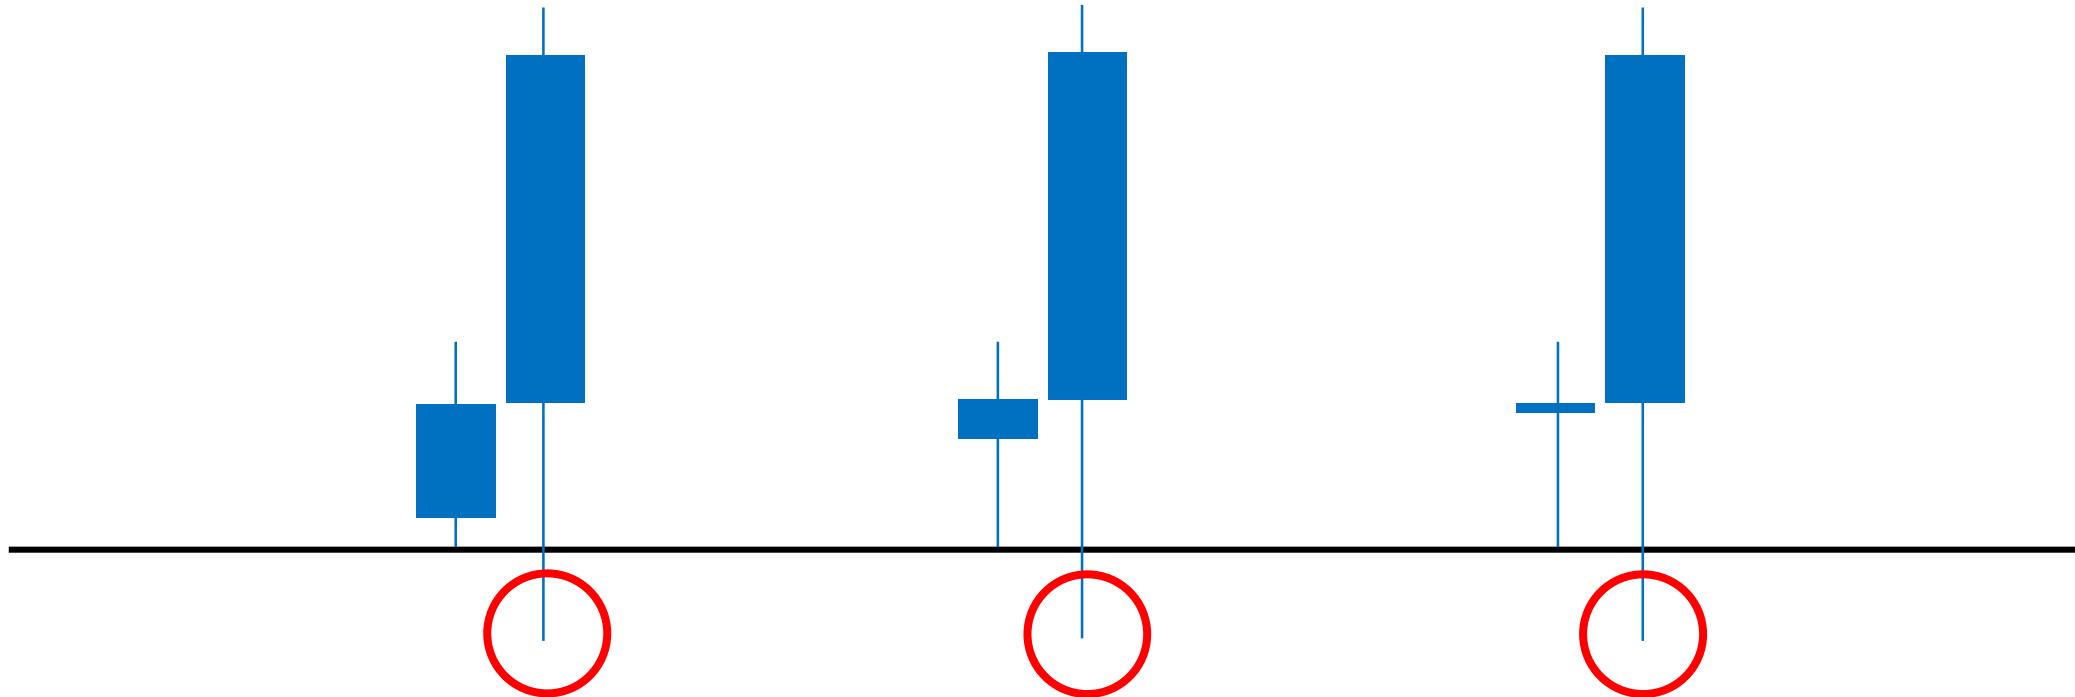

Type 1 Bullish Engulfing (Red & Blue Candles)

BULLISH ENGULFING TYPE 2

BULLISH ENGULFING TYPE 2

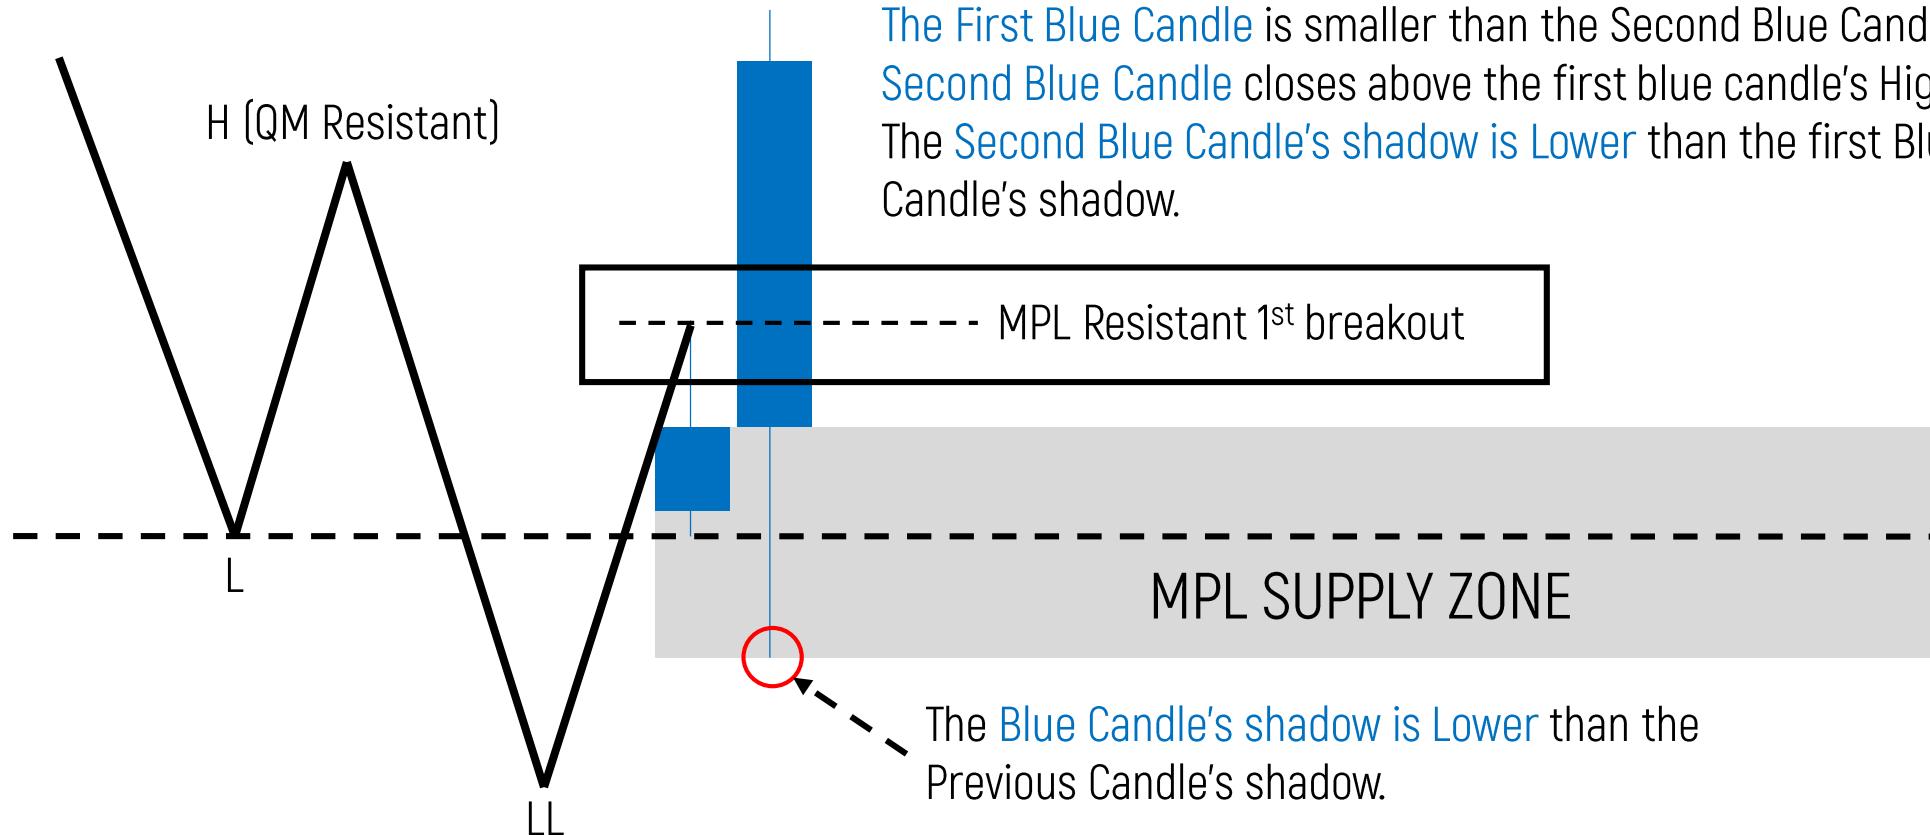

The shadow of the **Blue Marubozu** has to be LOWER than the previous candle

TYPE 2: **BLUE & BLUE**

BULLISH ENGULFING TYPE 2

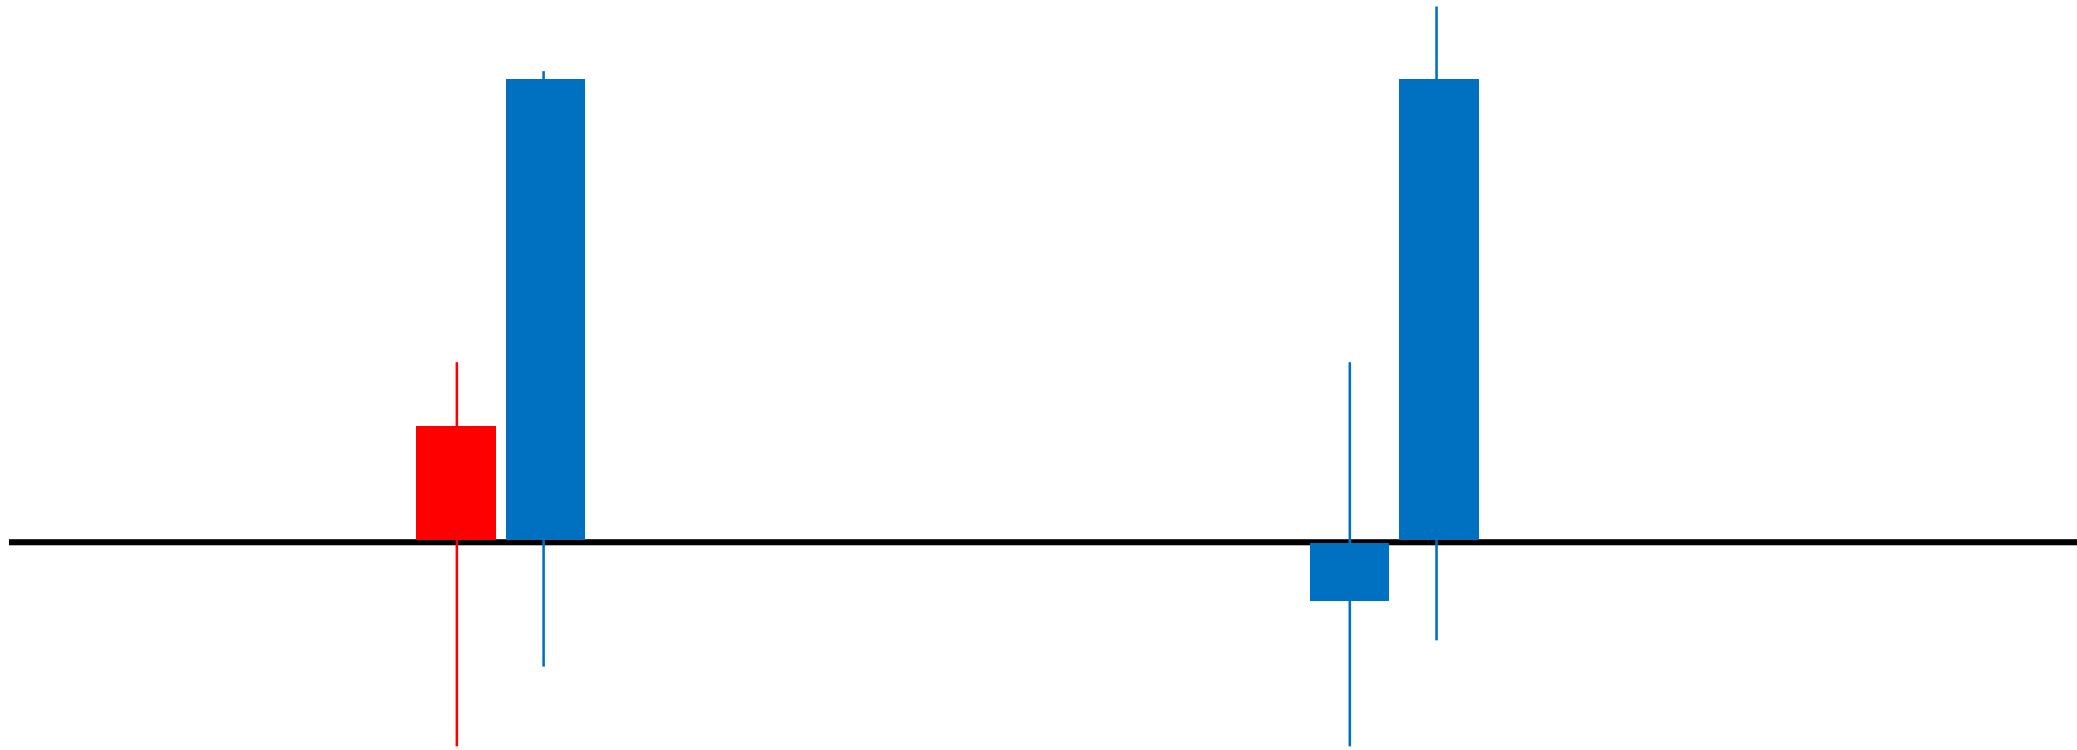

Type 2 Bullish Engulfing (Blue & Blue Candles)

BULLISH ENGULFING TYPE 3

BULLISH ENGULFING TYPE 3

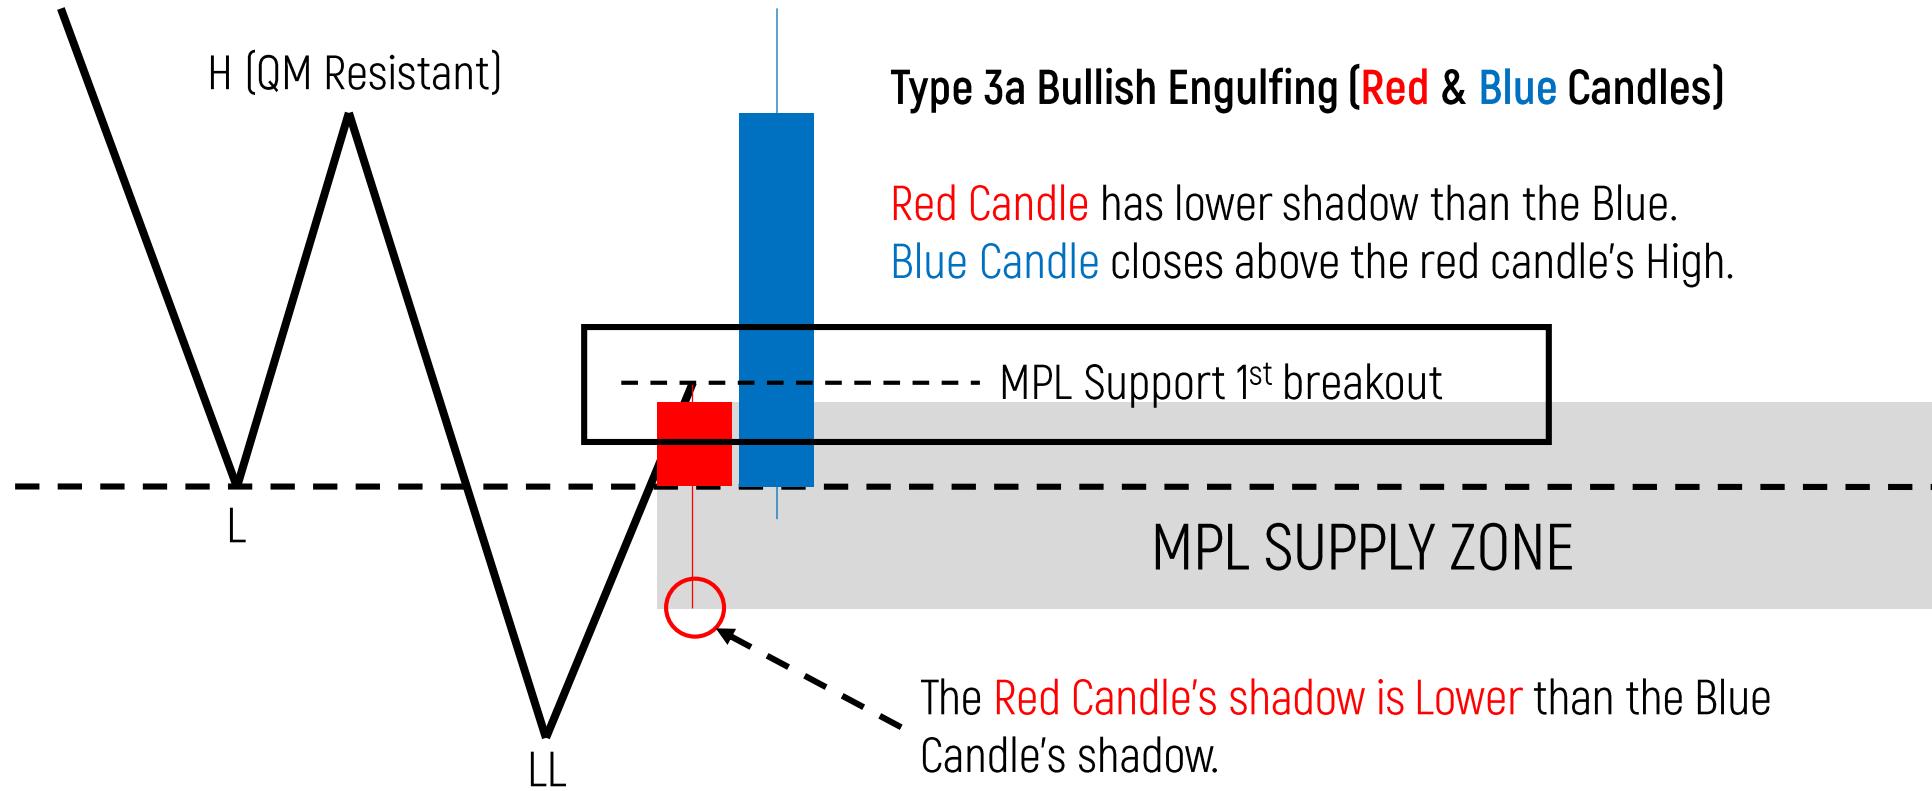

The shadow of the First Candle is LOWER than the Second candle's shadow

Bullish Engulfing Type 3a

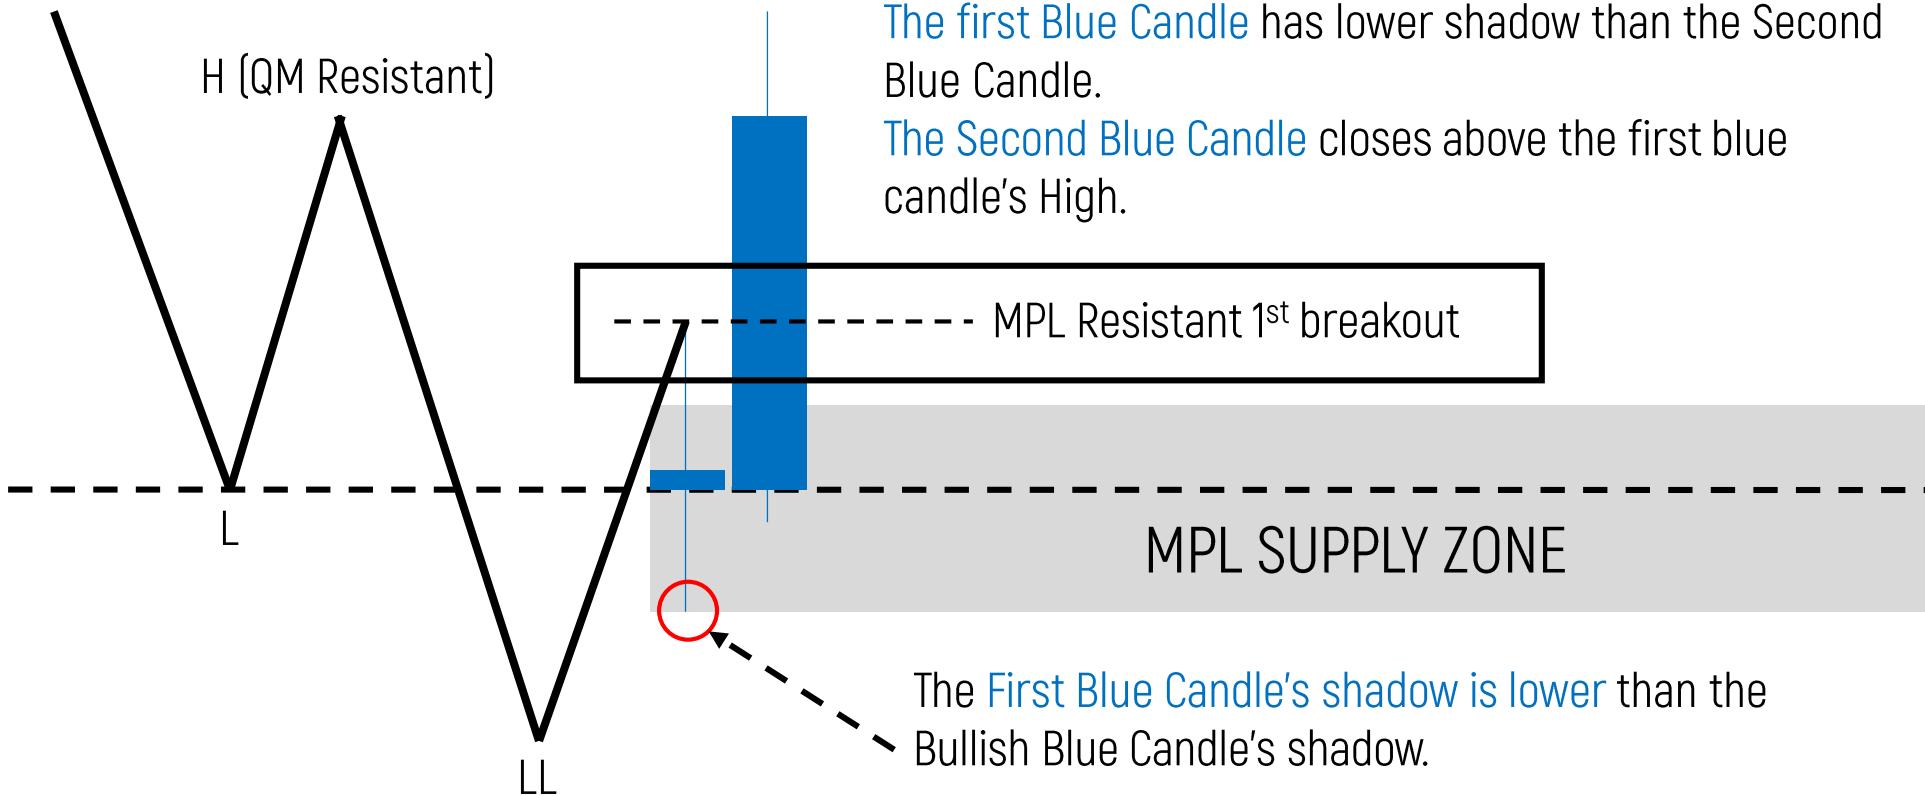

Bullish Engulfing Type 3b

BULLISH ENGULFING TYPE 3a

BULLISH ENGULFING TYPE 3b

Type 3b Bullish Engulfing (Blue & Blue Candles)

THE MID ZONE SETUP

Discussing Further the Mid Zone Setup

What is Mid Zone Setup?

Midzone Setup is simply a setup that occurs at the Drop Base Drop (DBD) or Rally Base Rally (RBR). We are looking for a good trade at this area when a setup appears at this Zone. There will normally be MPL + Engulfing setup here.

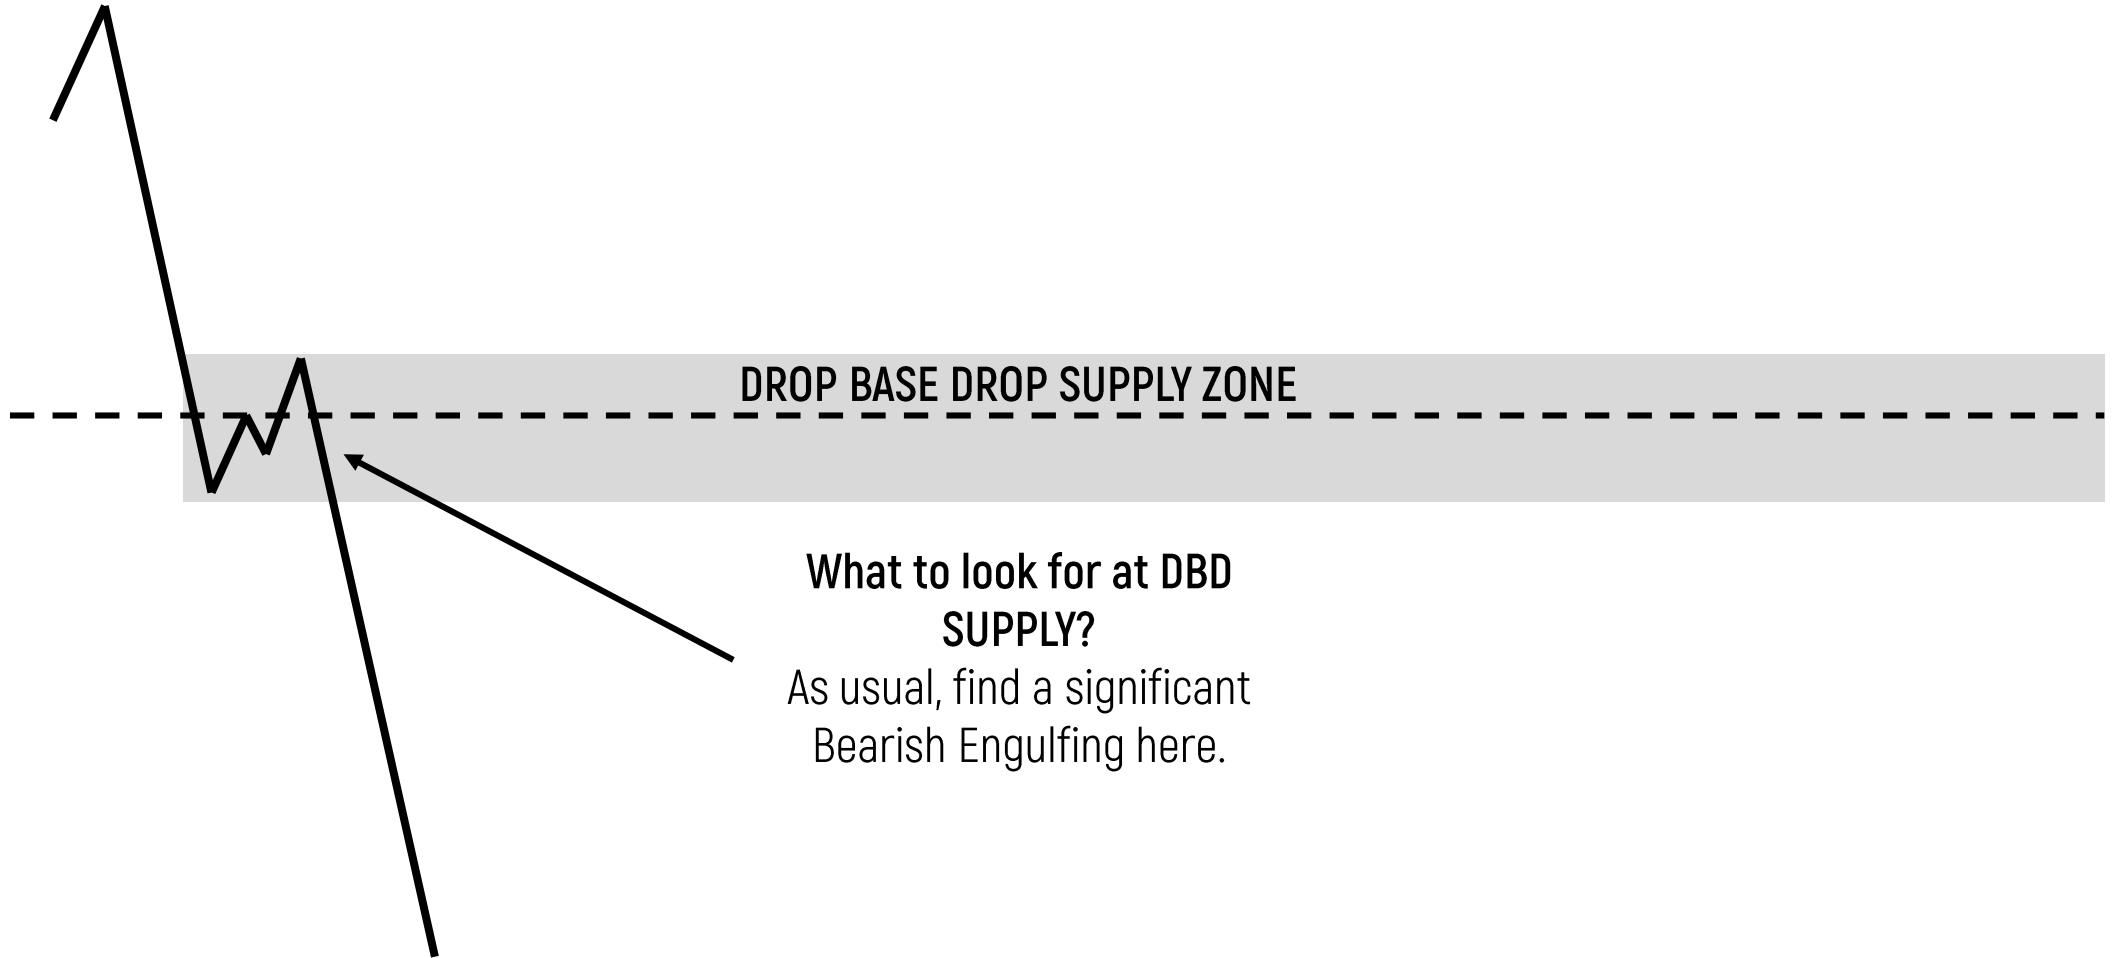

Why Trade at Mid Zone?

Well, Mid Zone is a Zone that is easy to rejects whenever it is a fresh one. It is a zone of liquidity where the price would stop and take a few more orders before continuing its journey completing the trend.

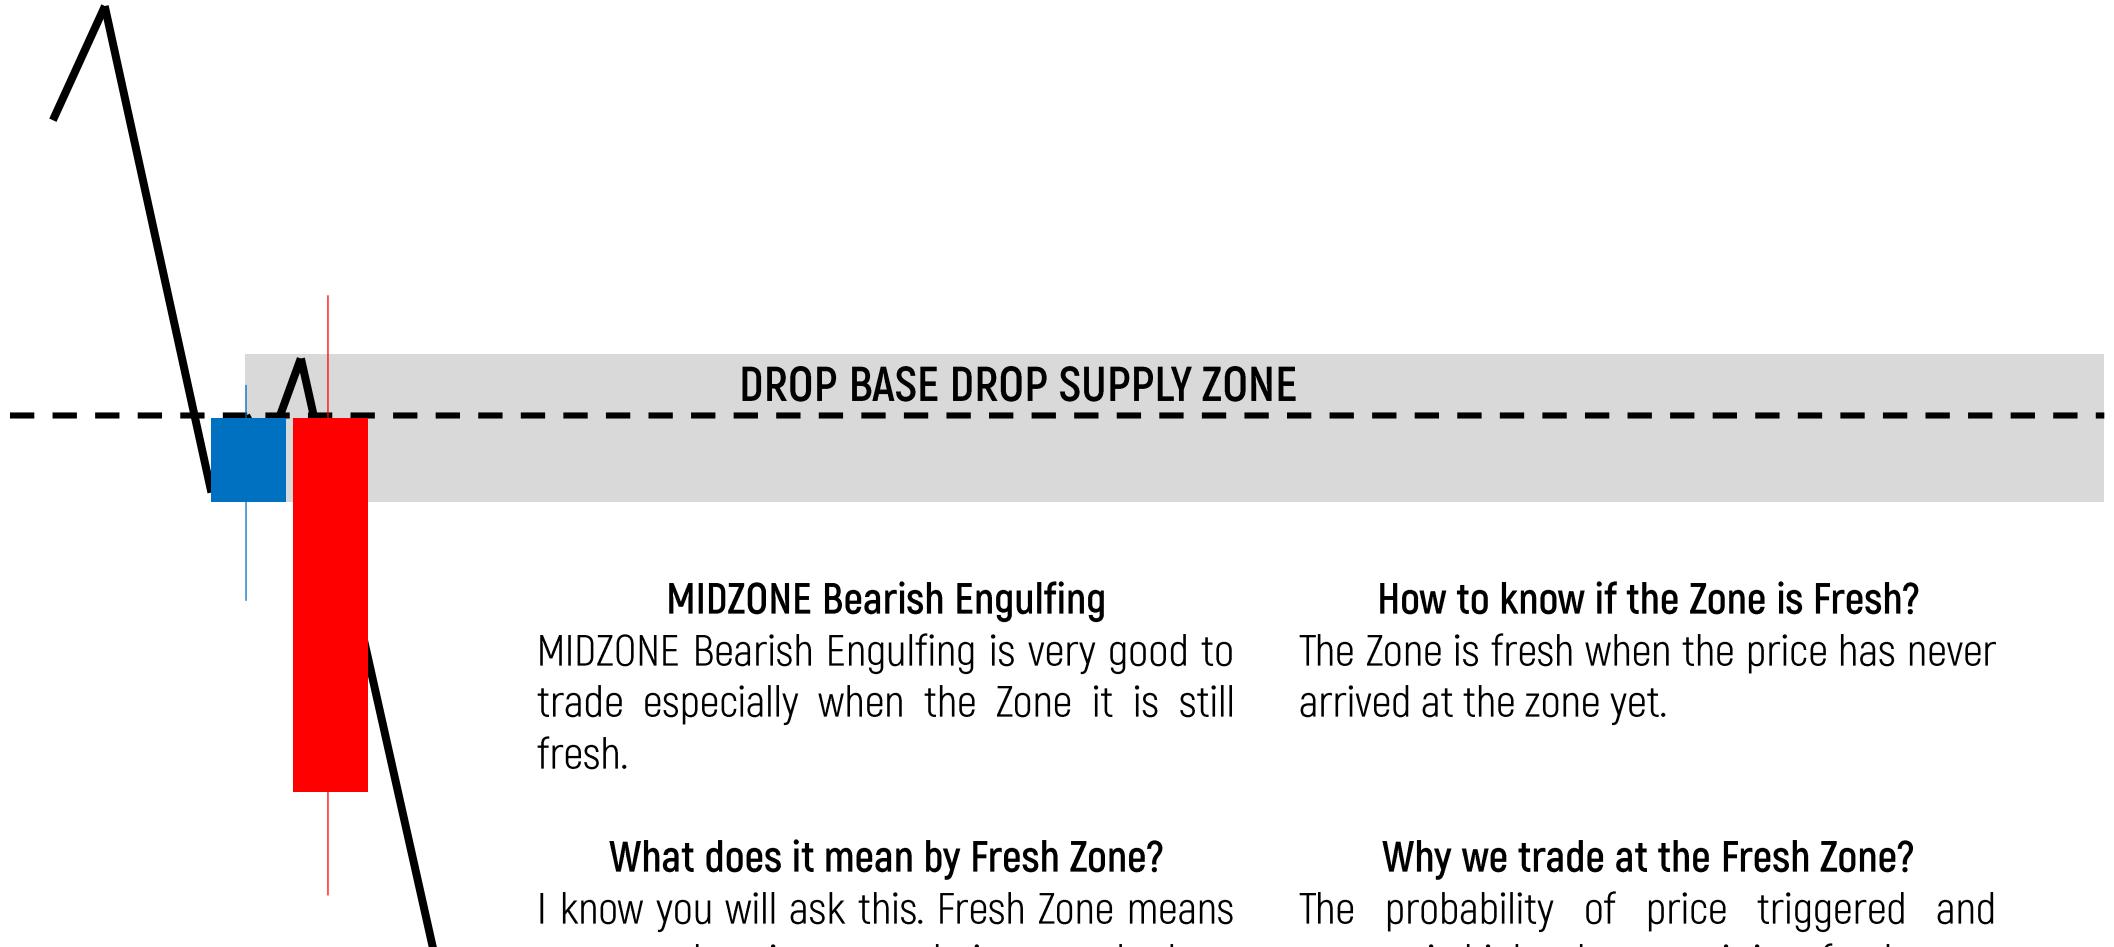

The best thing about trading at Mid Zone is that, we are following the trend and the winning rate of following trend will always be as high as 85%! So take the chance to look for a good setup here in the Mid Zone whenever possible.

SELL SETUP

THE MIDZONE SELL SETUP

THE MIDZONE SELL SETUP

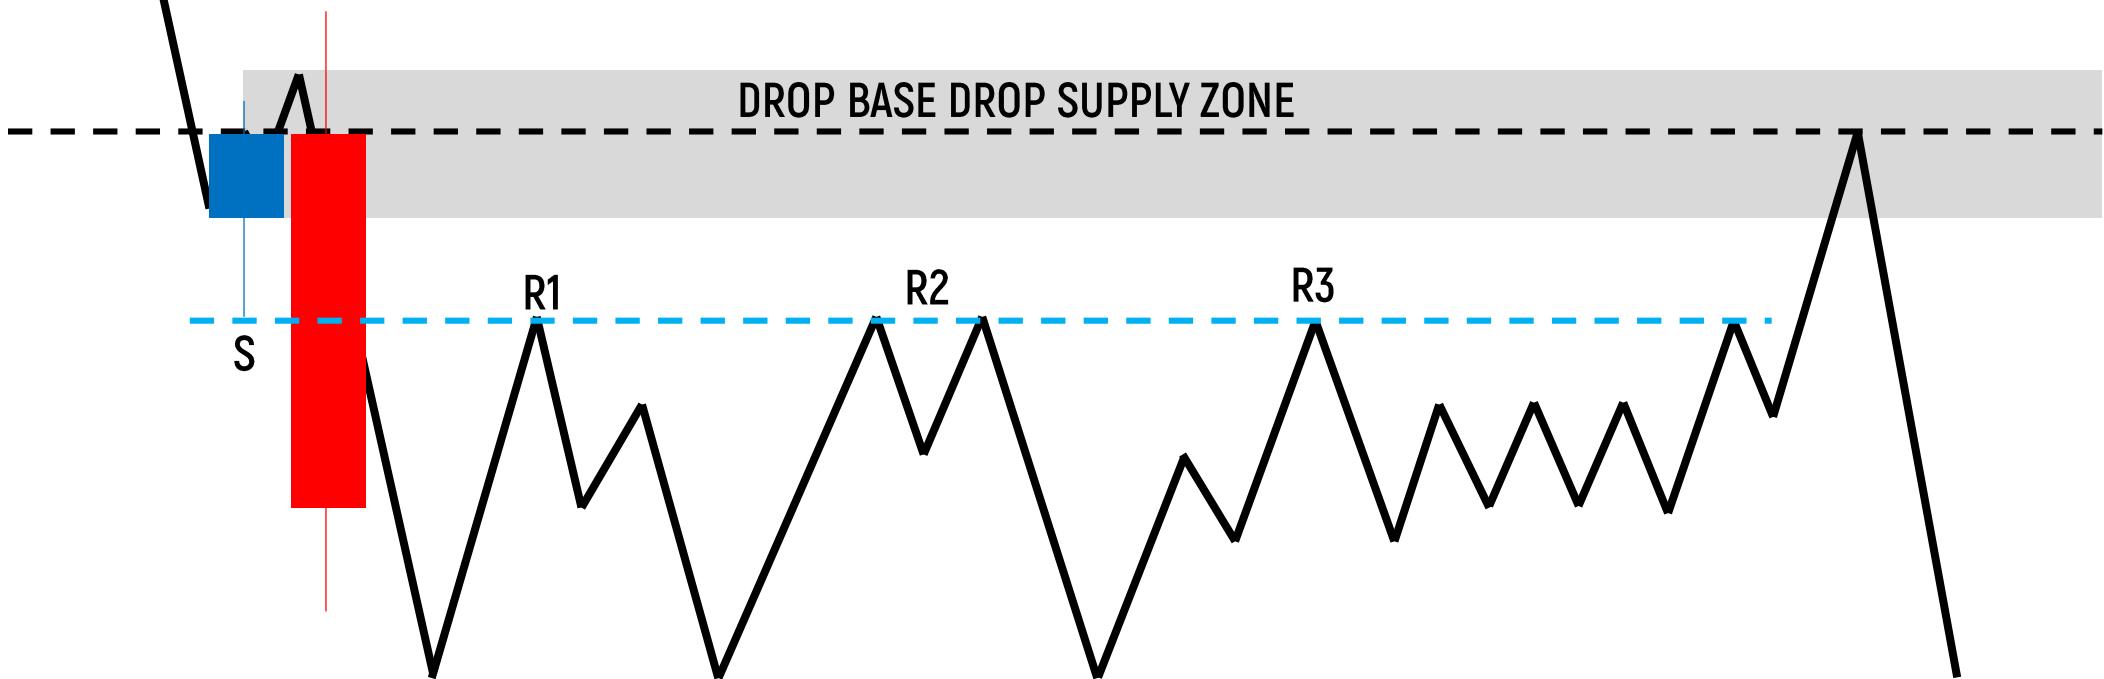

THE MIDZONE SELL SETUP

Midzone **SELL** Setup

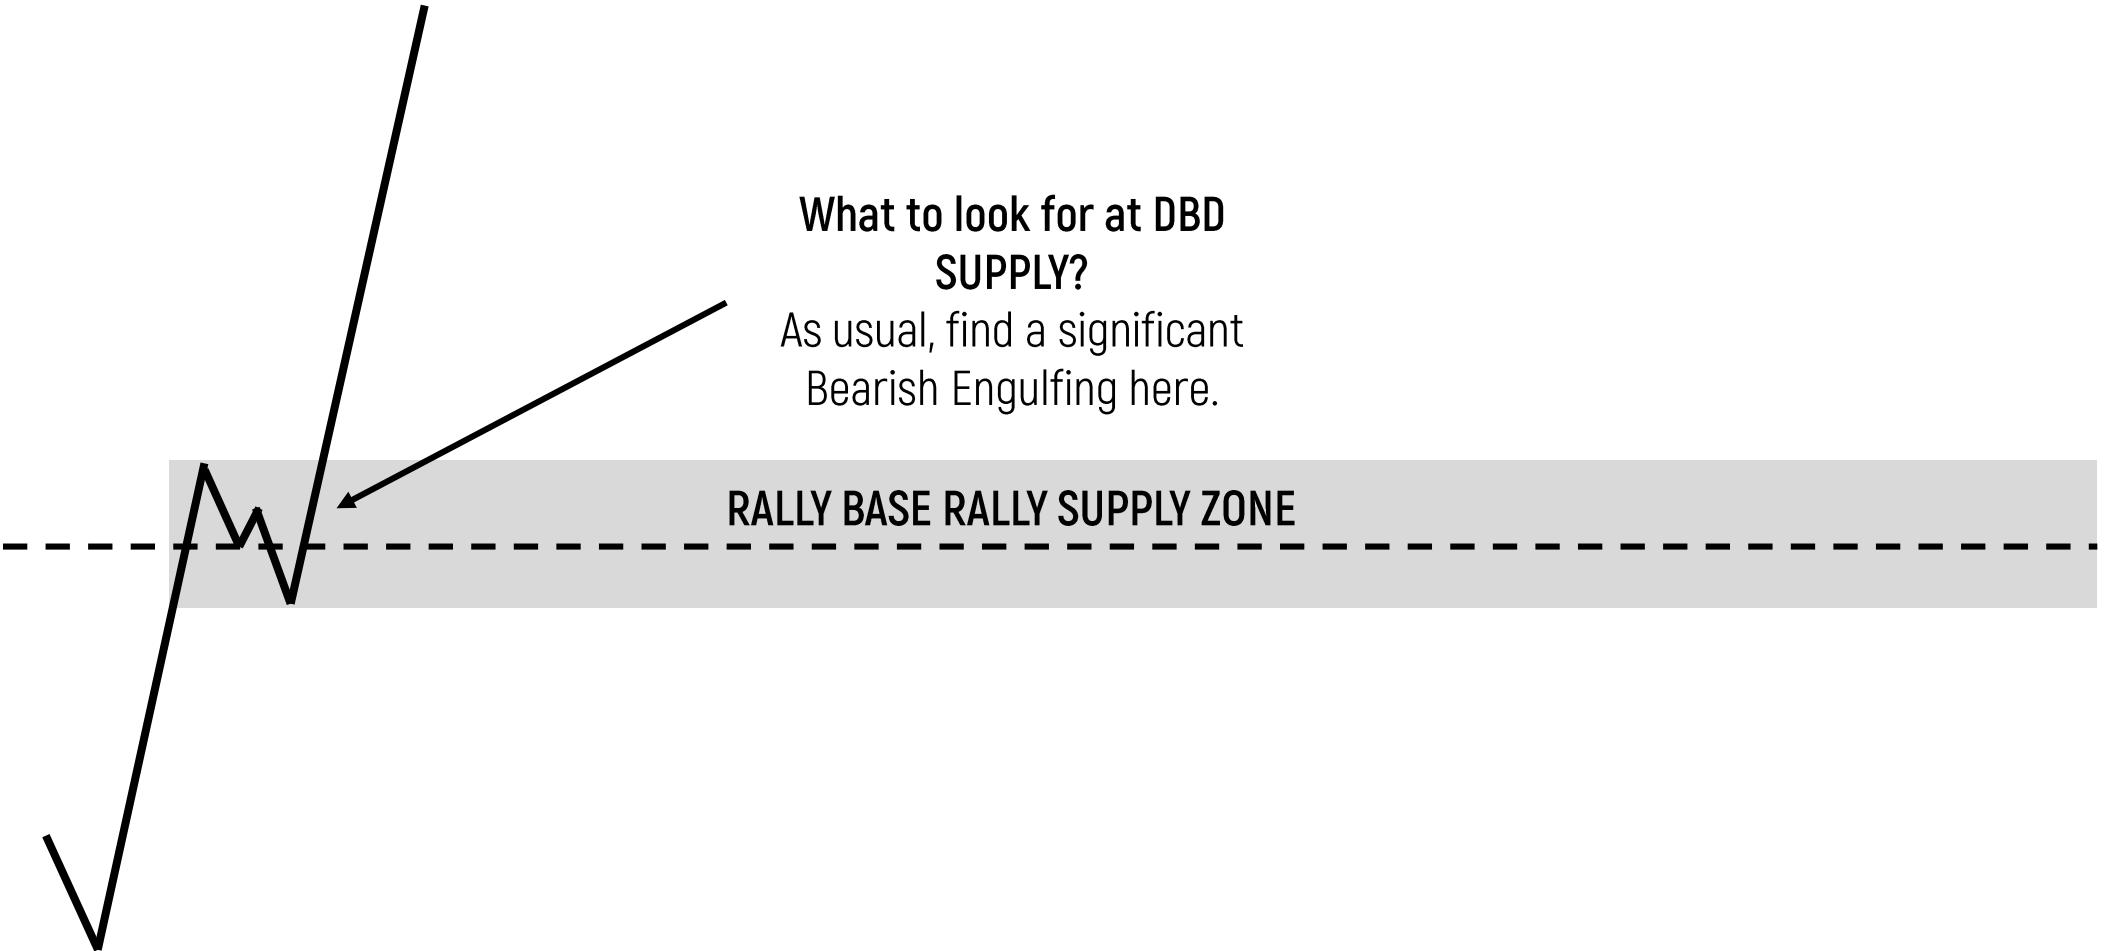

Please bear in mind that we are still bound to the **rule of SND trading** where any kind of trade is not taken until the clues are in place.

This is meant to say that, at any trade taken, the rules are still the number one thing to consider when taking trade.

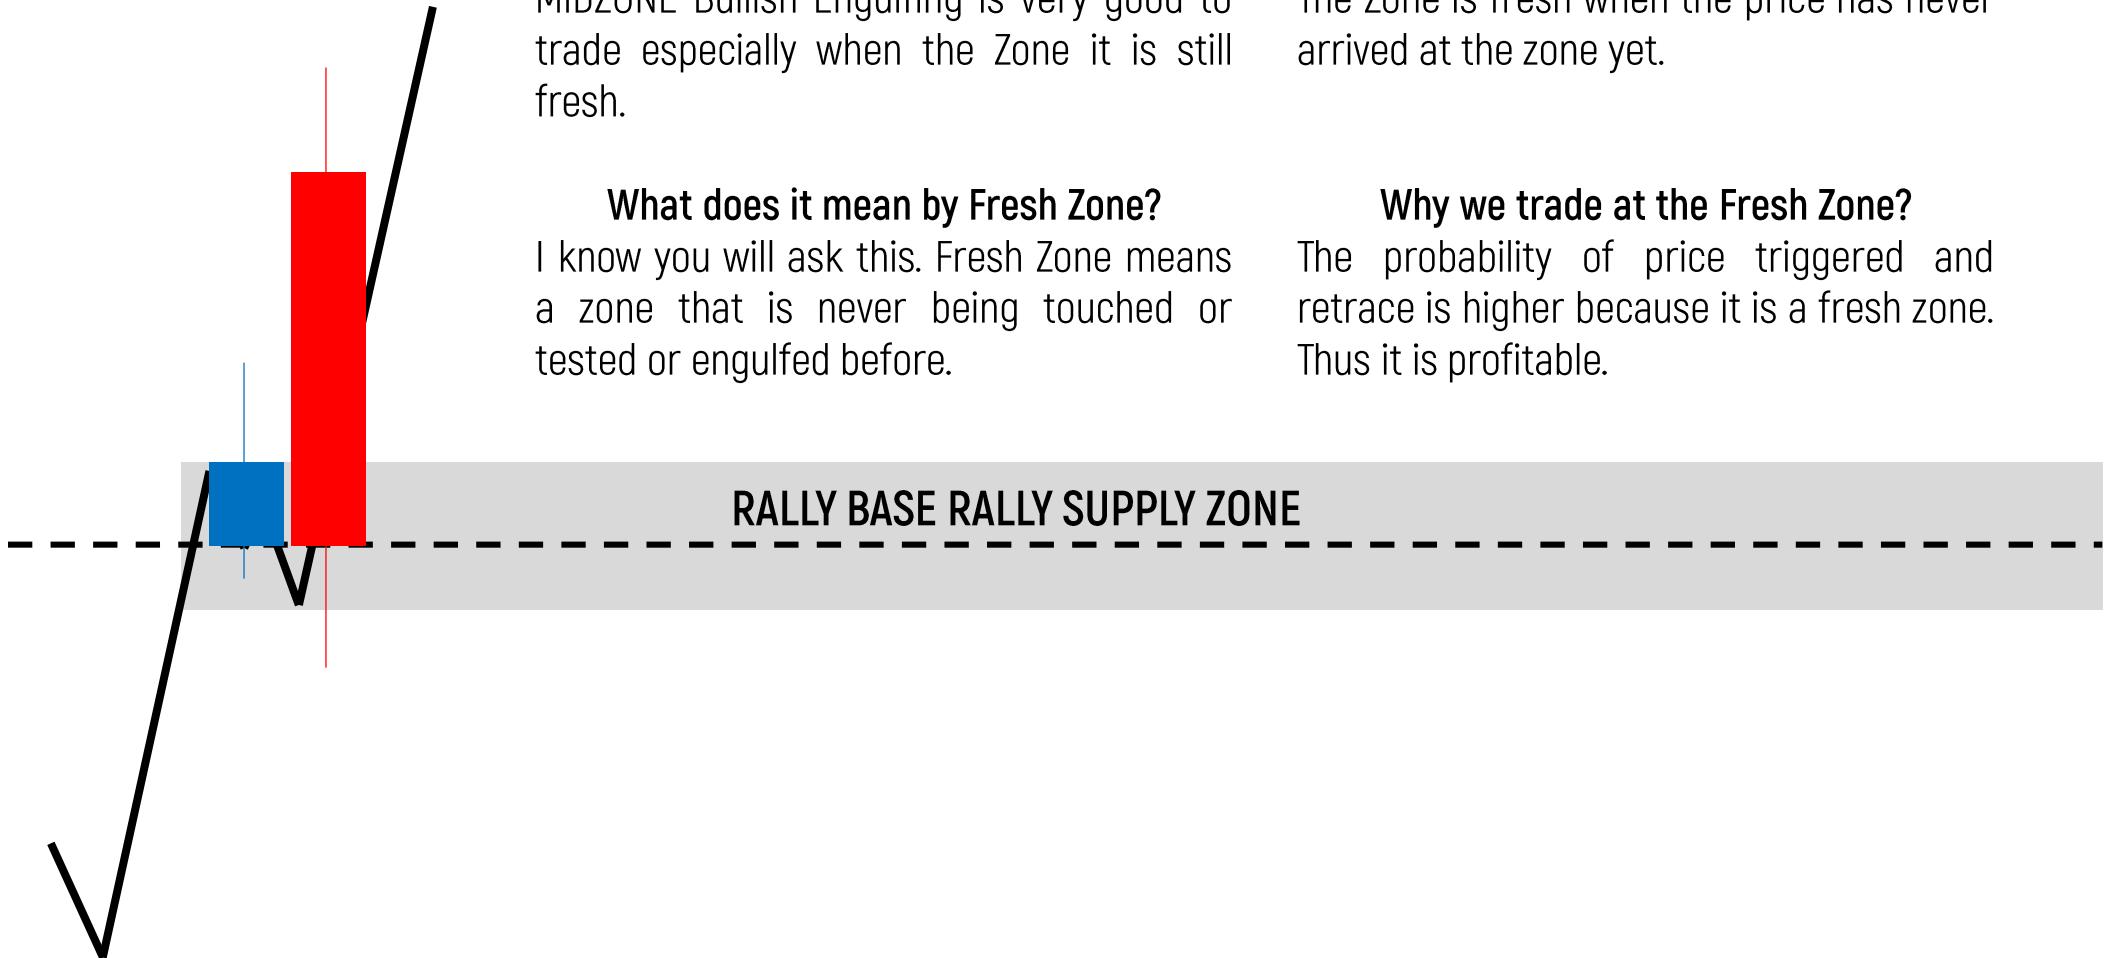

BUY SETUP

THE MIDZONE BUY SETUP

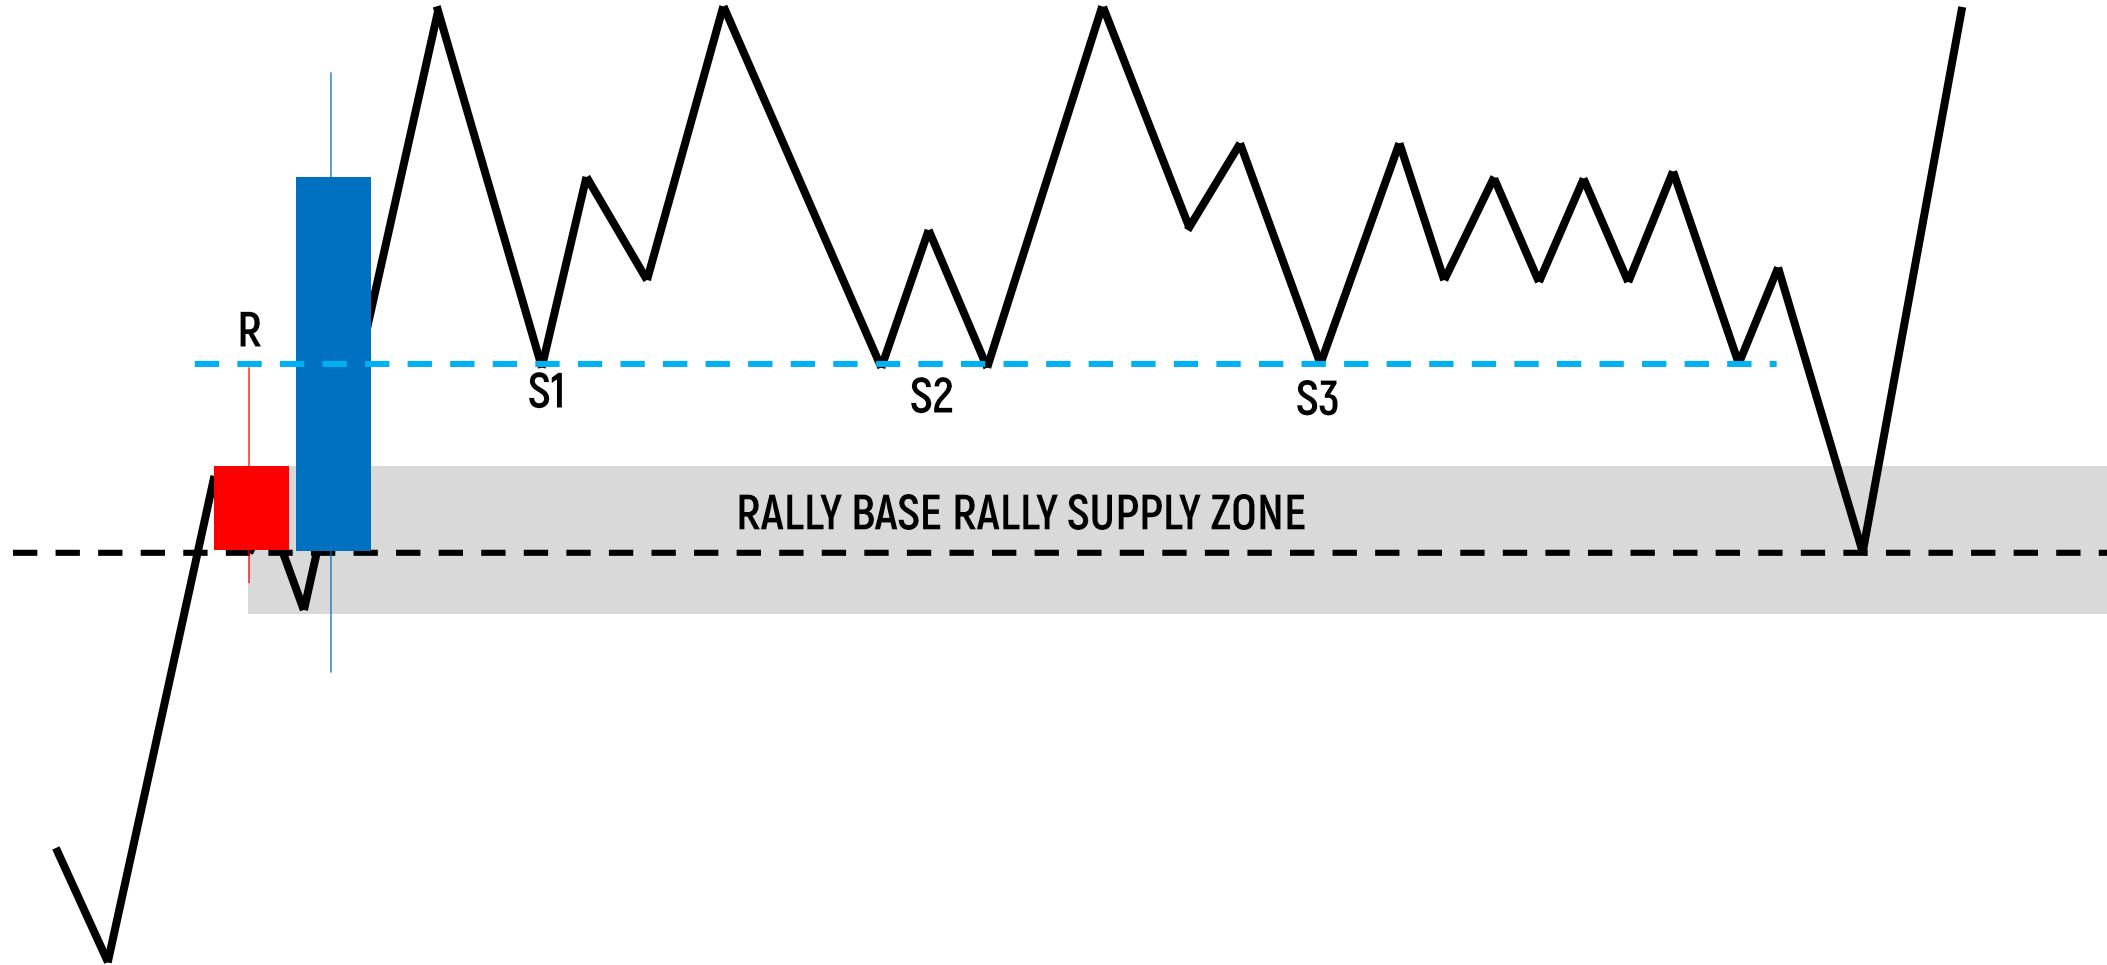

THE MIDZONE BUY SETUP

THE MIDZONE BUY SETUP

Midzone BUY Setup

Tips about MPL Engulfing

I just want to tell you that not all Engulfing are tradable. There are times when Engulfings just proved to be not worth it to trade. Therefore, this a tip to finding good Engulfing to trade.

What Kind of Engulfing to Look For?

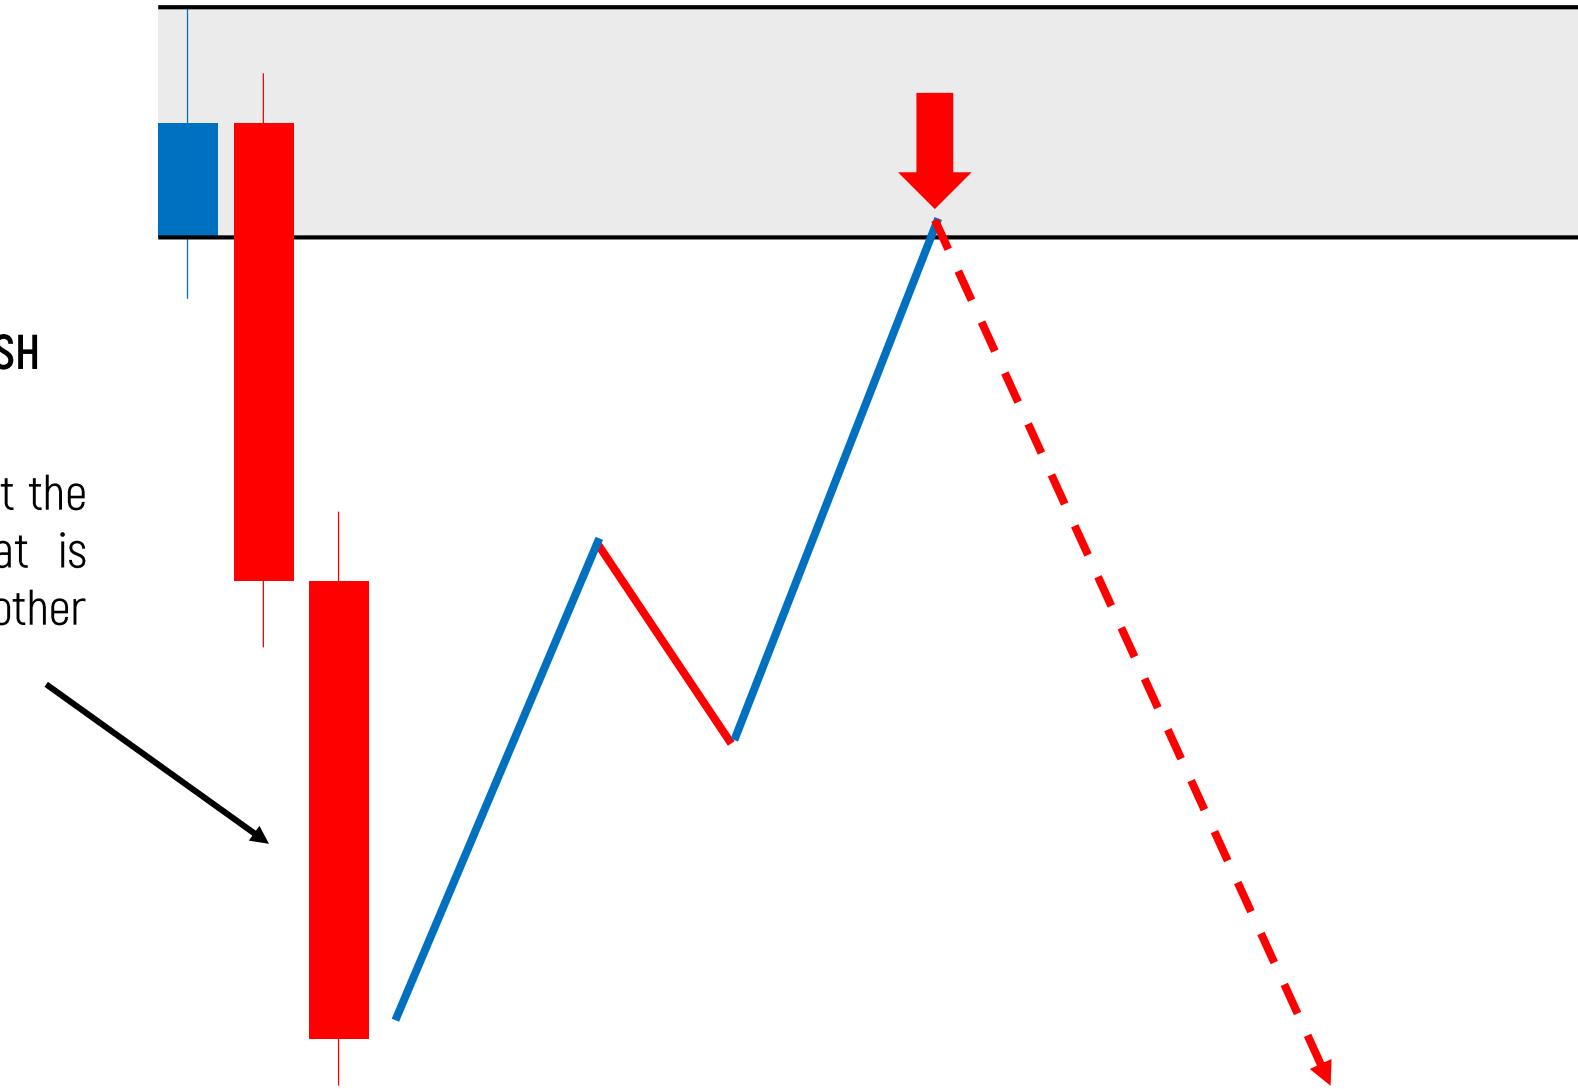

Look for an Engulfing that is followed by the next Marubozu. Be it in Bearish or Bullish setup, the stronger the momentum, the better price react when it comes back to the MPL Zone.

SELL SETUP

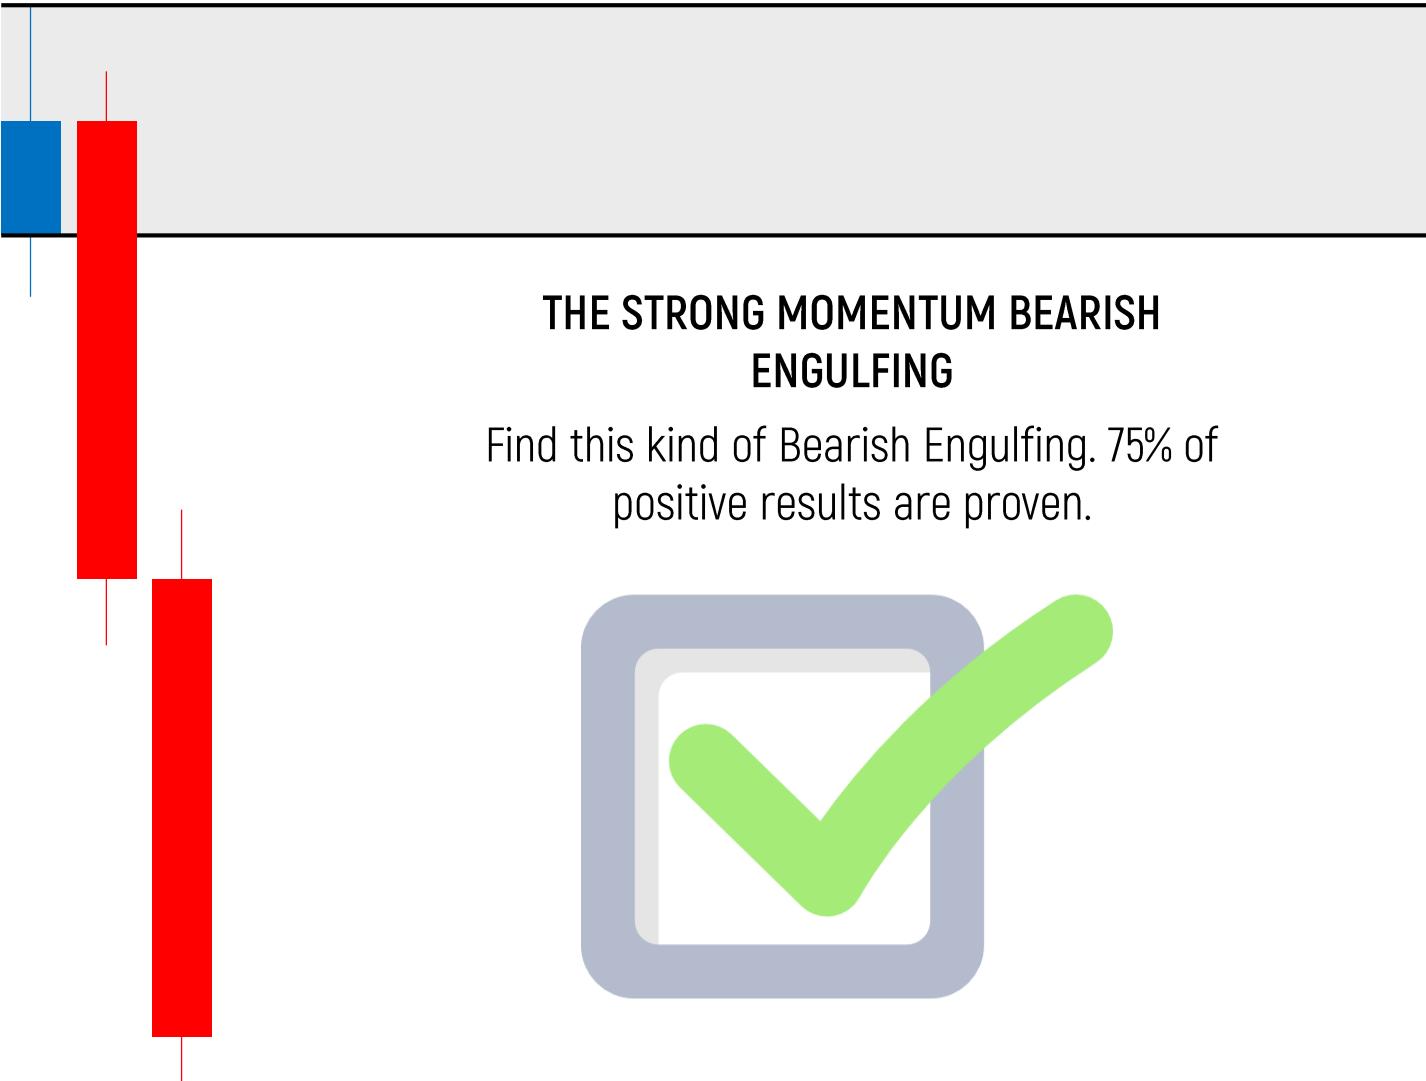

THE STRONG MOMENTUM BEARISH ENGULFING

THE STRONG MOMENTUM BEARISH ENGULFING

A Bearish Engulfing at the MPL Sell Zone that is followed by another Bearish Marubozu.

THE STRONG MOMENTUM BEARISH ENGULFING

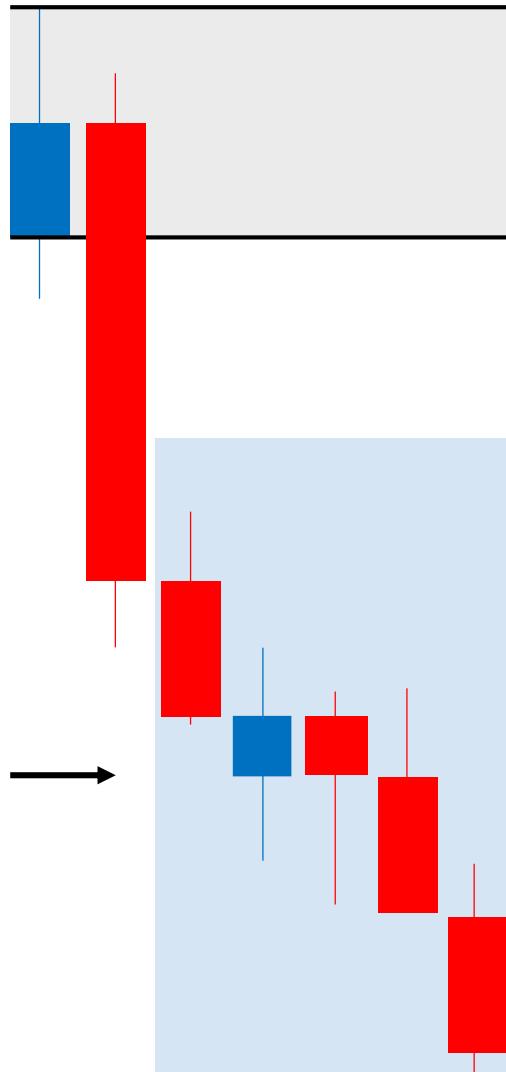

THE STRONG MOMENTUM BEARISH ENGULFING

Find this kind of Bearish Engulfing. 75% of positive results are proven.

THE WEAK MOMENTUM BEARISH ENGULFING

This Bearish Engulfing
is followed by small
weak candles with
lots of wicks.

THE WEAK MOMENTUM BEARISH ENGULFING

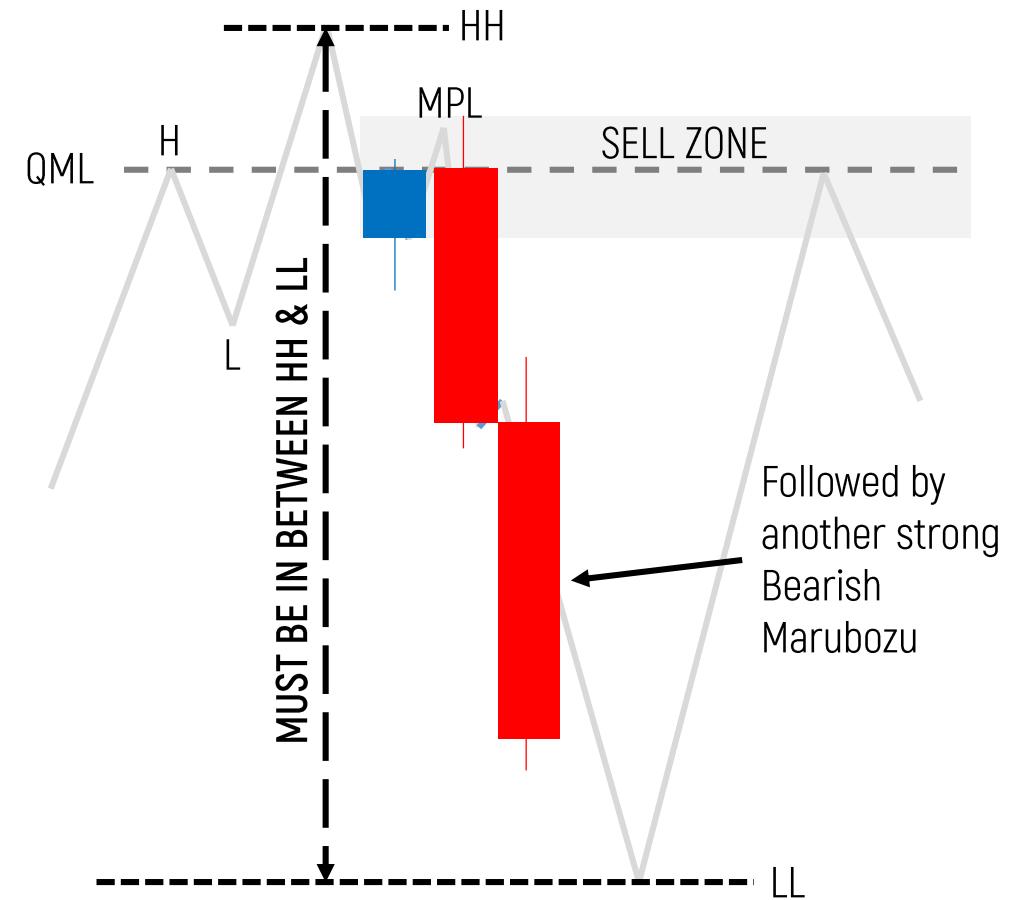

Try to avoid this kind of Bearish Engulfing. The result would be 50-50 as the risk of price breaking the zone is also imminent.

THE STRONG MOMENTUM BEARISH ENGULFING

THE RULES FOR THE STRONG MOMENTUM BEARISH ENFULFING

1. It has to be **IN BETWEEN** the Higher High (HH) and Lower Low (LL)
2. The Bearish Engulfing has to be **followed by another strong Bearish Marubozu.**

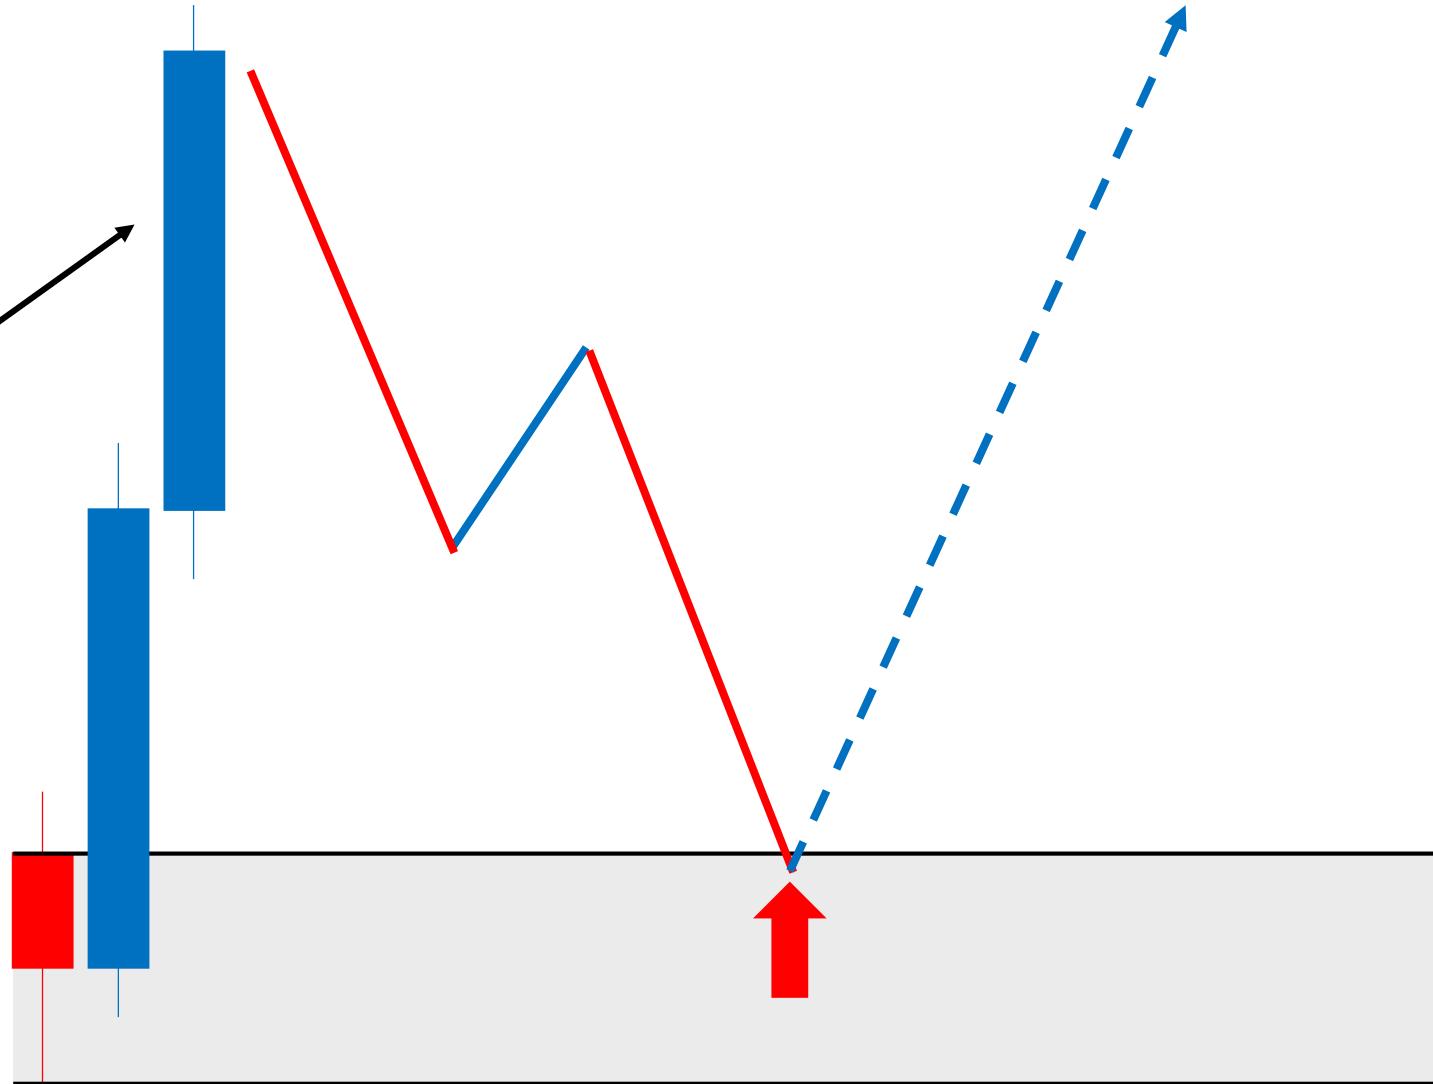

BUY SETUP

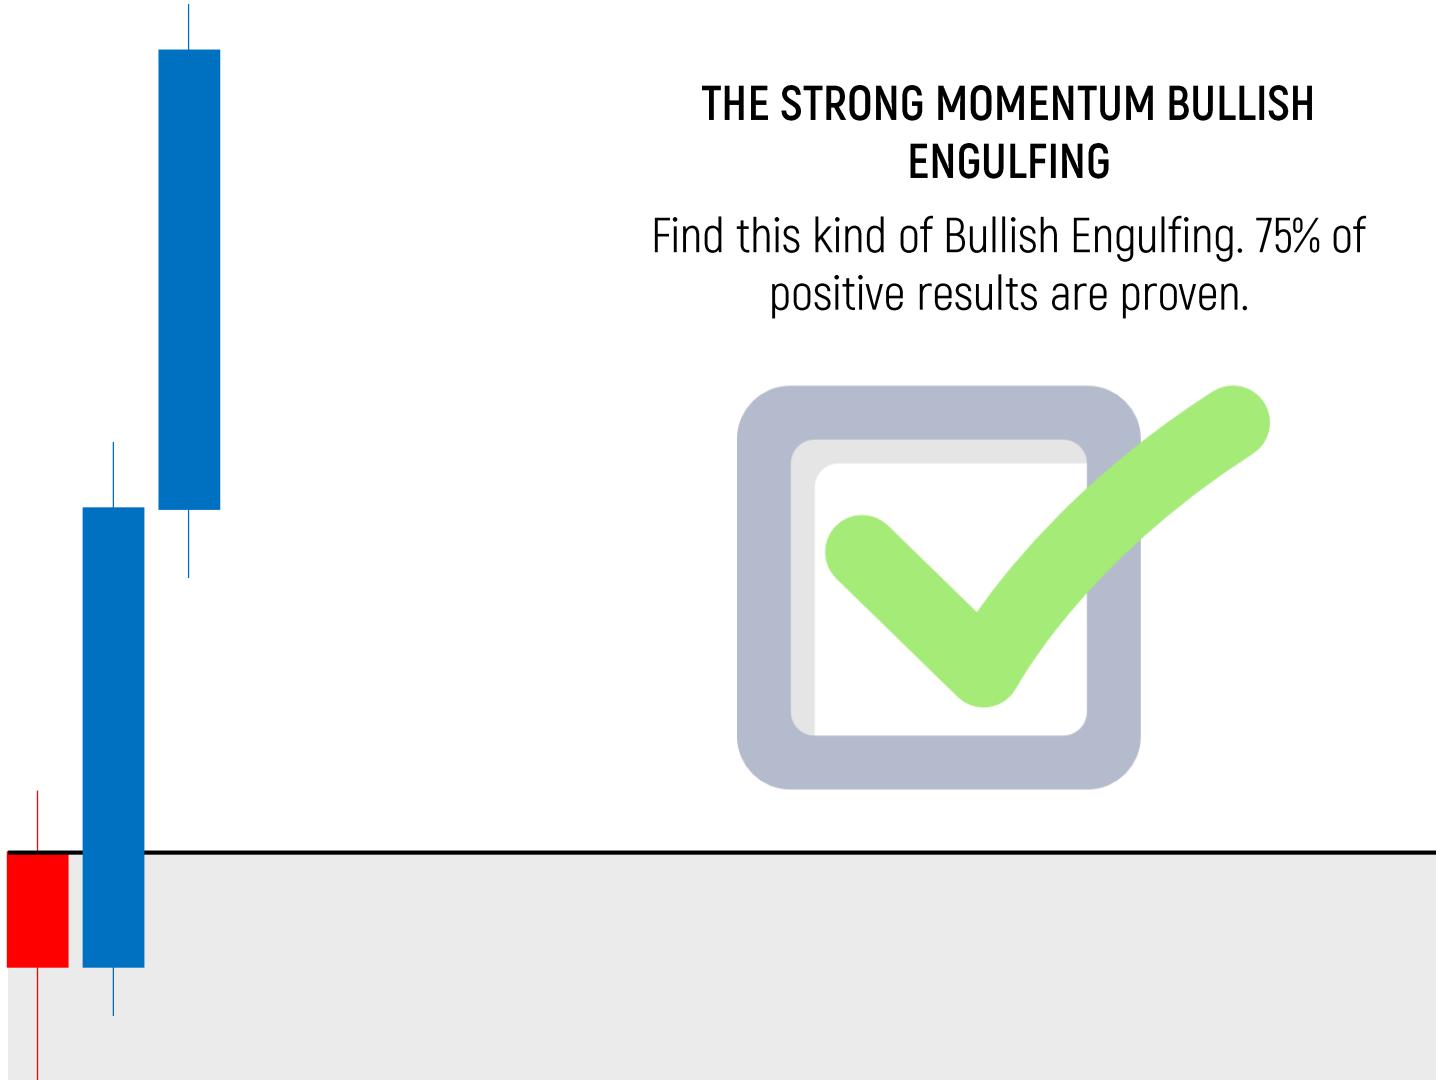

THE STRONG MOMENTUM BULLISH ENGULFING

THE STRONG MOMENTUM BULLISH ENGULFING

A Bullish Engulfing at the MPL Sell Zone that is followed by another Bullish Marubozu.

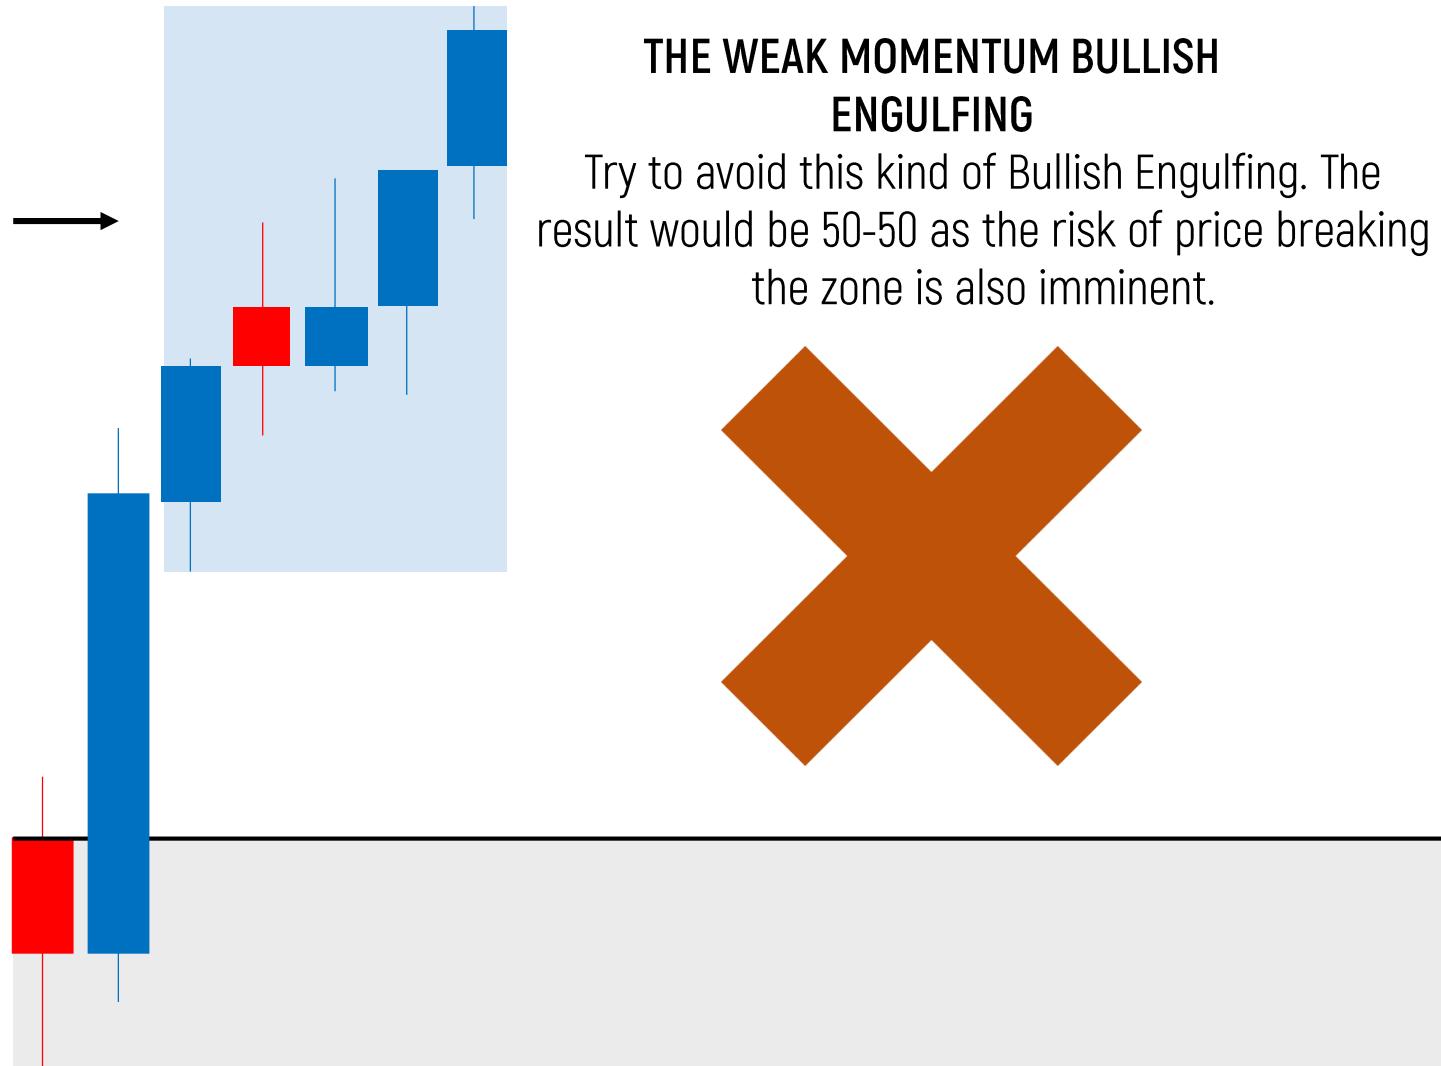

THE STRONG MOMENTUM BULLISH ENGULFING

THE STRONG MOMENTUM BULLISH ENGULFING

This Bullish Engulfing is followed by small weak candles with lots of wicks.

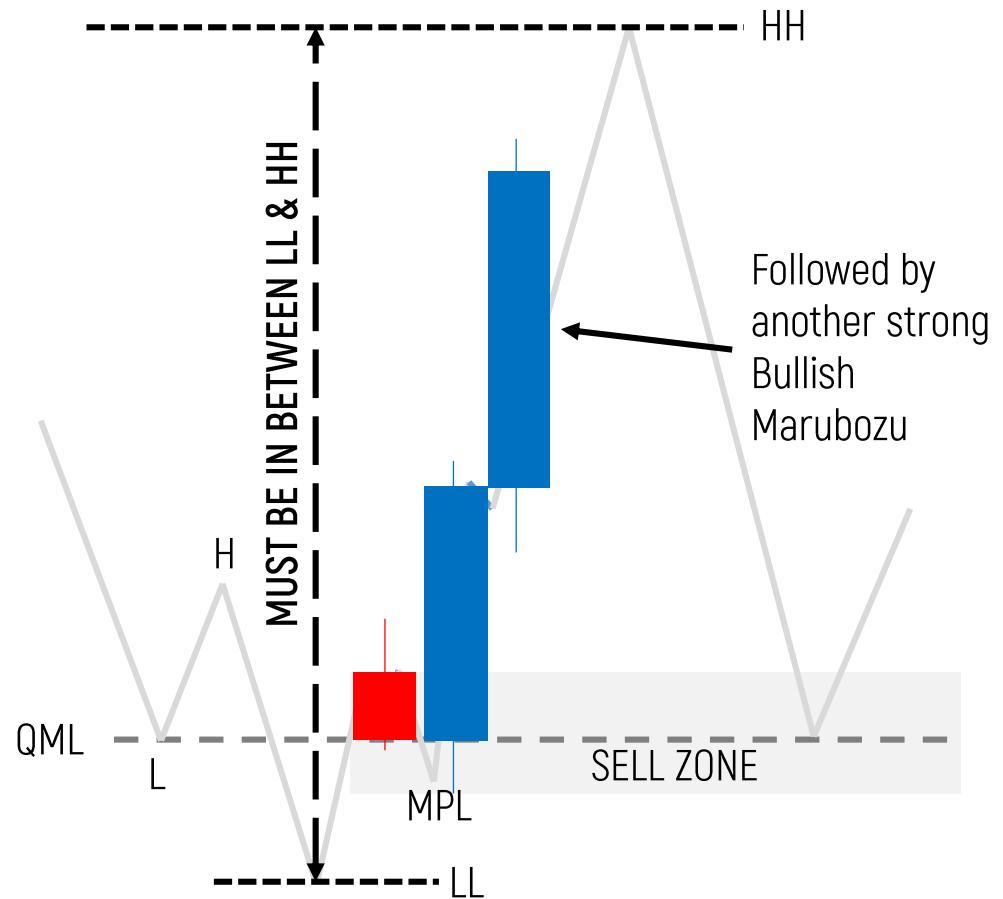

THE WEAK MOMENTUM BULLISH ENGULFING

Try to avoid this kind of Bullish Engulfing. The result would be 50-50 as the risk of price breaking the zone is also imminent.

THE STRONG MOMENTUM BULLISH ENGULFING

THE RULES FOR THE STRONG MOMENTUM BULLISH ENFULFING

1. It has to be **IN BETWEEN** the **Lower Low (LL)** and **Higher High (HH)**
2. The Bullish Engulfing has to be **followed by another strong Bullish Marubozu.**

CHAPTER 5

Role Reversal

Role Reversal 101

Understanding SR Flip and RS Flip at a Glance

Why is the Role Reversal so Important?

This Role Reversal is used to mark the significant zone when there is a Clean Breakout that breaks either Previous Support or Previous Resistant.

SR FLIP

What is SR Flip?

SR Flip is a short form of Support and Resistant Flip. This is one of the Price Action that gives us the clue of how the Price behave. SR Flip is a signal of continuation of a Bearish trend.

The appearance of SR Flip is also prominent in the formation of fakeouts. In actual, the fakeouts are the SR Flip too.

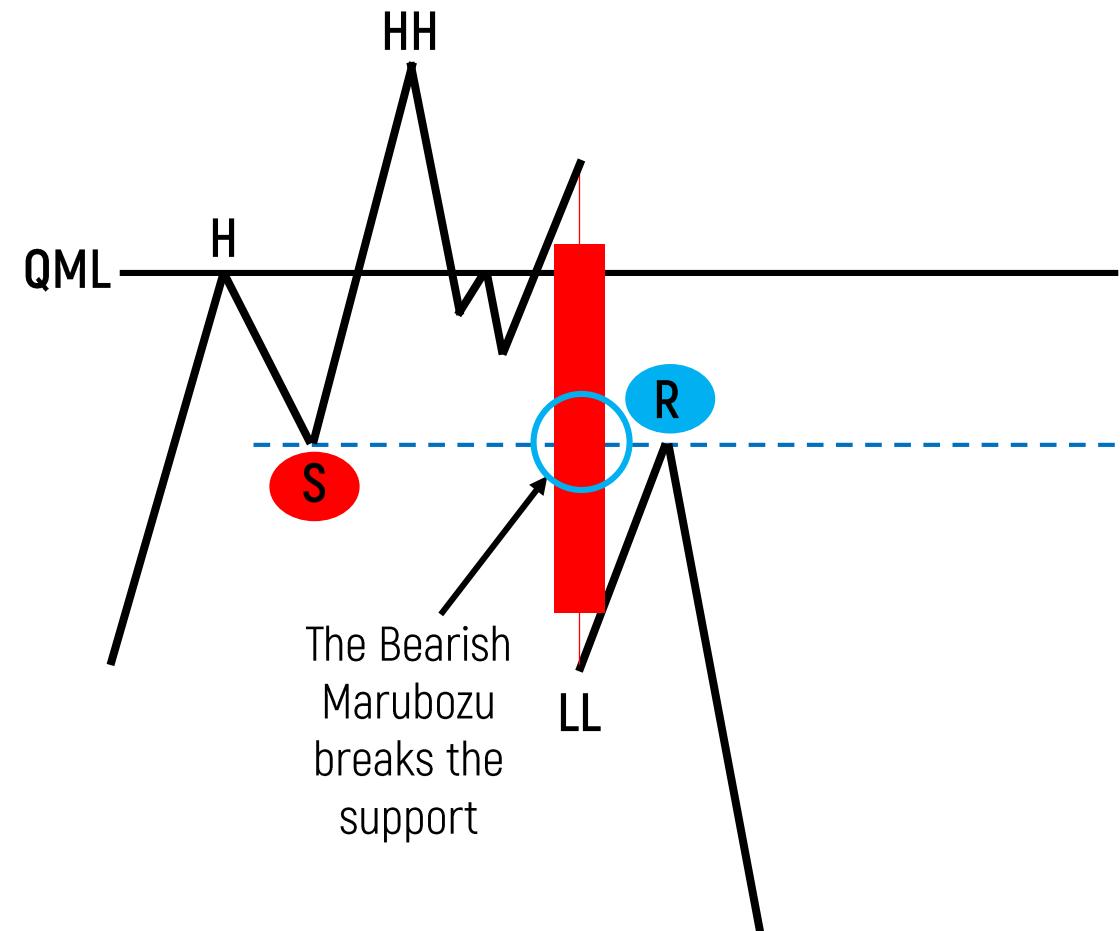

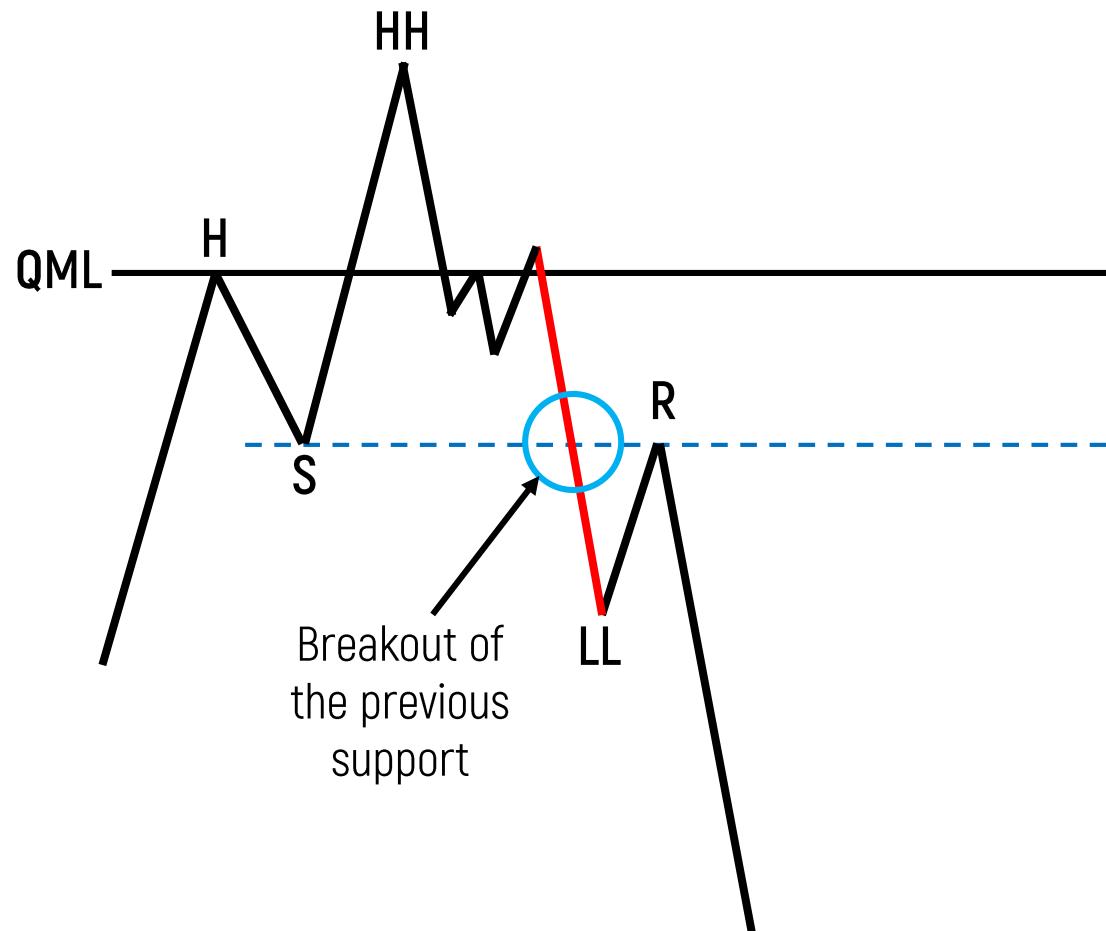

How do we identify SR Flip?

We identify the SR Flip when there is a Clean Breakout of the previous support. This previous support is broken by a single Bearish candle. That is why it is called Clean Breakout.

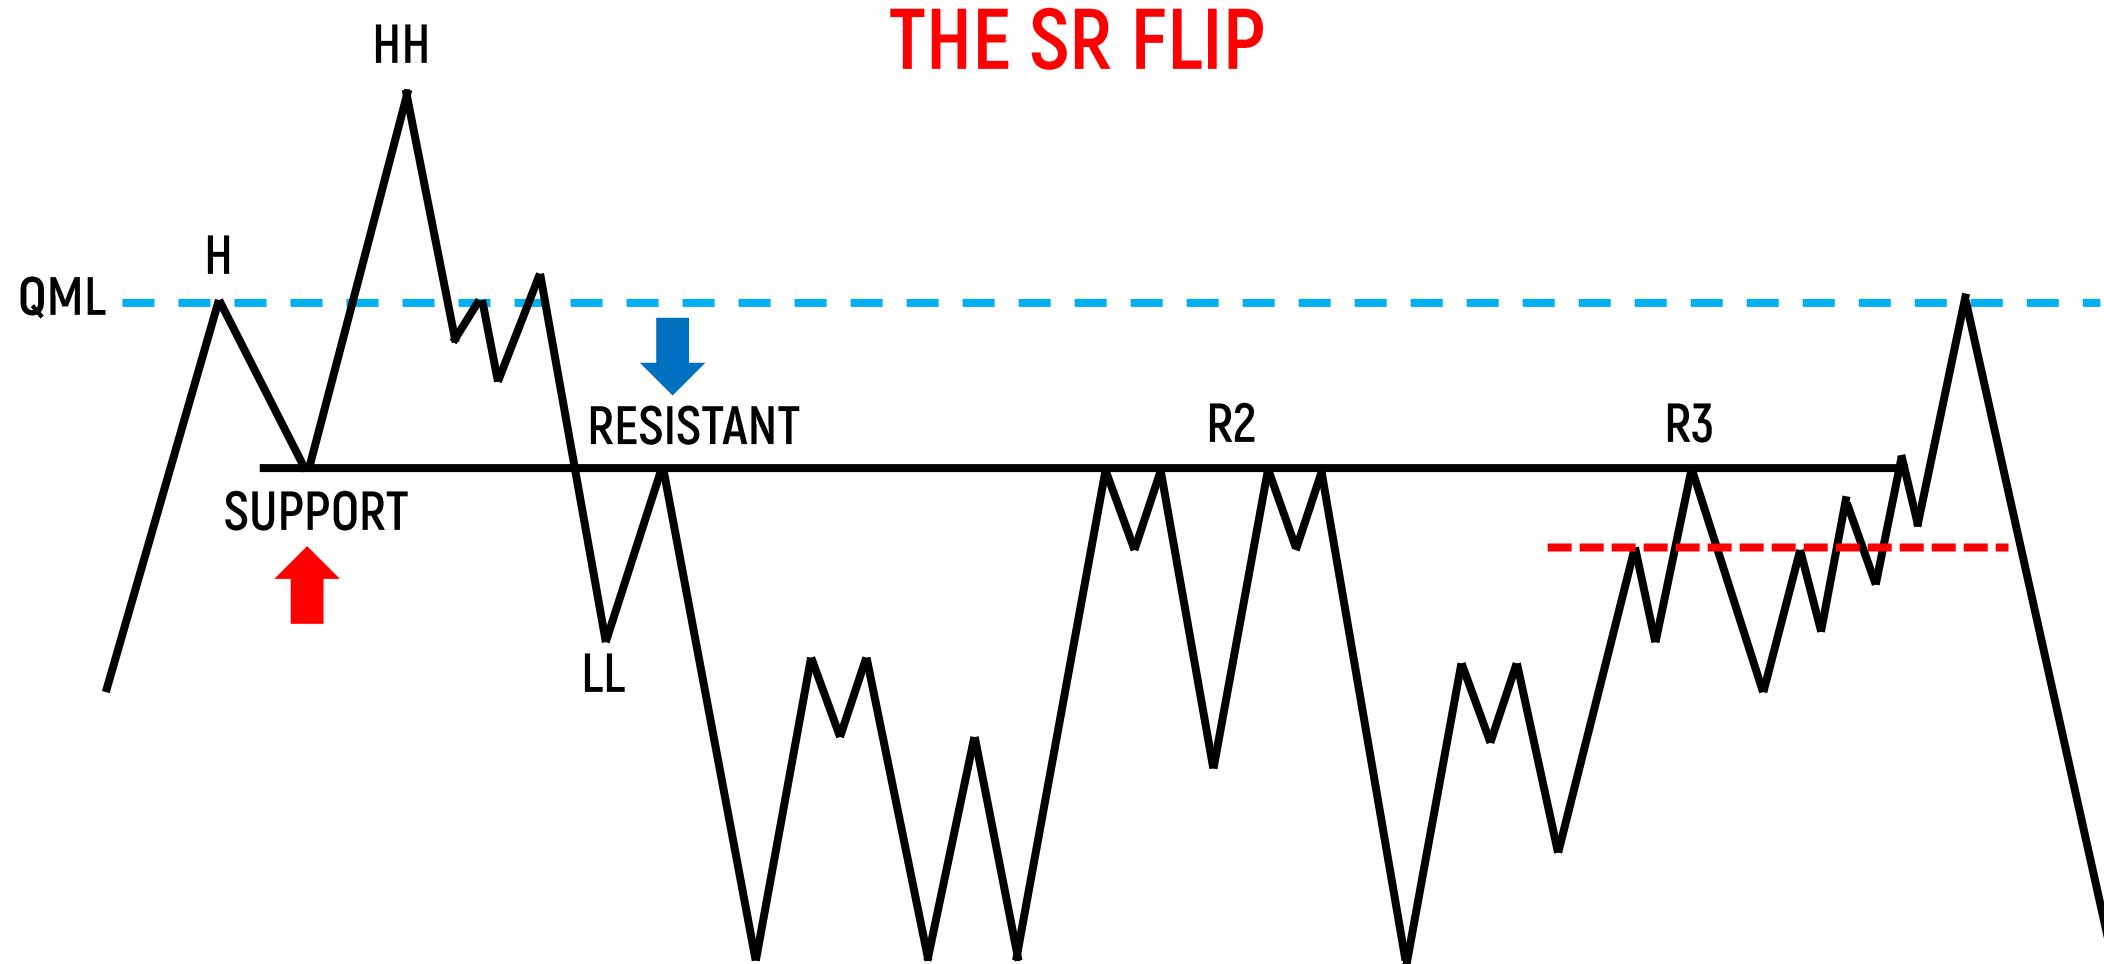

After the Clean Breakout, the price returns to the previous support to become resistant. Support, Breakout, Resistant. A clear Role Reversal.

RS FLIP

What is RS Flip?

RS Flip is a short form of Resistant and Support Flip. This is one of the Price Action that gives us the clue of how the Price behave. RS Flip is a signal of continuation of a Bullish trend.

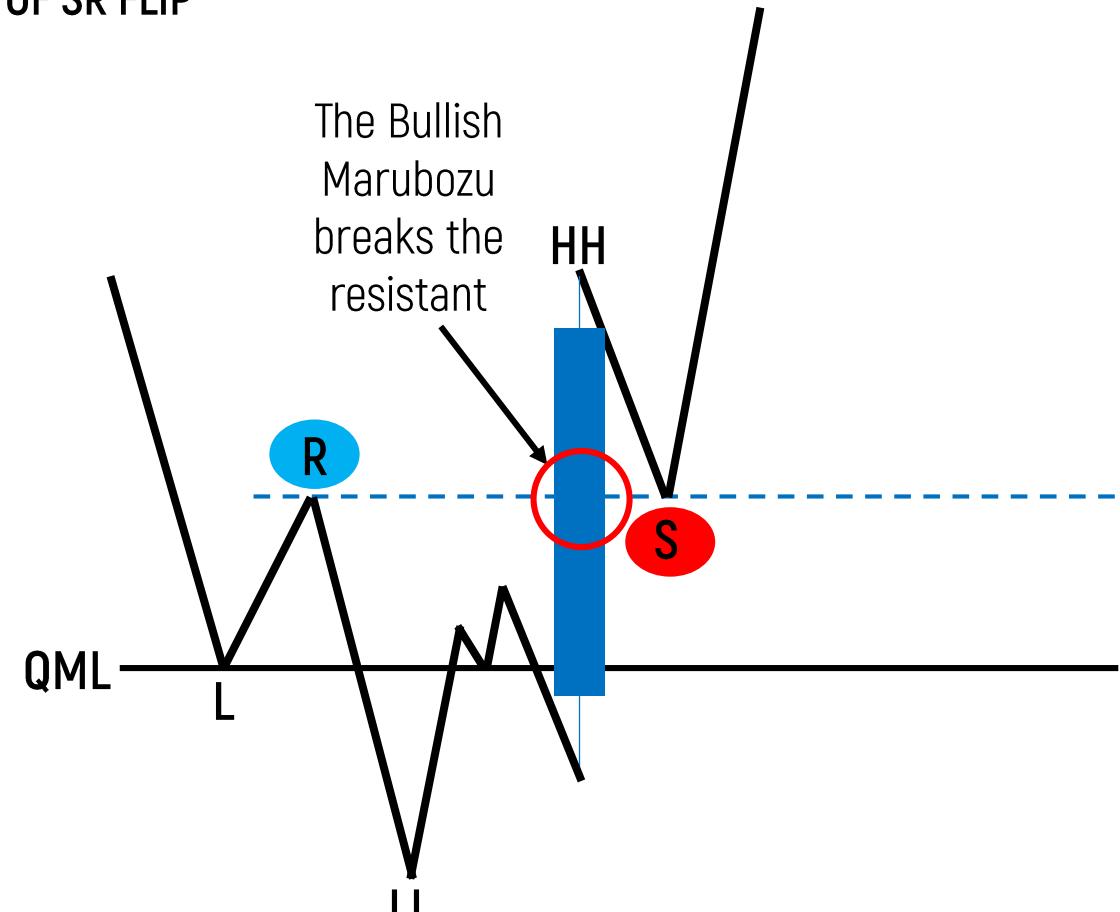

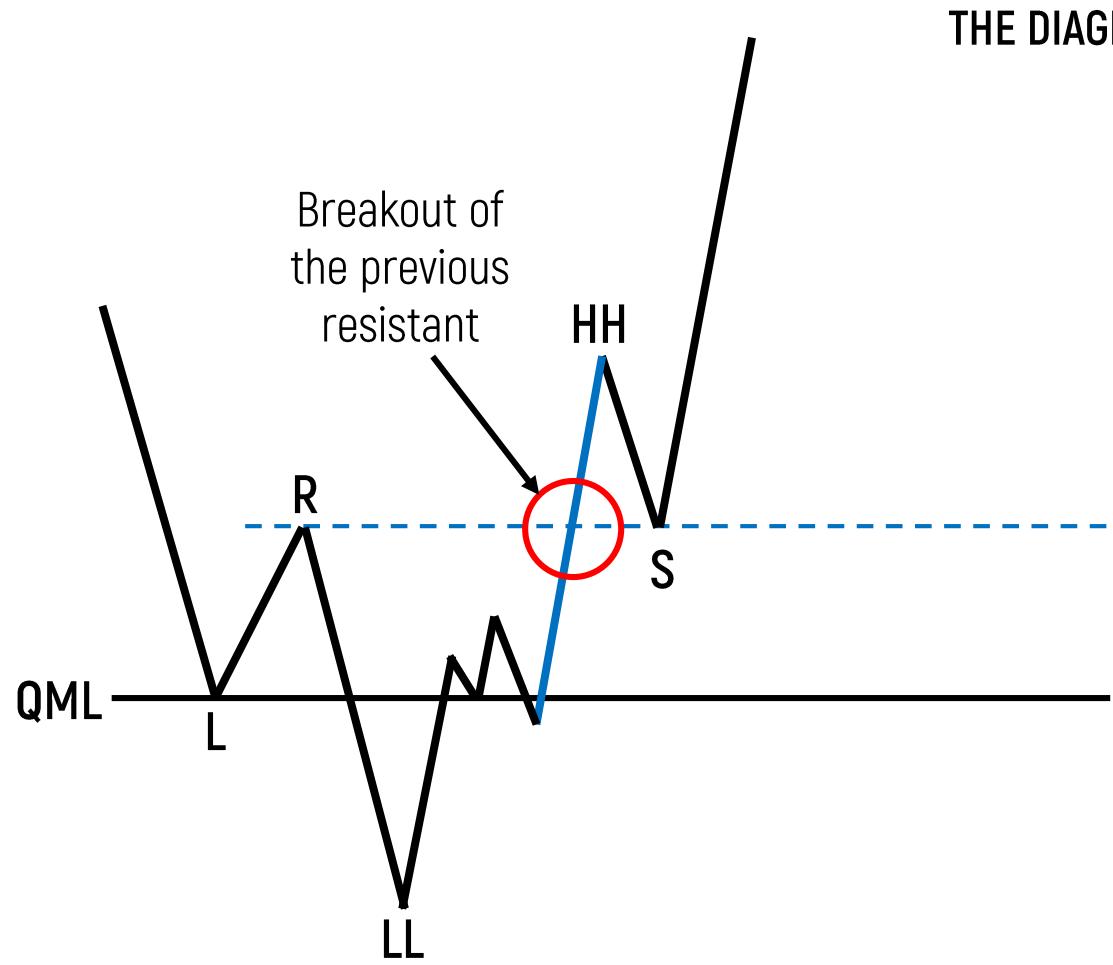

Like its SR Flip sibling, the appearance of RS Flip is also prominent in the formation of fakeouts.

How do we identify RS Flip?

We identify the RS Flip when there is a Clean Breakout of the previous resistant. This previous resistant is broken by a single Bullish candle. That is why it is called Clean Breakout.

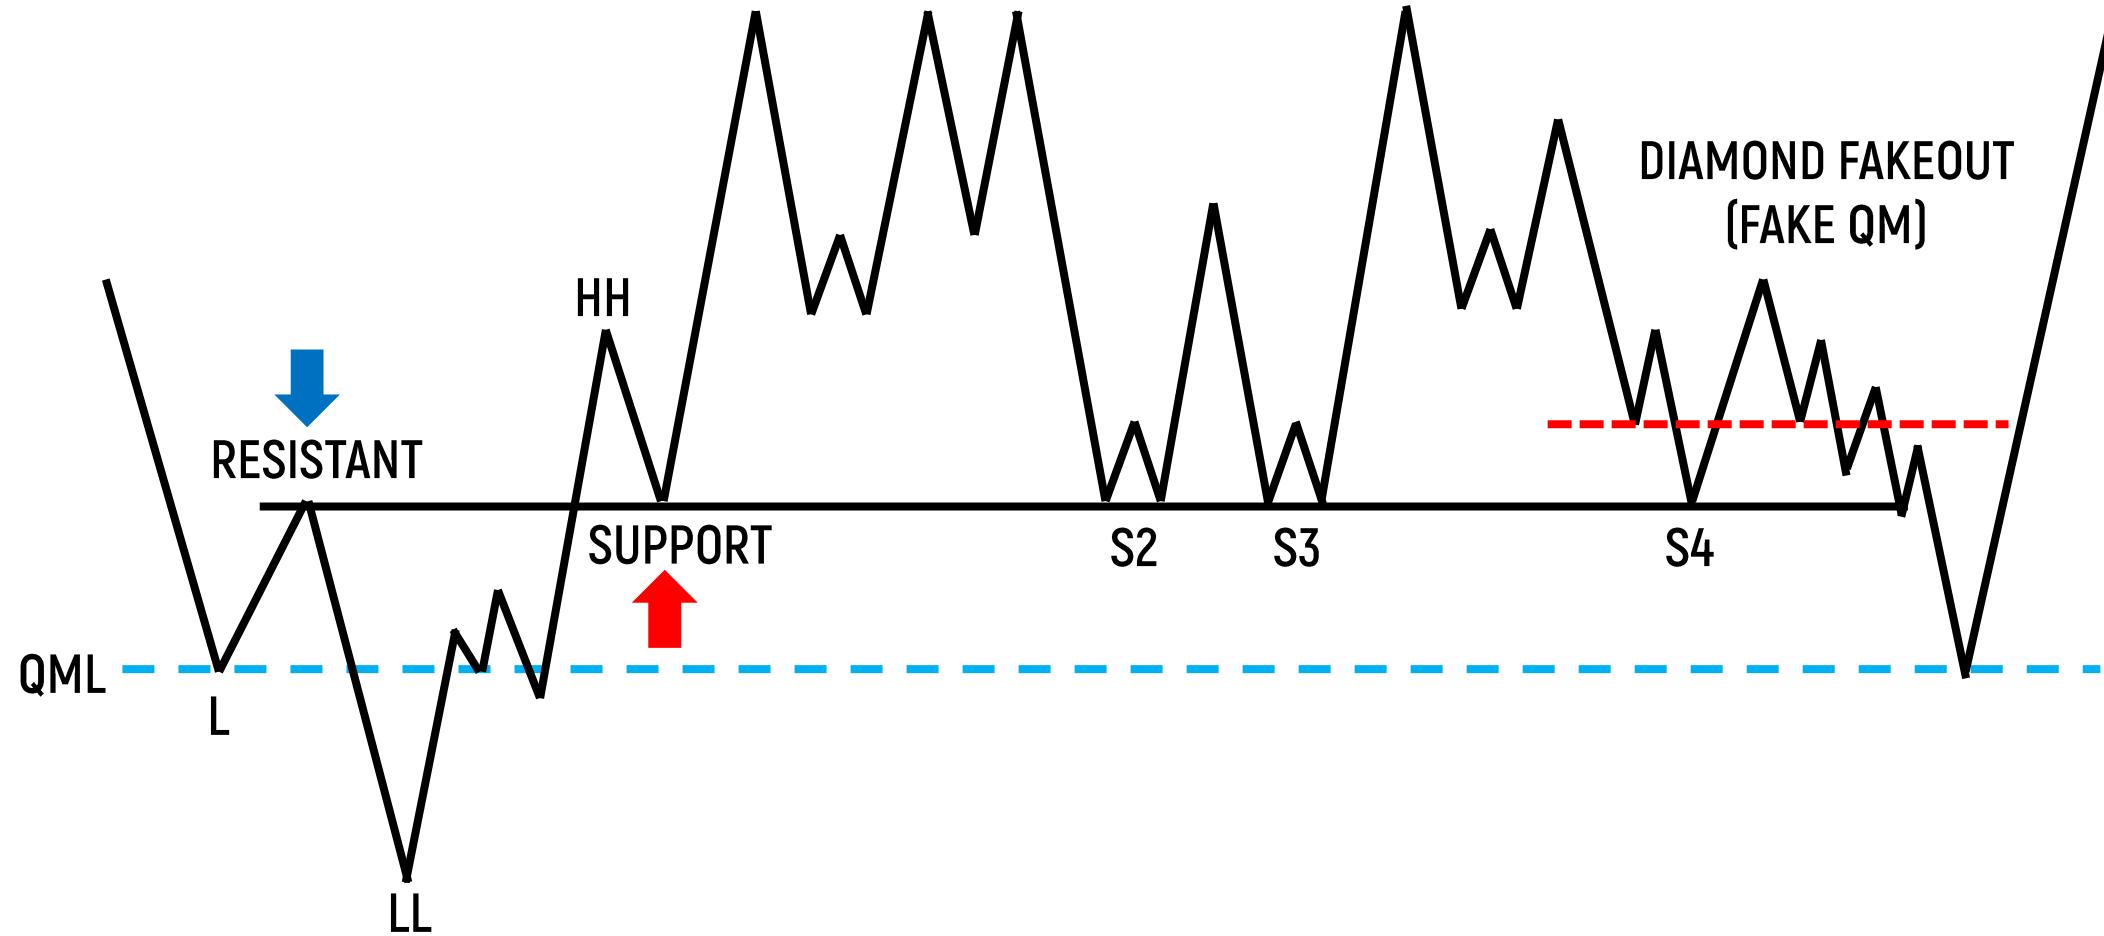

After the Clean Breakout, the price returns to the previous resistant to become support. Resistant, Breakout, Support. A clear Role Reversal.

CHAPTER 5

Fakeouts

FAKEOUT 101

Understanding Fakeouts and its Significance

What is Fakeout?

Fakeout is referred to as a fake breakout. It is a false move at one resistant or support zone to trap the retail trader from taking the sell/buy order. The fakeout is one of the ways for institutional trader to find liquidity and to make the market move towards their unfilled orders.

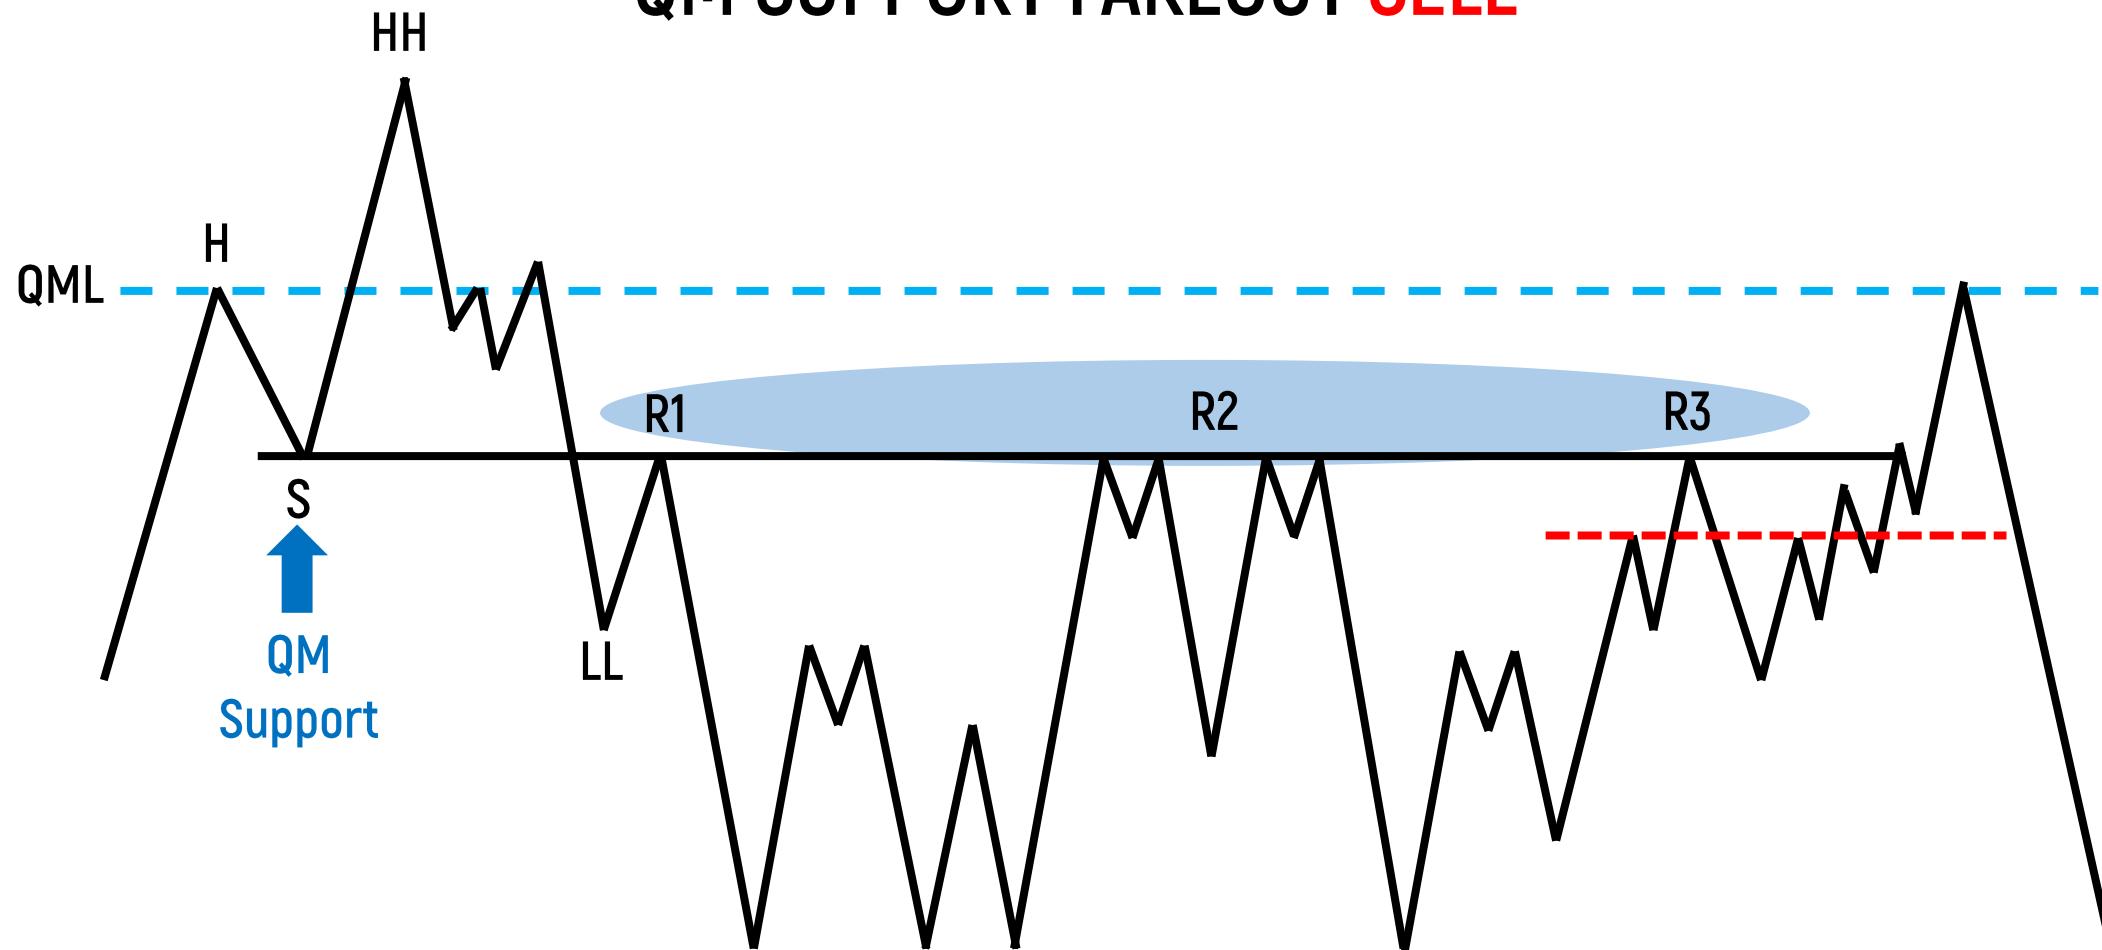

2 Styles of Fakeouts

There are 2 styles of fakeouts. The first is SR Flip from the QM Support. Second one is the SR Flip from Engulfing Support.

The QM Support Fakeout

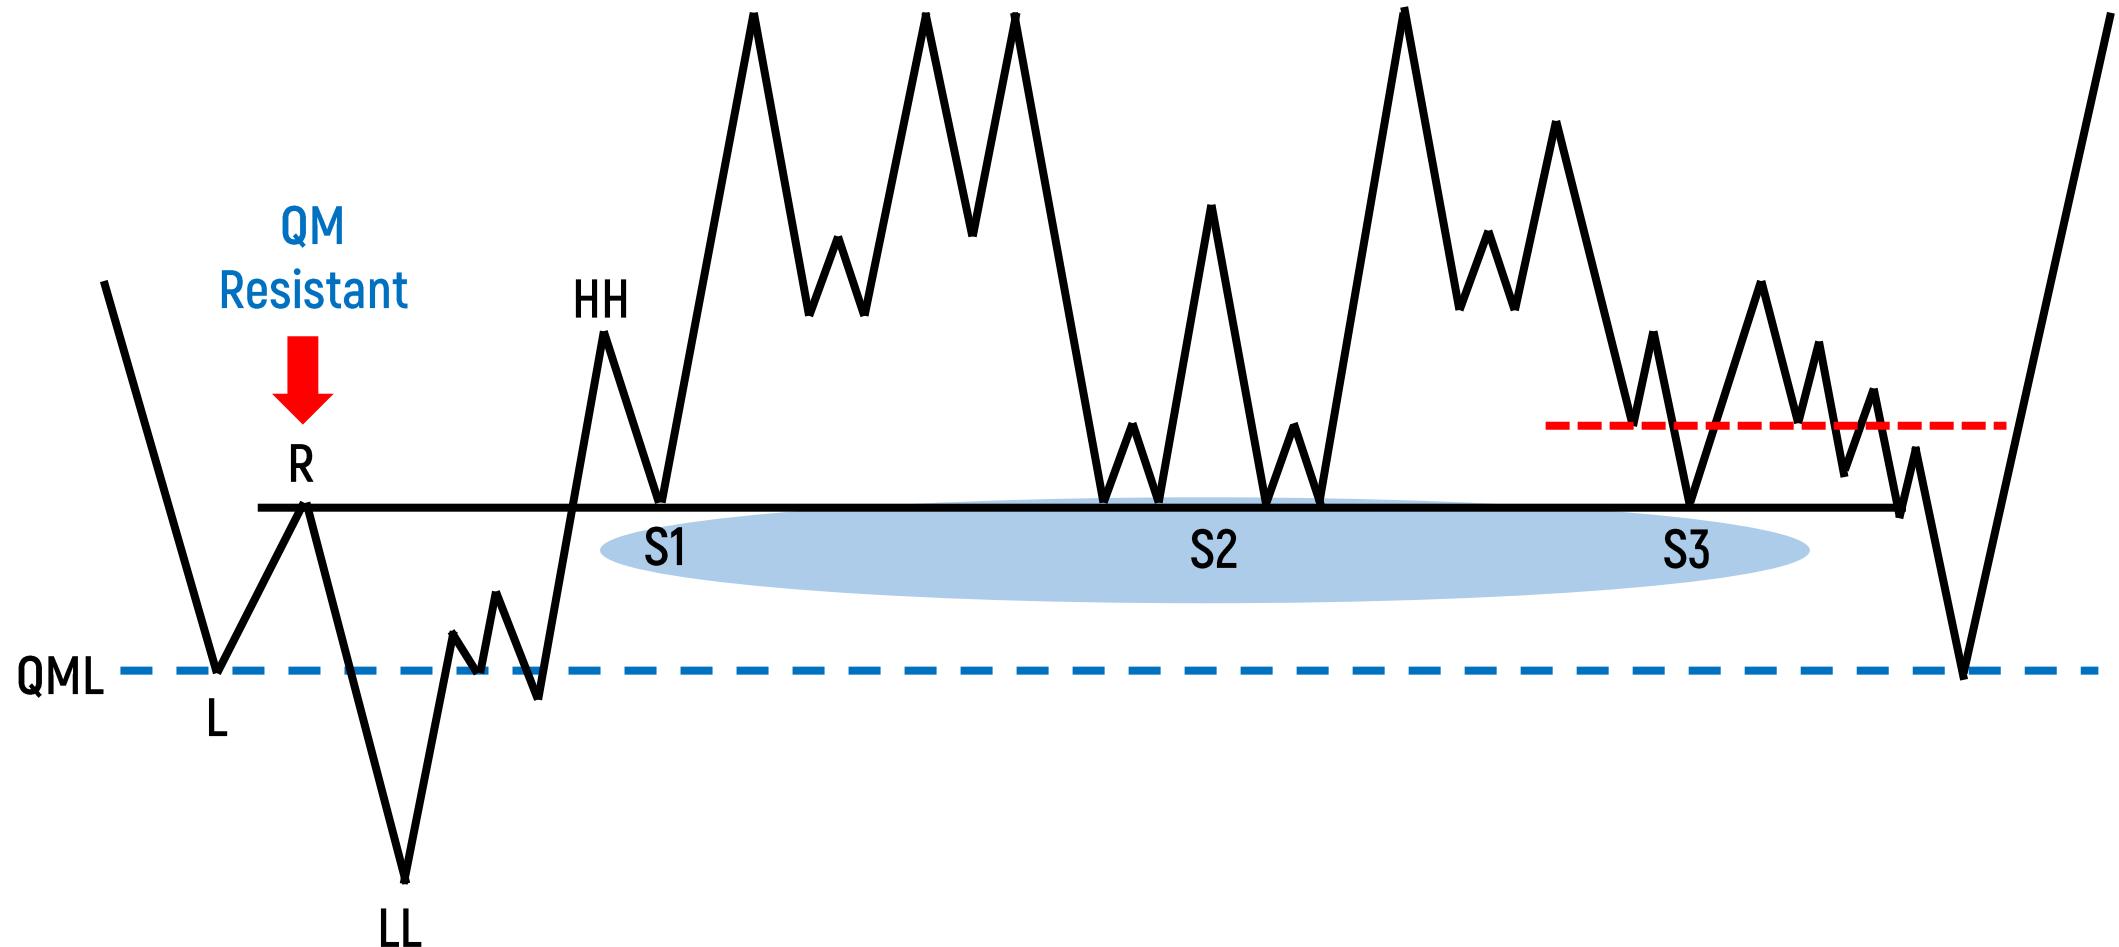

This fakeout is basically in-line with the QM Low after it breaks from the H (left shoulder).

QM SUPPORT FAKEOUT SELL

*Marked in blue shades

QM SUPPORT FAKEOUT BUY

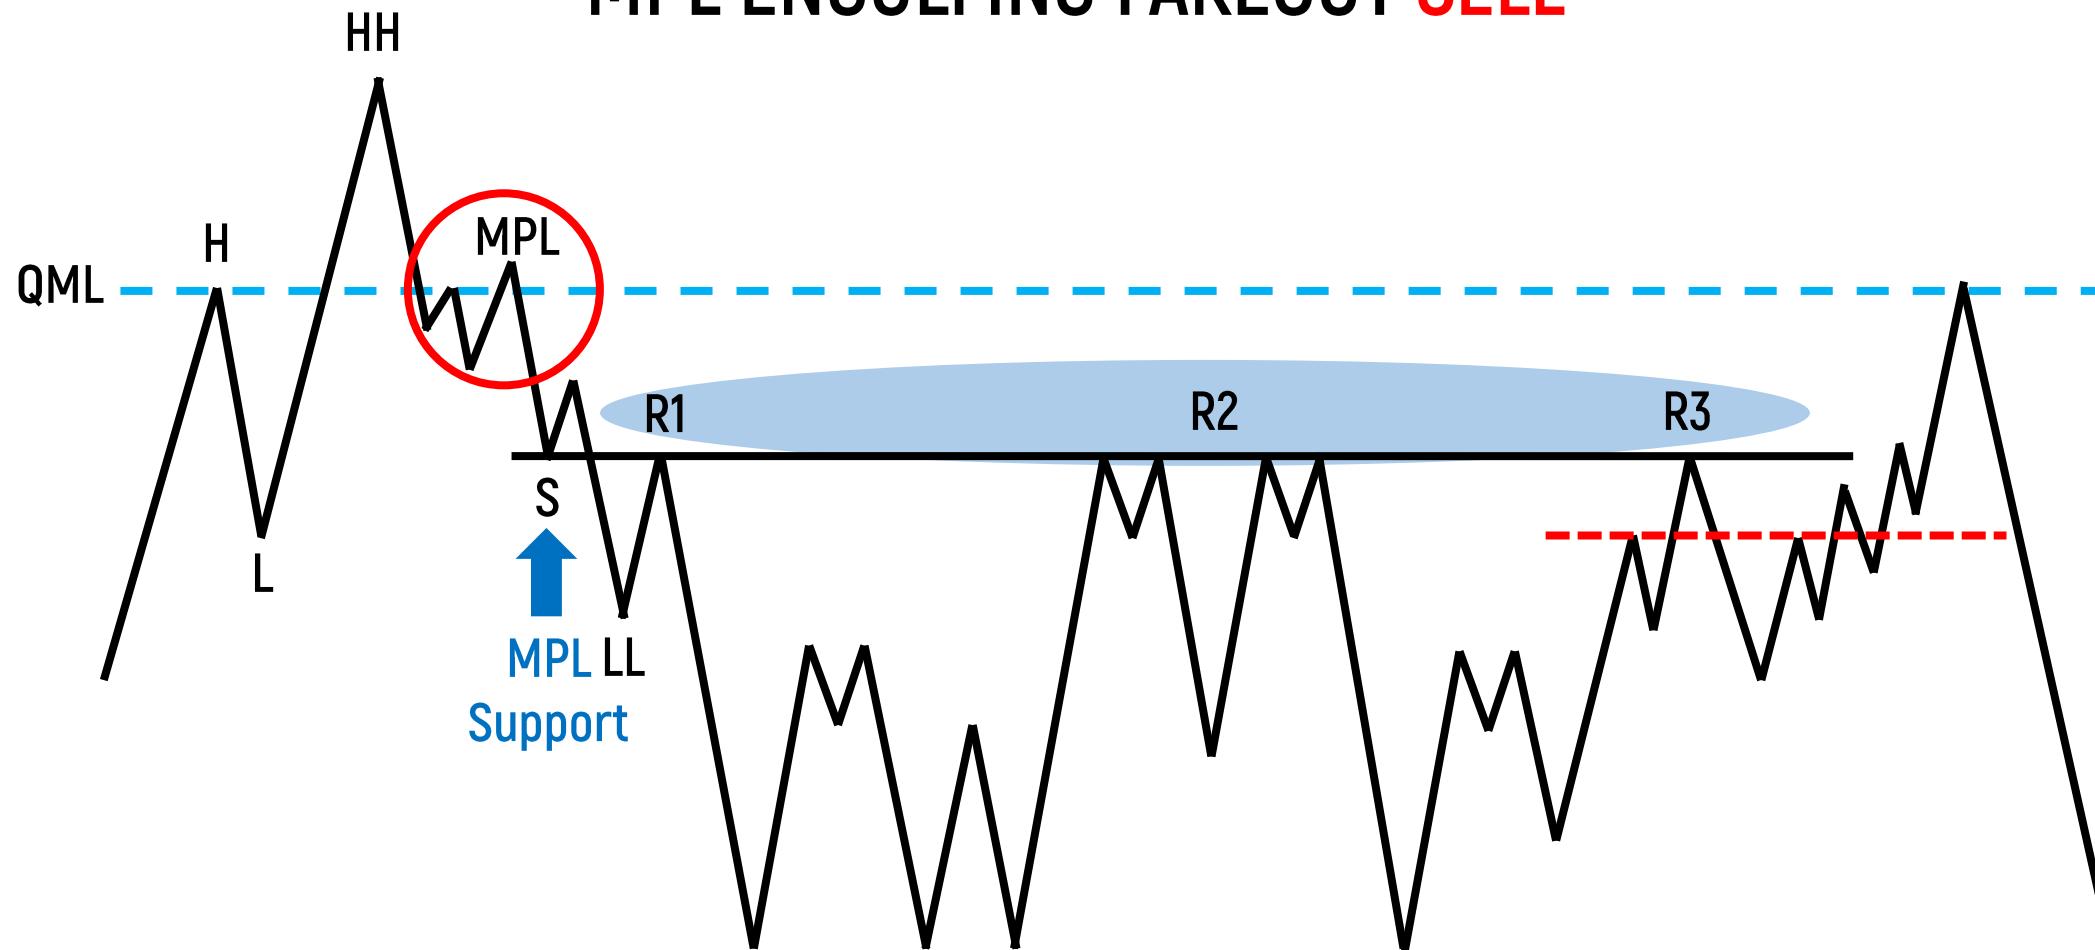

*Marked in blue shades

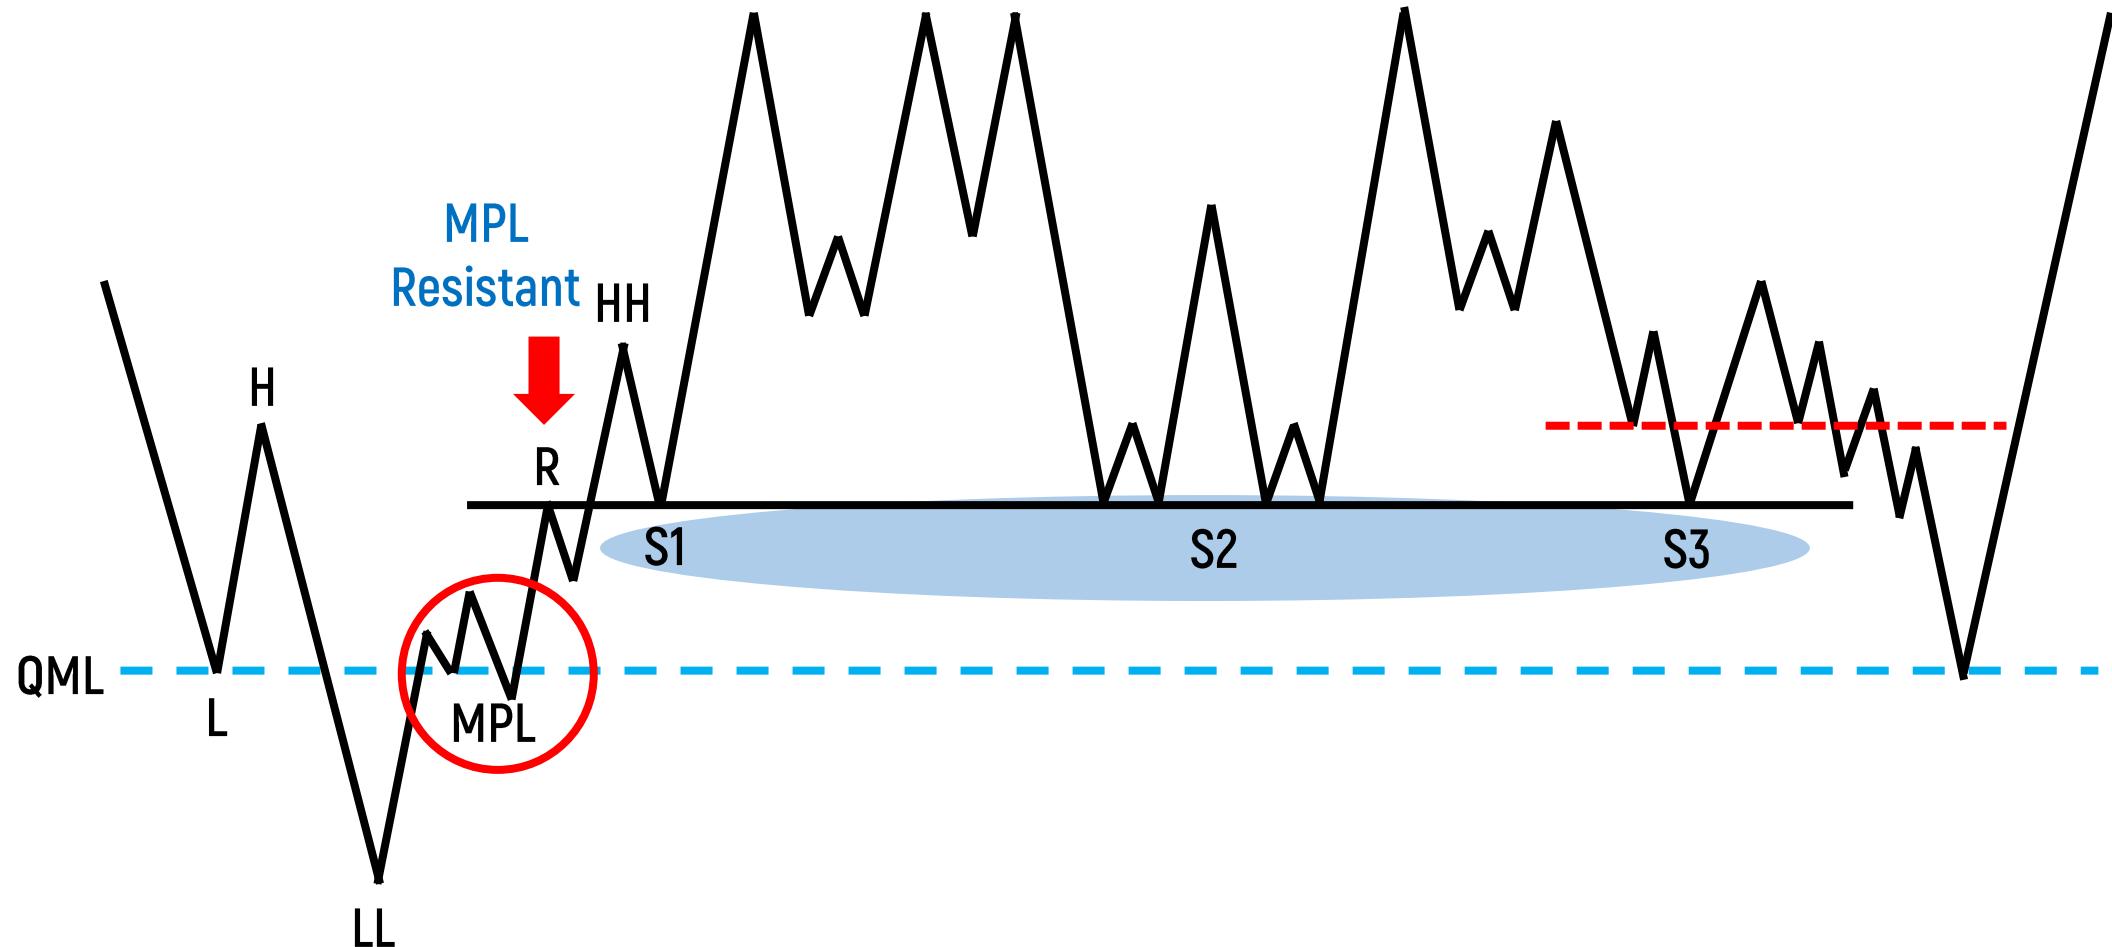

The MPL Engulfing Fakeout

This fakeout is basically in-line with the Engulfing's Low/High after it breaks from the MPL.

MPL ENGULFING FAKEOUT SELL

MPL ENGULFING FAKEOUT BUY

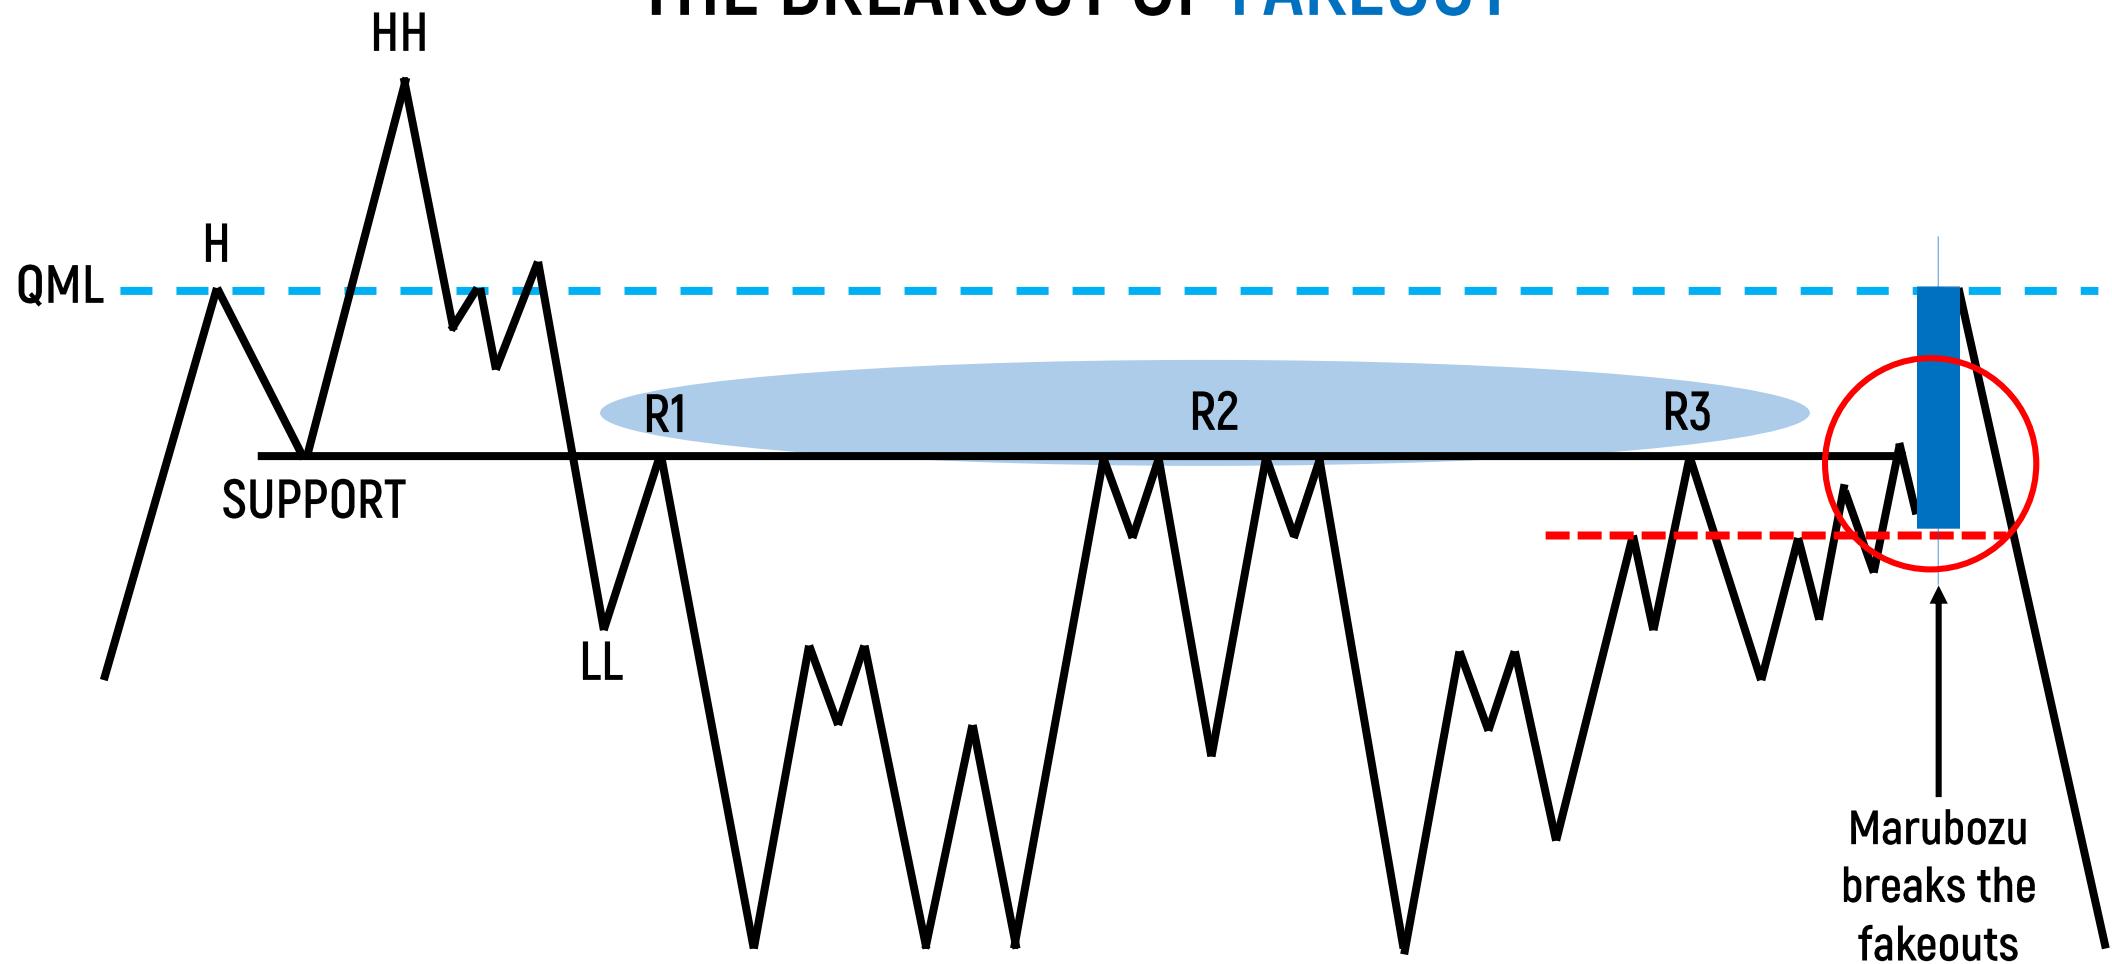

*Marked in blue shades

ONE THING About Fakeout!

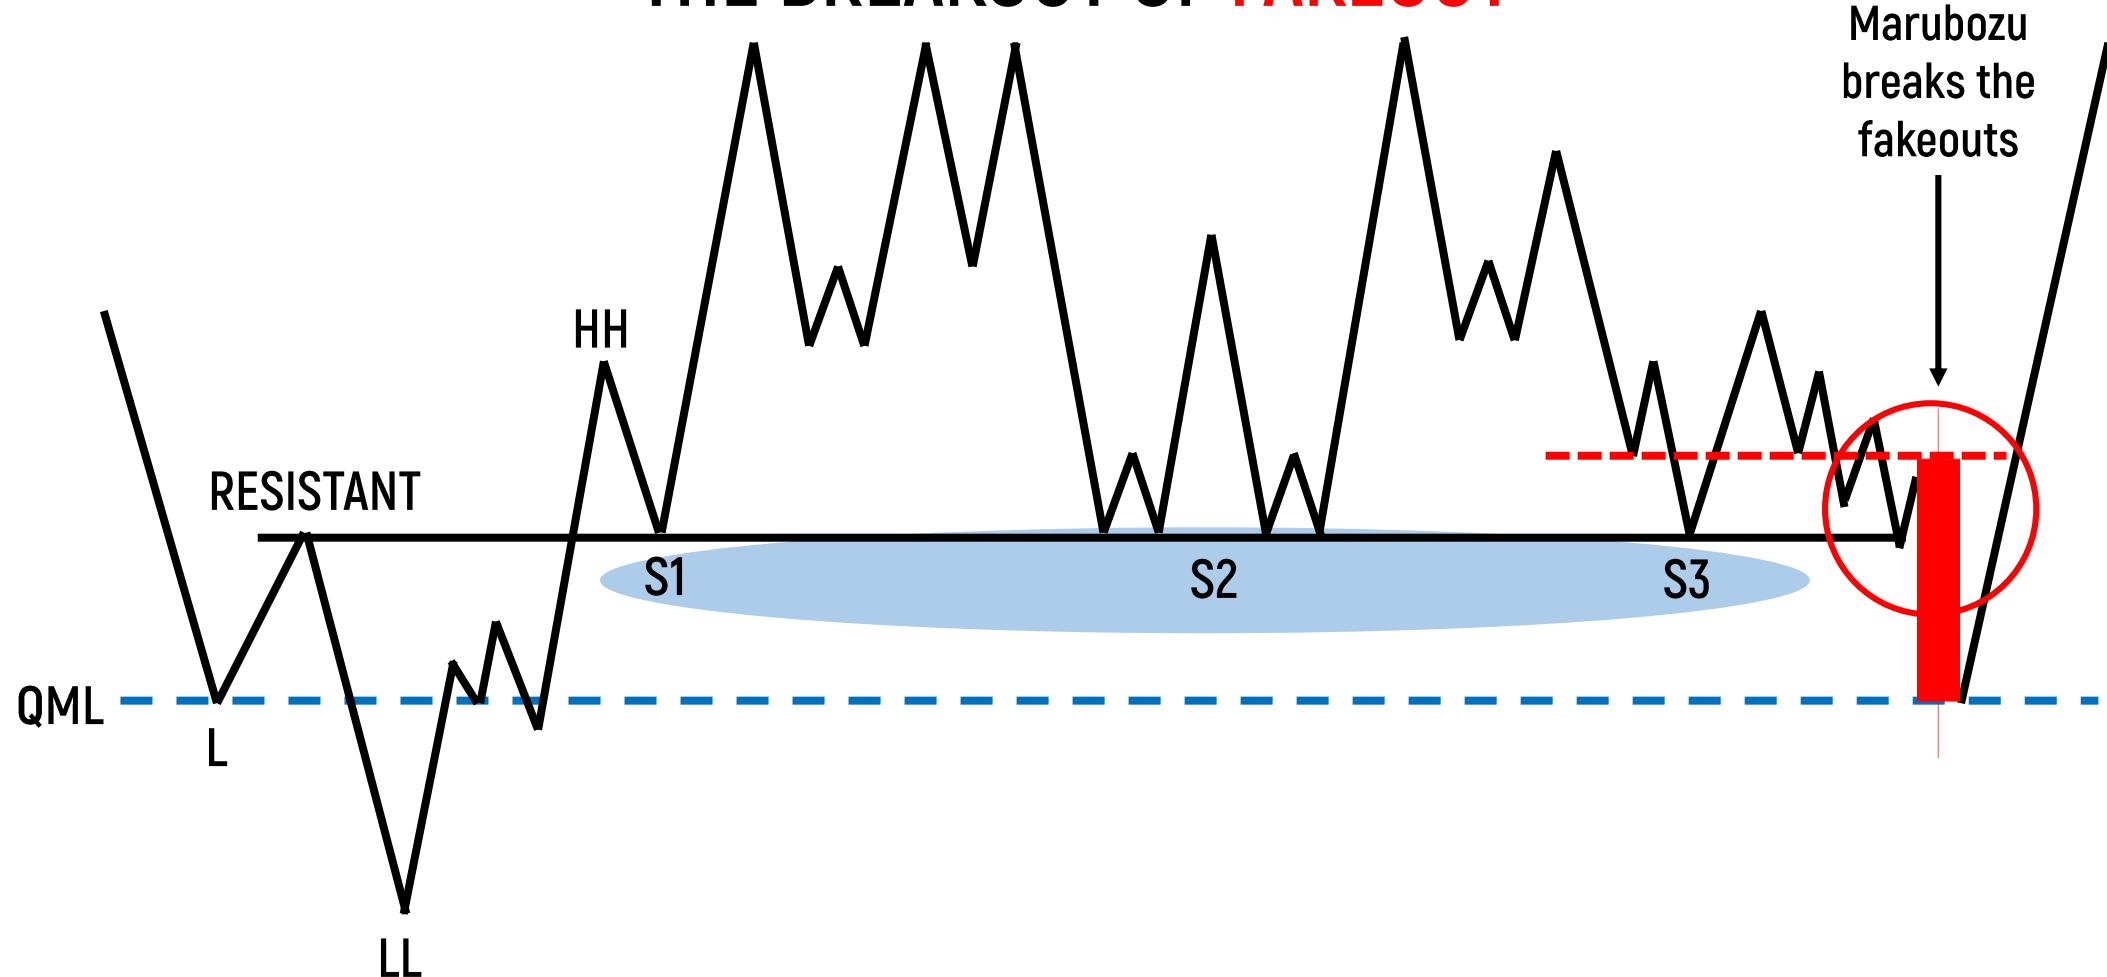

Fakeout **will be broken by one single Marubozu candle** when the price is heading for the tradable zone. Therefore, fakeout acts as an indicator to show that the tradable zone is just below/above it.

THE BREAKOUT OF FAKEOUT

*Marked in red circle

THE BREAKOUT OF FAKEOUT

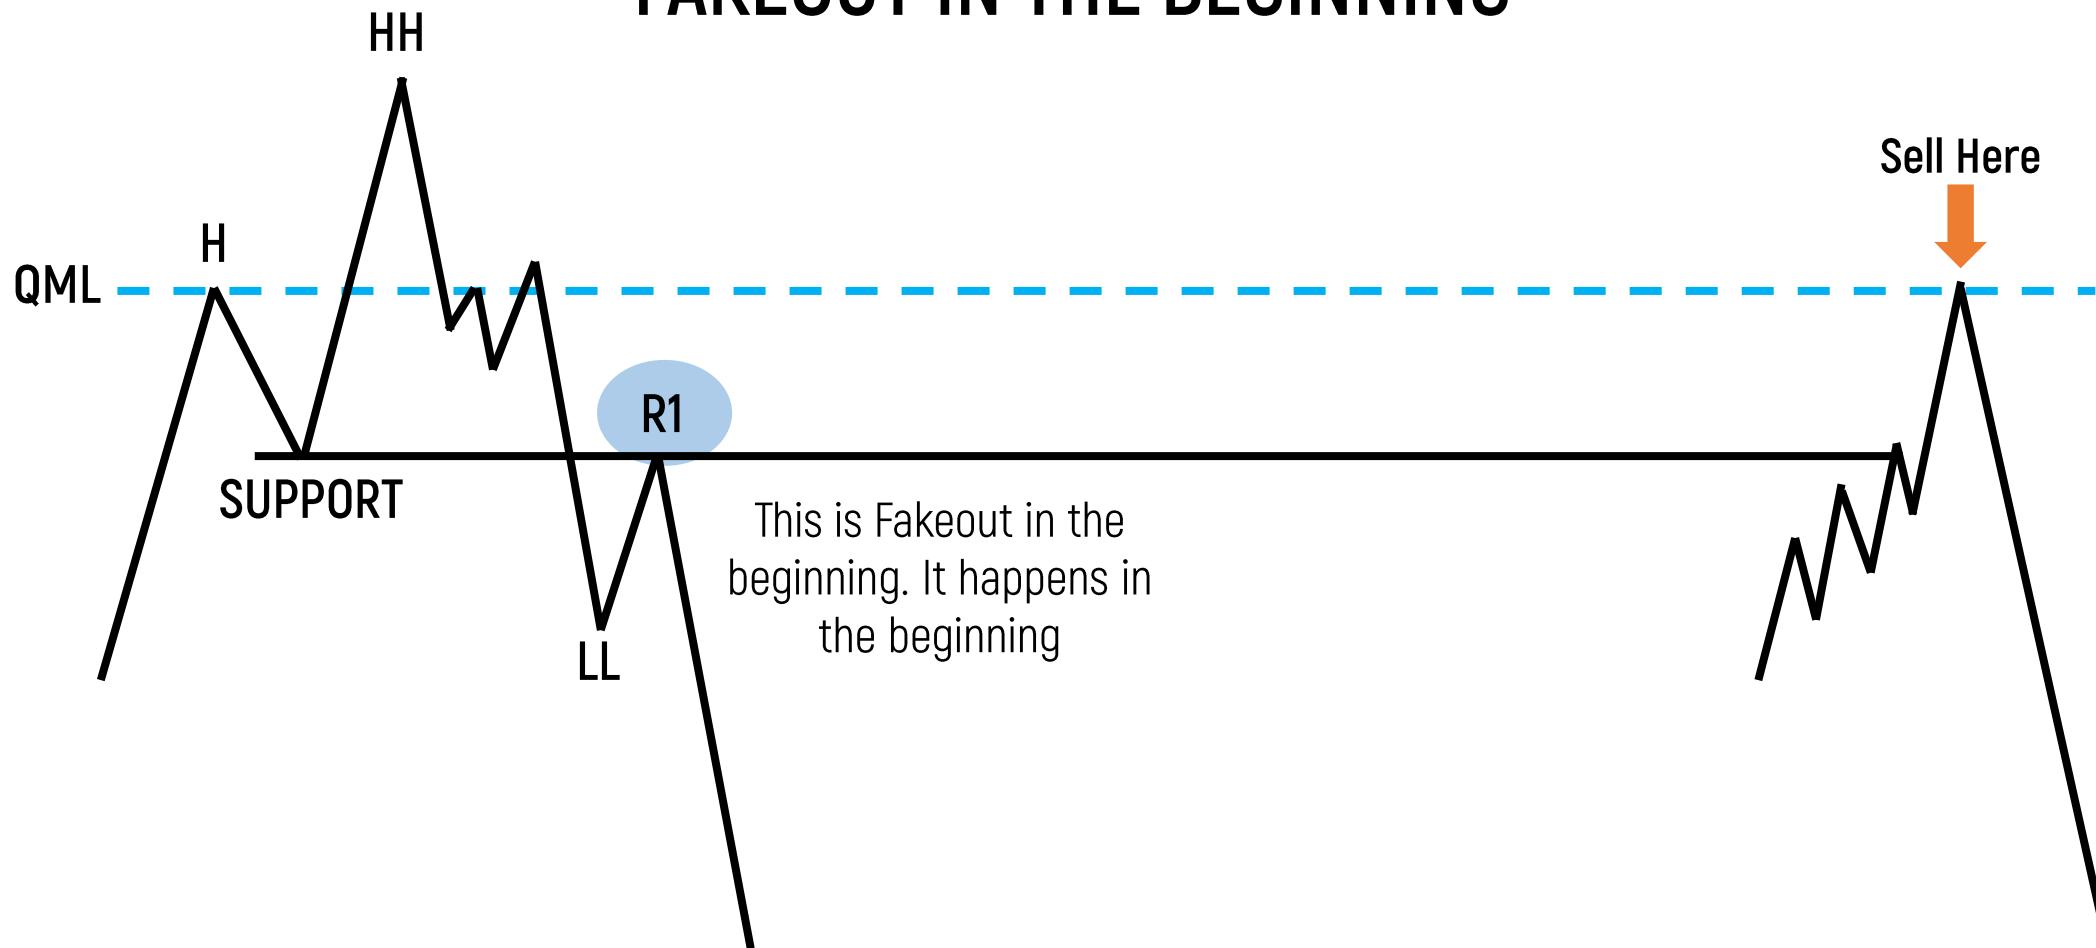

TYPES OF FAKEOUT

Recognizing the 5 FAKEOUTS

FIVE types of fakeouts

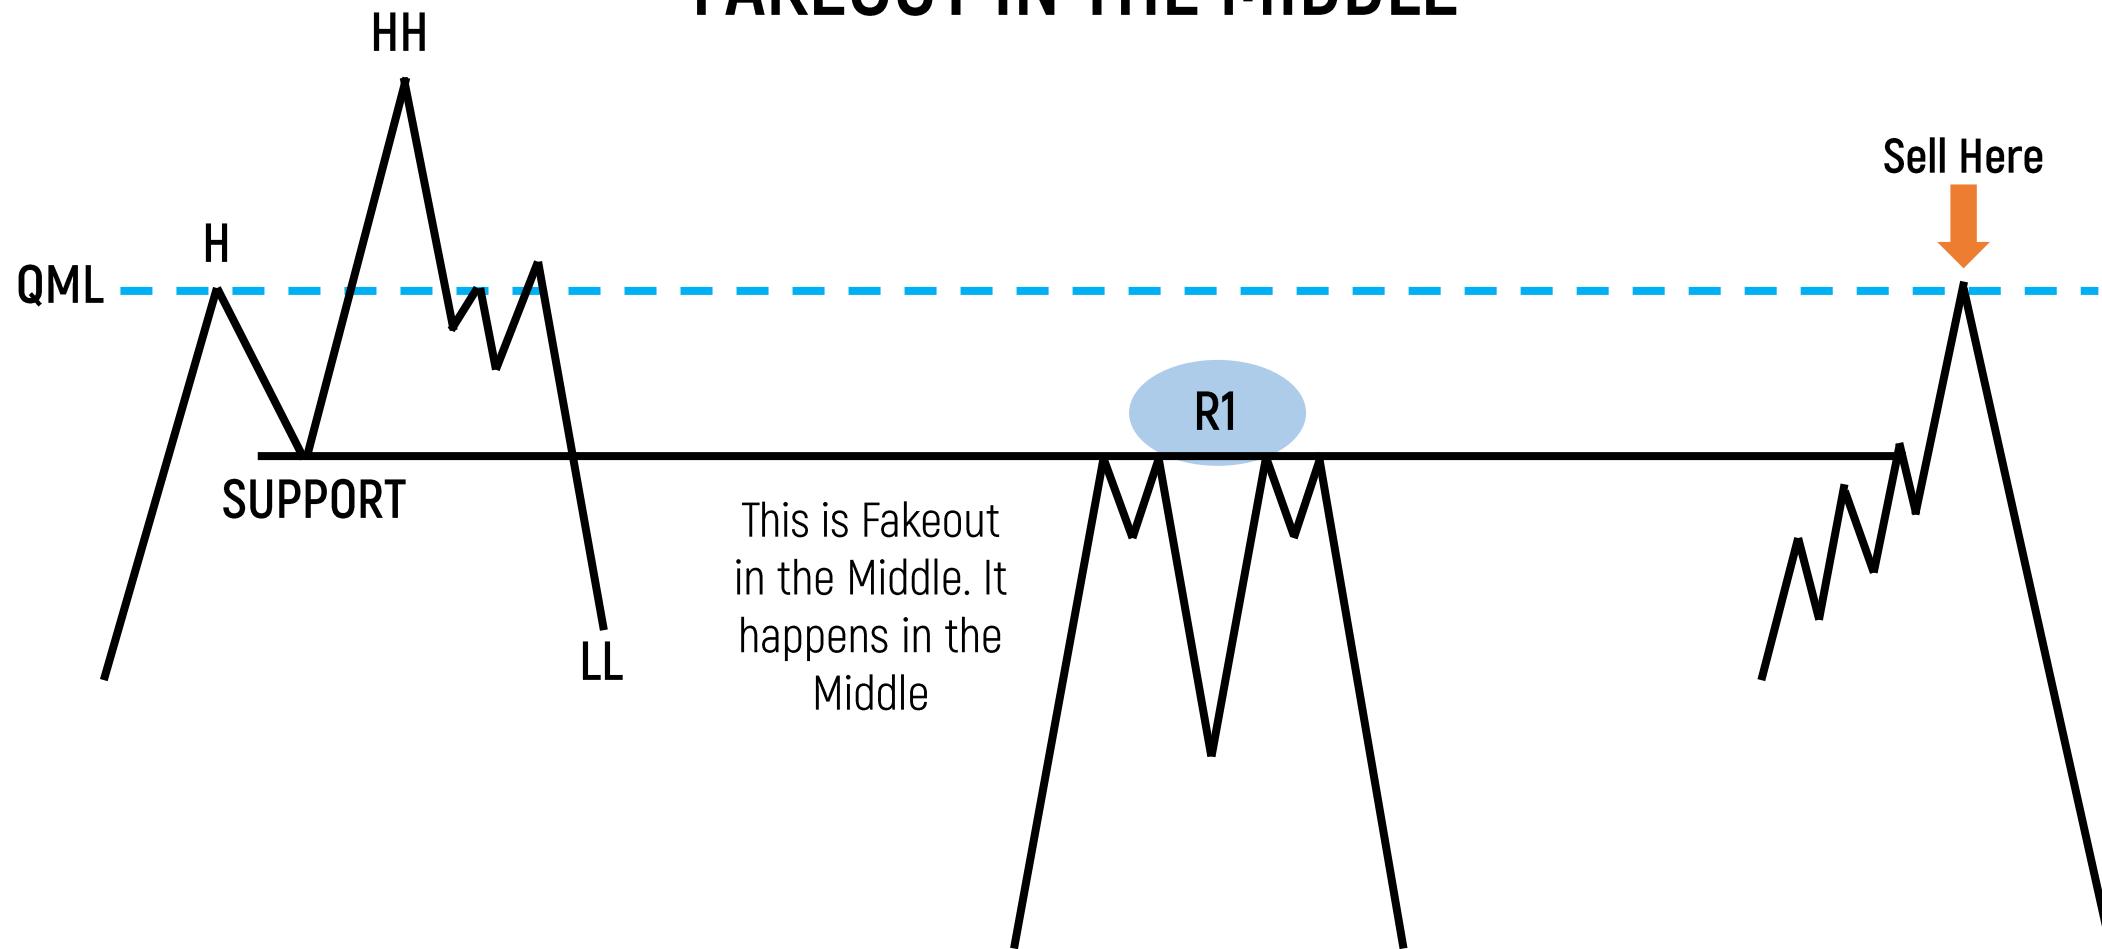

There are 5 types of fakeouts. Fakeout in the Beginning, Fakeout in the Middle, Fakeout in the End, Diamond Fakeout and Full Fakeouts.

CHAPTER 5 STILL

Fakeouts

SPECIAL FAKEOUTS

Learning the Best Profitable Fakeout Setups

What is the BEST fakeout Setup?

The best fakeout setup would consist **a set of previous fakeouts before the Higher High (HH)**. We also refer this previous fakeouts as Previous Highs or simply, previous resistance.

Why fakeout with previous highs?

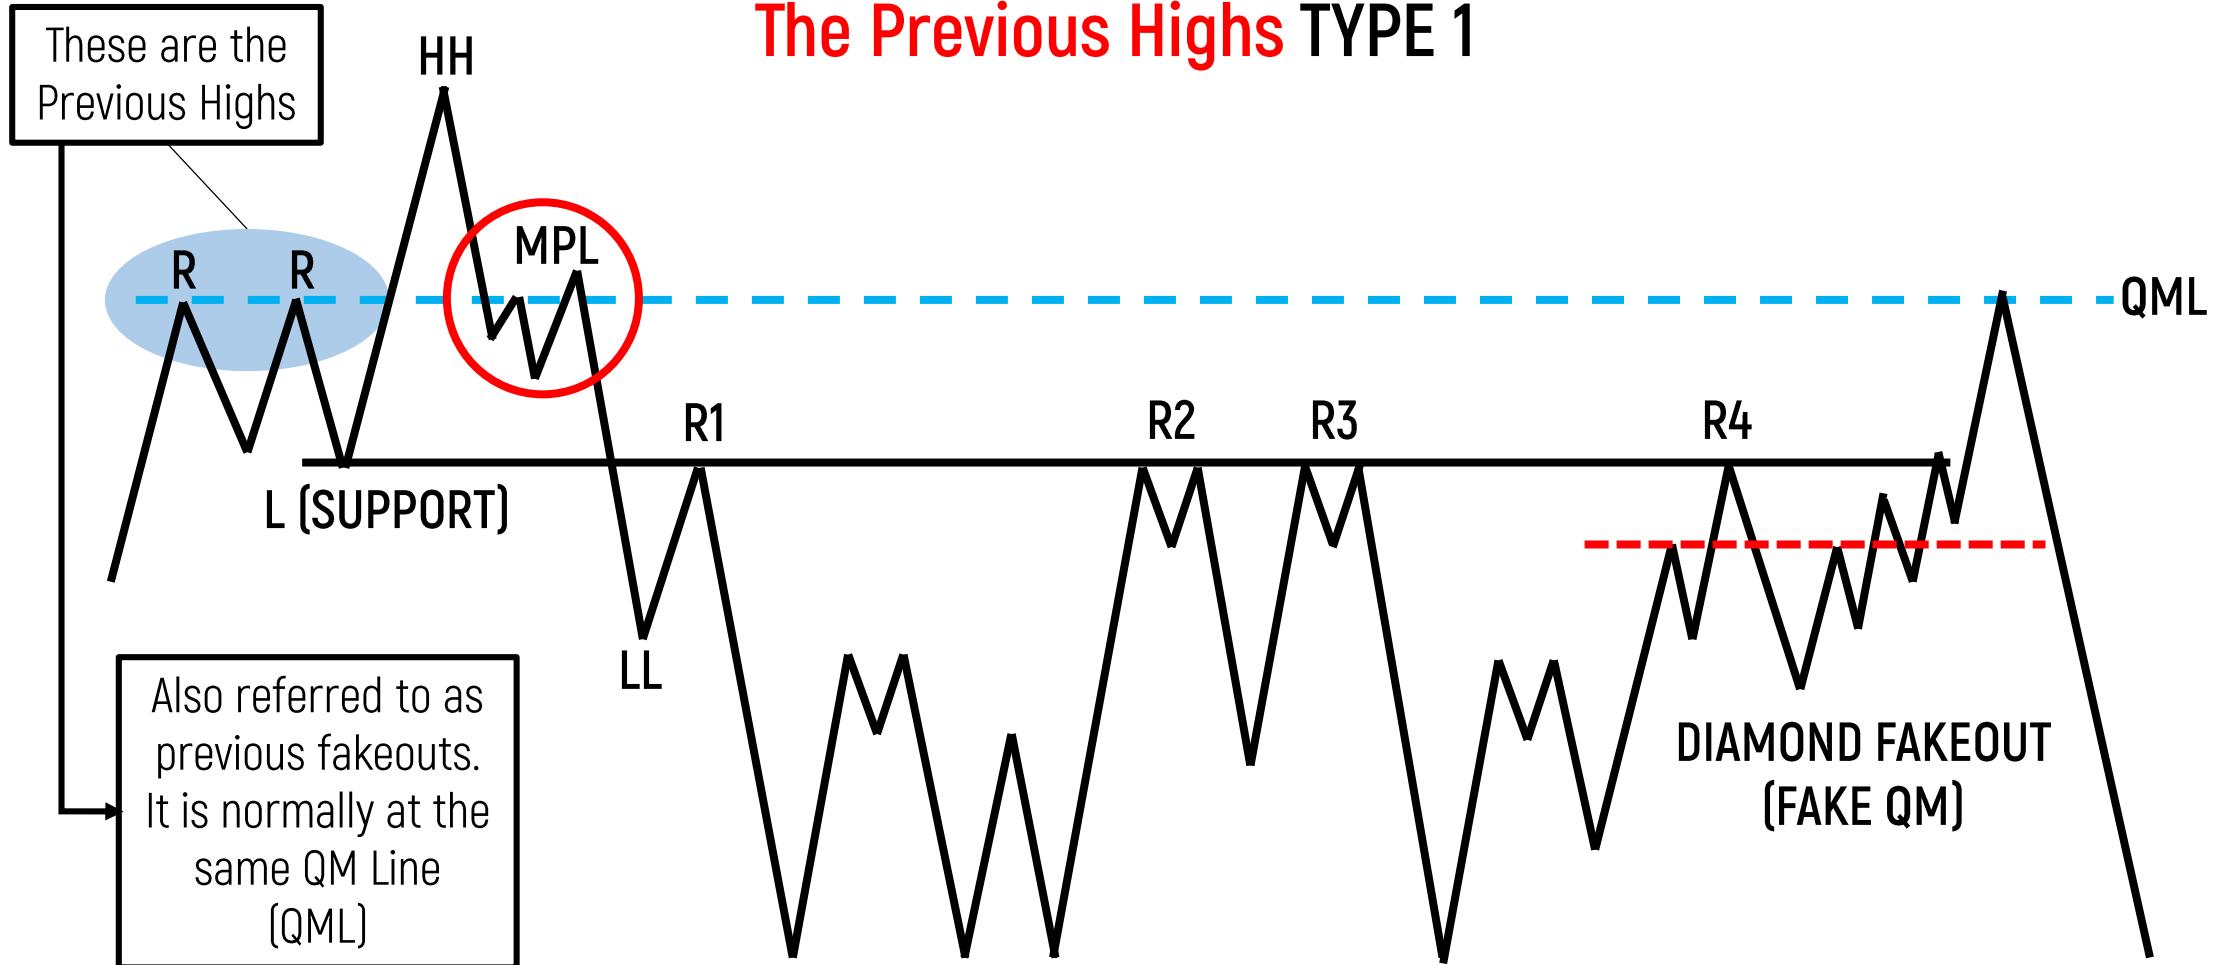

This setup proved to be one of the Killer setups with 90% Reward bias. So if you ever find this kind of setup, don't let it slip away.

90% Reward Bias

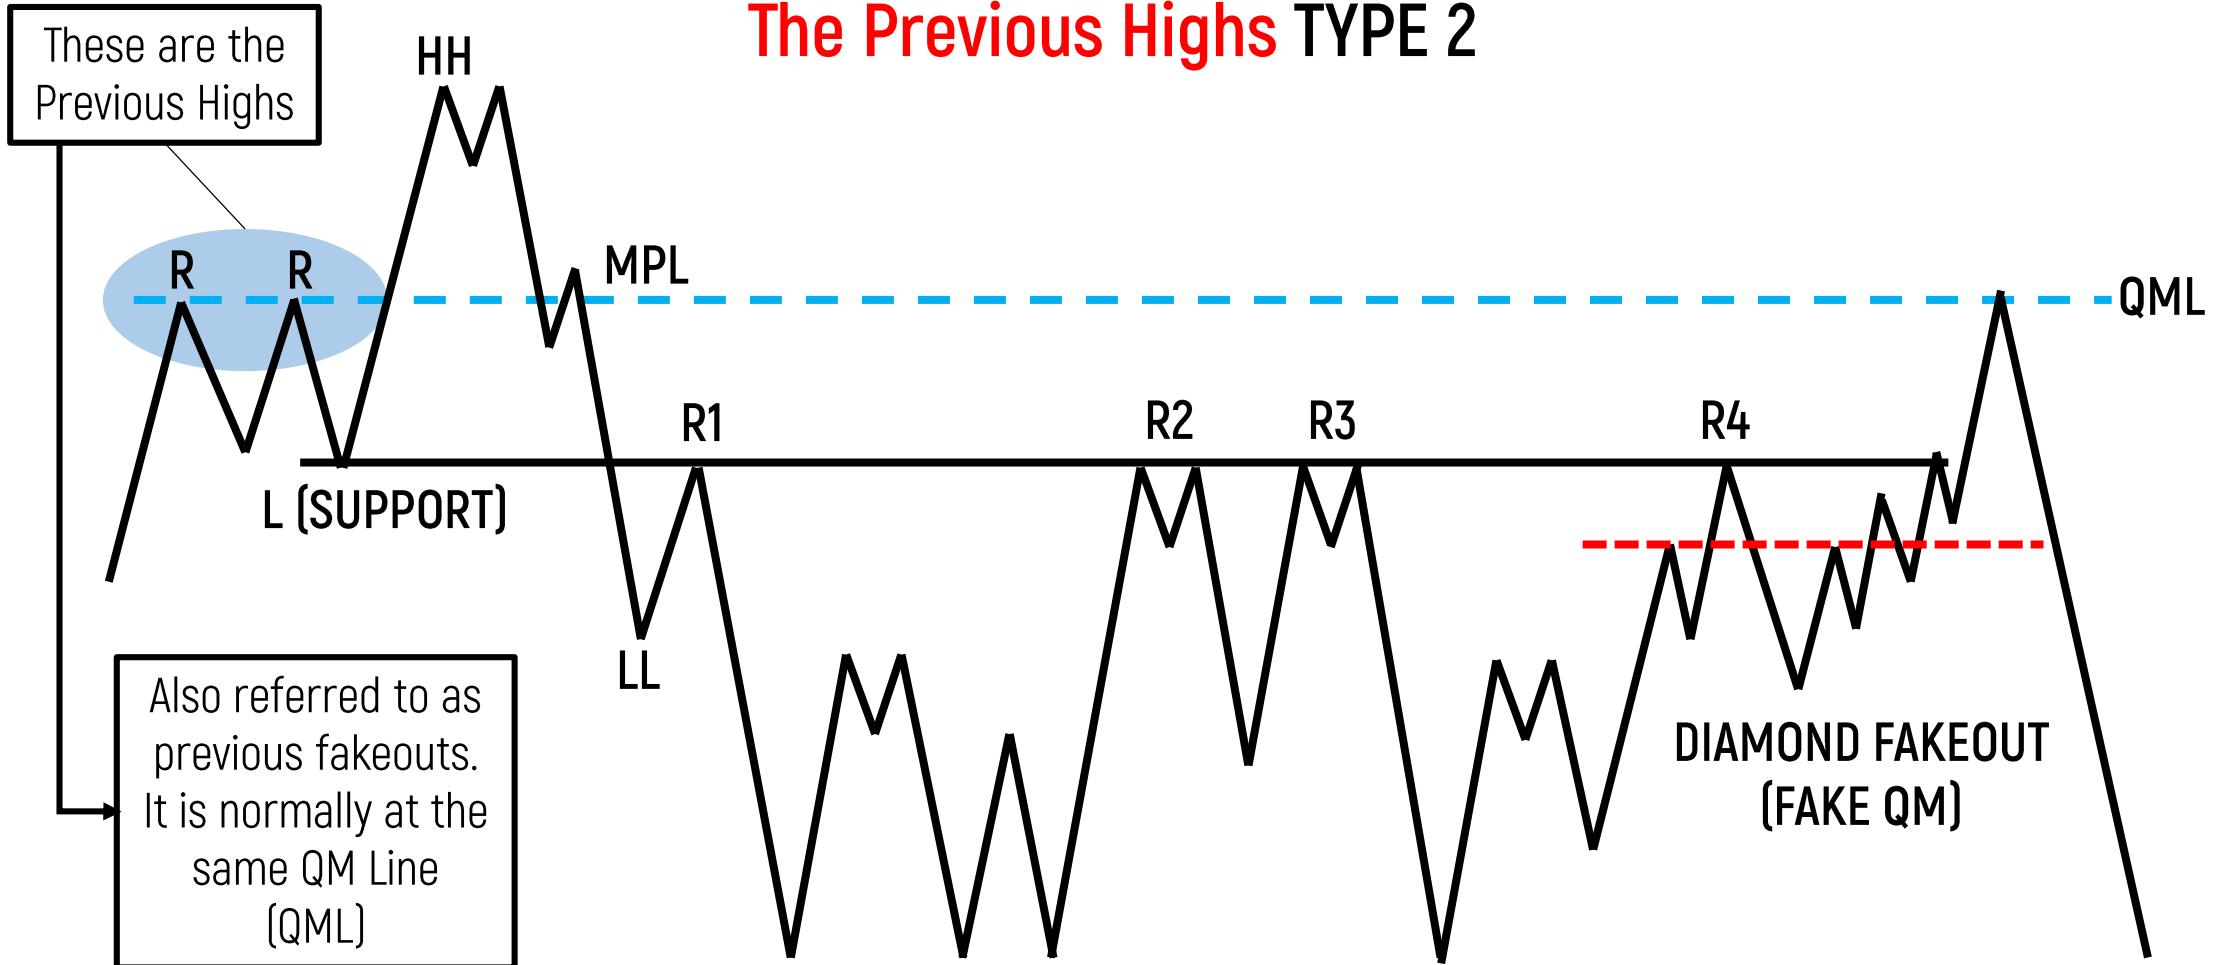

Chances of this setup hitting SL is very low. So, take the chance to make kaw-kaw (huge) profit from this setup!
